The utopian novel in America : 1886 - 1896 ; the politics of form Jean Pfaelzer, 1984 Imaginary Communities Phillip Wegner, 2002-06-04 Drawing from literary history social theory and political critique this far reaching study explores the utopian narrative as a medium for understanding the social space of the modern nation state Considering the narrative utopia from its earliest manifestation in Thomas More's sixteenth century work Utopia to some of the most influential utopias of the late nineteenth and twentieth centuries this book is an astute study of a literary genre as well as a nuanced dialectical meditation on the history of utopian thinking as a quintessential history of modernity As he unravels the dialectics at work in the utopian narrative Wegner gives an ambitious synthetic discussion of theories of modernity considering and evaluating the ideas of writers such as Ernst Bloch Louis Marin Gilles Deleuze Walter Benjamin Martin Heidegger Henri Lefebvre Paul de Man Karl Mannheim Mikhail Bakhtin Jürgen Habermas Slavoj Žižek and Homi Bhabha **The Cambridge Companion to Utopian Literature** Gregory Claeys, 2010-08-05 Using a combination of historical and thematic approaches this volume engages with the fascinating and complex genre of utopian literature **Industries of Architecture** Katie Lloyd Thomas, Tilo Amhoff, Nick Beech, 2015-11-06 At a time when the technologies and techniques of producing the built environment are undergoing significant change this book makes central architecture's relationship to industry Contributors turn to historical and theoretical questions as well as to key contemporary developments taking a humanities approach to the Industries of Architecture that will be of interest to practitioners and industry professionals as much as to academic researchers teachers and students How has modern architecture responded to mass production How do we understand the necessarily social nature of production in the architectural office and on the building site And how is architecture entwined within wider fields of production and reproduction finance capital the spaces of regulation and management techniques What are the particular effects of techniques and technologies and above all their inter relations on those who labour in architecture the buildings they produce and the discursive frameworks we mobilise to understand them **Imagining Future War** Antulio J. Echevarria II, 2007-04-30 Rapid and momentous technological changes at the turn of the 20th century forced military professionals and educated civilians to envision the future of war and warfare especially during an age where nations found themselves aggressively competing for dominance on the world stage Antulio J Echevarria II offers a

comparative study of these predictions to assess who got it right and why He concludes that professionals were particularly adept at predicting the warfare of the immediate future by framing their discussions in terms of solving tactical problems but they were much less successful at thinking of the long term Unburdened by the necessity of strategic problem solving educated amateurs were allowed more flexibility to imagine the long term future of warfare and at times proved to be remarkably accurate Echevarria organizes his study by comparing visions of future wars on land at sea undersea and in air In each instance professionals and amateurs had their own distinctive imaginings Among the notable speculators included in this book are science fiction author H G Wells and military theorist Ivan Bloch This approach to the study of warfare is one of those rare examples of a book that can appeal to and inform a wide cross section of readers **The Fiction of Dread**

Robert T. Tally Jr.,2023-12-14 A history and examination of dystopia and angst in popular culture that speaks to our current climate of dread At the dawn of the 20th century a wide ranging utopianism dominated popular and intellectual cultures throughout Europe and America However in the aftermath of the World Wars with such canonical examples as Brave New World and Nineteen Eighty Four dystopia emerged as a dominant genre in literature and in social thought The continuing presence and eventual dominance of dystopian themes in popular culture e g dismal authoritarian future states sinister global conspiracies post apocalyptic landscapes a proliferation of horrific monsters and end of the world fantasies have confirmed the degree to which the 21st is also a dystopian century Drawing on literature as varied as H G Wells s The Time Machine Neil Gaiman s American Gods and Suzanne Collins s The Hunger Games and on TV and film such as The Walking Dead Black Mirror and The Last of Us Robert T Tally Jr explores the landscape of angst created by the monstrous accumulation of dystopian material The Fiction of Dread provides an innovative reading of contemporary culture and offers an alternative vision for critical theory and practice at a moment when as has been famously observed it is easier to imagine the end of the world than the end of capitalism **Women's Utopias in British and American Fiction**
