Working with Preferences: Less Is More Souhila Kaci, 2011-06-20 Preferences are useful in many real life problems guiding human decision making from early childhood up to complex professional and organizational decisions In artificial intelligence specifically preferences is a relatively new topic of relevance to nonmonotonic reasoning multiagent systems constraint satisfaction decision making social choice theory and decision theoretic planning The first part of this book deals with preference representation with specific chapters dedicated to representation languages nonmonotonic logics of preferences conditional preference networks positive and negative preferences and the study of preferences in cognitive psychology The second part of the book deals with reasoning with preferences and includes chapters dedicated to preference based argumentation preferences database queries and rank ordering outcomes and intervals The author concludes by examining forthcoming research perspectives This is inherently a multidisciplinary topic and this book will be of interest to computer scientists economists operations researchers mathematicians logicians philosophers and psychologists

Ontology-Based Data Access Leveraging Subjective Reports Gerardo I. Simari, Cristian Molinaro, Maria Vanina Martinez, Thomas Lukasiewicz, Livia Predoiu, 2017-09-22 This SpringerBrief reviews the knowledge engineering problem of engineering objectivity in top k query answering essentially answers must be computed taking into account the user s preferences and a collection of subjective reports provided by other users Most assume each report can be seen as a set of scores for a list of features its author s preferences among the features as well as other information is discussed in this brief These pieces of information for every report are then combined along with the querying user s preferences and their trust in each report to rank the query results Everyday examples of this setup are the online reviews that can be found in sites like Amazon Trip Advisor and Yelp among many others Throughout this knowledge engineering effort the authors adopt the Datalog family of ontology languages as the underlying knowledge representation and reasoning formalism and investigate several alternative ways in which rankings can be derived along with algorithms for top k atomic query answering under these rankings This SpringerBrief also investigate assumptions under which our algorithms run in polynomial time in the data complexity Since this SpringerBrief contains a gentle introduction to the main building blocks OBDA Datalog and reasoning with preferences it should be of value to students researchers and practitioners who are interested in the general problem of incorporating user preferences into related formalisms and tools Practitioners also interested in using Ontology based Data Access to leverage information contained in reviews of products and services for a better customer experience will be interested in this brief and researchers working in the areas of Ontological Languages Semantic Web Data Provenance and Reasoning with Preferences
