Crosscut Saw Manual United States Department of Agriculture, Forest Service Technology and Development Program, Many readers undoubtedly have run crosscut saws in the past, and a lot of you know the difference between a good running saw and a poorly filed one. A poorly filed saw deserves the name I have often heard attributed to it: misery whip. A well filed saw, however, is efficient and can be satisfying to use. Only in recent years was a chain saw developed that could beat a topnotch buckler in a contest. There is a record of a 32 inch Douglas fir log cut in 1 minute 26.5 seconds by one buckler. Saw filers of any quality are becoming very difficult, if not impossible, to find. This manual was written so those of you who use crosscut saws can maintain them yourselves and overcome some of the misery of that old whip. The manual provides a basic
