Microsoft Word is a popular word processing program It is capable of doing many things and because of that it is complex sometimes difficult to use and sometimes it does things we did not ask it to do However after we learn how to control Word it will make the process of preparing papers much easier We will find that it can do things we want it to do we just need to learn how to use it This tutorial is designed for a variety of users For beginnings some of what we say will be too complicated For more experienced users some of what we say will be too simplistic So feel free to skip the parts you do not want But if you think something is too complicated you might want to skim it anyway just so that you ll know that such things can be done if you ever need them Store it away for a later day Our focus in this document is for academic papers Other users will probably find this information helpful too but our focus is on academic papers Some of the default settings in Word are designed for business use and academic papers require different settings So we need to learn how to change the settings in Word We examine each of the menu ribbons and features skipping those that are not needed for academic papers We spend the most space for File Home Insert Page Layout References Review and View Includes more than 100 screenshots to illustrate how to do it **A Beginner's Guide to Economic Research and Presentation** Jeffrey A. Conducting good research is critical to any student today Writing good research papers is equally important yet many students have not been given the proper tools to convey cogently the results of their research This book is for you or anyone who needs a step by step approach to the writing of a research paper in the field of economics Most books concerned with research writing are broadly applied They approach the subject generally which is to say that they don t lay out a particular path to conducting research Yet a specific path offering a specific focus to writing research is exactly what is needed for most students This book provides that focus For example this book doesn t cover a dozen different search engines to perform a literature review it specifies only EconLit Nor are you left to decide what scholarly publications are important ones to review the book emphasizes only the use of journal impact factors found through RePEc to rank journal articles and their importance to the literature at large Whereas other books provide an overview of how to present research with only cursory suggestions and tips inside this book the authors provide precise details on all aspects of research writing including how many PowerPoint slides one should prepare for presentations and how much content should be on each slide In short unlike other books this book provides a specific approach to conducting research writing a paper and presenting its material
