Women Still At Work Professionals Over Sixty And On The Job:

Women Still at Work Elizabeth F. Fideler, 2012-06-25 From Betty White to Toni Morrison we are surrounded by examples of women working well past the traditional retirement age. In fact, the fastest growing segment of the workforce is women age sixty five and older. *Women Still at Work* tells the everyday stories of hard working women and the reasons they are still on the job with a focus on women in the professional workforce. The book is filled with profiles of real women working in settings from academia to drug and alcohol rehabilitation centers from business to the arts talking about the many reasons why they still work and the impact work has on their lives. *Women Still at Work* draws on national survey data and in depth interviews showing not only the big picture of older women advancing their careers despite tough economic conditions but also providing the personal insights of everyday working women from all parts of the country. Their stories showcase some of the key themes women choose to stay at work including job satisfaction, diminishing retirement savings, the need to support children or parents longer in life, exercising the hard won right to work, and more. *Women Still at Work* shows employment to be a positive and rewarding part of life for many women well beyond the expected retirement age. Filled with profiles of older working men as well as dynamic interview quotes, *Men Still at Work* explores thorny issues such as masculinity and the need to provide as well as economic issues, job satisfaction, and more. Bulletin of the National Federation of Business and Professional Women's Clubs, 1929 Socio-economic Status and Living Arrangements of Older Persons in Switzerland Myriam Bongard, Claudine Sauvain-Dugerdil, 2002. Population ageing is now widely recognised as a major feature of demographic trends in the countries of Europe and North America. This report begins with a broad presentation of the demographic trends and socio-economic context in Switzerland. Of a population of 7.1 million in 1997, nearly a million are over 65. An examination of family demography as shown by living arrangements finds a great increase in the number of small households illustrating decreased family size, increased life expectancy and a growing divorce rate. Trends in age at retirement, economic activity after 60, and the prospects for the pension scheme are considered. The well-being of older people and the challenge for the health system in dealing with the growing number of the elderly complete this survey. *Left Hand Left Behind* Britt-Marie Thurén, 1988. Estudio antropológico sobre la estructura social y las relaciones de género en Beniturbia, un barrio de clase obrera de la ciudad de Valencia. A través de un trabajo de campo, la autora analiza la realidad cambiante de este barrio y sus habitantes, sus costumbres y formas de comportamiento social. En este contexto examina la situación de las mujeres dentro de una organización social donde los hombres detentan el poder en todos los sentidos y las mujeres utilizan cierta mano izquierda como mecanismo de defensa. Se explica la metodología utilizada y se incluyen tres apéndices donde se expone el contexto y el periodo de realización de este trabajo y se adjunta el cuestionario que sirvió de base para el mismo.
