 Massage Therapy For Survivors of Sexual and Domestic Violence** Audra Hixson, 2006-03-15 Women experience sexual
 and domestic violence at alarmingly high rates Recovery from this type of trauma can be a complex and extensive process
 that in best cases involves a broad network for support This dissertation examined the experiences of women over the age of
 21 who have received massage therapy during their healing process from sexual or domestic violence For the purposes of
 this study the women who participated were often referred to as survivors of abuse Current research examined in the
 literature review indicates that the effects of this type of trauma are multifaceted and that one of the interventions sought for
 diminishing the effects of this trauma is massage The importance of this study completed with the use of descriptive research
 methodology included the opportunity to gain information from abuse survivors about their personal experiences with
 massage and how they can best be served by the massage therapist The results of a self report survey and interview process
 provide valuable information to raise awareness of these societal issues among massage professionals While the subjects
 were not interviewed about their specific experiences of abuse they provided important information about the effects that
 these experiences have had on their lives Further the women interviewed shared information about the concerns that they
 had with regard to massage therapy and some of the specific experiences that they have had during massage sessions
 Although the sample size was small with 10 women interviewed the information provided has clear implications for the
 practice of massage therapy Some of the implications found involve therapist gender trust building between client and
 practitioner and communication with the client during massage therapy sessions Recommendations for massage
 professionals have been made based on these findings Further research opportunities exist in several areas and include
 screening massage clients for abuse during the intake process examining the challenges for male massage therapists and
 female massage therapists and evaluating the massage educational institutions for training in issues of trauma particular to
 sexual and domestic violence **Assessing and Treating Trauma and PTSD** Linda J. Schupp, 2015-03-01 This reader

 related criteria The second edition updates significant trauma related diagnoses as well as new theories research and
 therapeutic techniques This collection of physiological and psychological techniques provides professions with a practical
 eclectic approach to a variety of treatments High Risk indicators for PTSD Changes from DSM IV TR to DSM 5 DSM 5
 predictors for PTSD Dissociation and treatments Attachment theory and neurobiology of broken attachment bonds Nutritional
 supplement update for the prevention and treatment of PTSD Current psychopharmacological studies for PTSD The
 relationship as therapy **Touch After Trauma** Alison Fraser, 2024-07-31 Western medicine remains dominated by
 paradigms that separate physical and mental wellness as if they were unrelated This artificial boundary poses a challenge for
 manual therapists as we see increasing signs of traumatic stress in the patients we serve Modern research concedes that the

mind and body are interdependent they work seamlessly in tandem This is especially evident in those who have experienced trauma Psychological trauma is often expressed in physical signs and symptoms and physical trauma often bears psychological echoes What if we as manual therapists could integrate this research into our practices What if we can better support trauma survivors within our scope of practice Touch After Trauma offers manual therapists a new clinical framework presenting the neuroscience of trauma in plain language and weaving in principles of trauma informed care This forms the foundation for discussing novel treatment approaches to support a more comprehensive recovery for trauma survivors While practical techniques are discussed in detail this guide does not aim to be prescriptive but rather encourages clinicians to seek alternative creative and collaborative solutions to support patients in their healing journey *Mosby's Fundamentals of Therapeutic Massage* Sandy Fritz,W.
