Work Self And Society After Industrialism:

Work, Self, and Society Catherine Casey,1995 Despite recent interest in the effects of restructuring and redesigning the work place the link between individual identity and structural change has usually been asserted rather than demonstrated Through an extensive review of data from field work in a multi national corporation Catherine Casey changes this She knows that changes currently occurring in the world of work are part of the vast social and cultural changes that are challenging the meta trends of modern industrialism These events affect what people do everyday and they are altering relations among ourselves and with the physical world This valuable book is not only a critical analysis of the transformations occurring in the world of work but an exploration of the effects of contemporary practices of work on the self Work, Self and Society Catherine Casey,2013-01-11 Despite recent interest in the effects of restructuring and redesigning the work place the link between individual identity and structural change has usually been asserted rather than demonstrated Through an extensive review of data from field work in a multi national corporation Catherine Casey changes this She knows that changes currently occurring in the world of work are part of the vast social and cultural changes that are challenging the assumptions of modern industrialism These events affect what people do everyday and they are altering relations among ourselves and with the physical world This valuable book is not only a critical analysis of the transformations occurring in the world of work but an exploration of the effects of contemporary practices of work on the self **Connecting Self to Society** Vanessa May,2013-10-01 Belonging is often overlooked in its relationship to society and social change and yet it forms the bedrock of how we relate to the world around us Through the work of Marx Giddens and Goffman this book covers the familiar terrain of identity theory while going beyond it to other sites of identification and social change *Gender And Work In Capitalist Economies* Odih, Pam,2007-10-01 Odih explores the sociological aspects of work time and gender The trend towards the regulation and commodification of work and leisure time is examined along with other links between work culture identity and time *Feeling Squeezed* Debora Bone,1997 An Ethical Global Information Society Jacques J. Berleur,Diane Whitehouse,2013-11-11 Many challenges lie ahead in the development of a global information society Culture and democracy are two areas which may be under particular threat The book reflects on today s complex and uncertain cultural and democratic developments arising as a result of an increasingly global technologically connected world In particular it focuses on the Internet examining new metaphors for communication defining the issues at stake and proposing options actions and solutions Among the issues discussed were multi cultural developments cultural sensitivities and the involvement of cultural minorities generation gaps gender issues technology access for the elderly and the disabled technology transfer Technological Turf Wars Jessica R. The Fabric of Self Diane Rothbard Margolis, Professor Diane Rothbard Margolis, 1998-01-01 Margolis illuminates our path through a cluttered conceptual territory I think this is a straining important contribution to our understanding of emotion and the self

Arlie Russell Hochschild author of *The Time Bind When Work Becomes Home and Home Becomes Work* Margolis's grasp of the complexities of selfhood in contemporary life is a key contribution of her work She takes us on a fascinating and readable excursion in social theory

John P Hewitt author of *Dilemmas of the American Self* Ways of viewing the self change when social environments change argues Diane Rothbard Margolis in this powerful work of social theory She analyzes six views of the self found in contemporary Western cultures and shows how each plays a critical role in society and in our everyday lives

Each image of the self is a moral construct expressing what is forbidden allowed and expected Each was created at a historical moment that demanded a new assessment of right and wrong No moral orientation is in absolute terms better or worse than any other Margolis contends each continues to exist because it permits or demands some form of action required by contemporary society

Although the idea of the self as an individualistic exchanger rational self interested competitive may dominate current discourse especially in market economies Margolis describes other constructs the obligated self the cosmic self the reciprocating self the called person and the civic self She delineates the moral ideas from which these images arise and develops a theory of emotions to explain how we live by several moral orientations simultaneously

Her perspective on moral orientations and emotions illuminates such contemporary dilemmas as why women and men may play the same social role quite differently why women encounter the glass ceiling and why nationalism persists despite the growth of world markets
