Working 2015 2016 Design Yearbook:

Work Safety Regulation in China Jie Gao, 2022-03-31 Fatality quotas implemented in China's industrial sector and local governments are being used to promote work safety and therefore reducing the number of work-related deaths. Given the controversial nature of this policy, Gao analyzes how the fatality quotas are functioning to aid the country in balancing economic growth and social stability. The book also examines significant implications caused by this policy's implementation in the local regions and reveals how local officials attempt to handle these problems. This is the first book to systematically examine the role of death indicators in work safety improvement in contemporary China, revealing insight into Beijing's quota-oriented approach to policy making. **Work in the 21st Century** Peter K. Ross, Susan Ressler, Elizabeth J.

Sander, 2017-07-13 This book provides practical guidance for policy makers, managers, and workers trying to better understand the processes underpinning changing work environments and labour markets while further developing academic perspectives and theoretical debate on the changing nature of work and workplaces in the 21st century. **Red Dot Design**

Yearbook 2015/2016 Peter Zec, 2015-07 The world's most outstanding achievements in product design from the year 2014 to 2015. Presented in the volumes *Living*, *Doing*, and *Working*. **Putting Library Assessment Data to Work** Selena

Killick, Frankie Wilson, 2019-07-16 Effective library assessment is crucial for a successful academic library. But what do we mean by library assessment and how can it be used to improve the library service? This new book provides a practical guide for library administrators, managers, and practitioners on how to make effective use of existing sources of information for assessment activities with the aim of improving academic library services. *Putting Library Assessment Data to Work* brings together key library assessment methodologies, detailing how they can be used to improve an academic library. The book takes common sources of data that academic libraries will already be collecting and presents simple qualitative and quantitative techniques that can be used to evaluate and assess their services both in detail and overall. The different assessment methods are presented from a practical perspective with a theoretical grounding and include practical case studies to illustrate how the methodologies have successfully been applied. The book includes coverage of the theoretical framework for assessment, its purpose, and the tools and techniques used. Institutional, national, and international student surveys and how they can be used to improve library service. The history and development of standardised library surveys, e.g. LibQUAL, how they have been used, and their impact. The benefits of in-house library surveys and case studies of where they have been used. Library statistics, including standardised statistics sets and key performance indicators. Qualitative feedback in the library. Emerging techniques, including UX. Taking a holistic approach to library assessment through advocacy and strategic planning. This book will be essential reading for library and information service managers, administrators, assessment practitioners, educators, and policy shapers. It will also be useful for students and researchers interested in library assessment. *Speed Read Car Design* Tony Lewin, 2017-12-05 See what really goes into every aspect of car design.
