African Studies for the 21st Century Jacob U. Gordon, 2004 African Studies as a field of inquiry has had to combat the insidious interpretations of racist theories used to justify the domination and colonisation of the continent for the past five hundred years While this has not been the complete history of the field it has yielded numerous historians who have either misunderstood or deliberately distorted the idea of African agency Now Jacob Gordon has brought together some of the finest minds in the field to establish the parameters for the future There have been two general movements in the past one hundred years that have reflected the ideas of Africans toward the doctrine of white supremacy in African Studies and other fields Negritude and Afrocentricity Both of these movements have attendant variances and oppositions Nevertheless they may be said to speak to the same problem confronting the African people in a global way and African Studies specifically This book represents an advance in the conceptualisation of African leadership and political direction There have always been models of leadership rooted deeply in the culture responsive to the historical contexts of the people themselves that have been used by African leaders However what the authors in this volume are committed to is the development of ideas and ideals that will lend continuity to the best traditions of the African people

The Paralysis of Analysis in African American Studies Stephen Ferguson II, 2023-09-21 Stephen C Ferguson II provides a philosophical examination of Black popular culture for the first time From extensive discussion of the philosophy and political economy of Hip Hop music through to a developed exploration of the influence of the postmodernism poststructuralist ideology on African American studies he argues how postmodernism ideology plays a seminal role in justifying the relationship between corporate capitalism and Black popular culture Chapters cover topics such

as cultural populism capitalism and Black liberation the philosophy of Hip Hop music and Harold Cruse's influence on the cultural turn in African American studies Ferguson combines case studies of past and contemporary Black cultural and intellectual productions with a Marxist ideological critique to provide a cutting edge reflection on the economic structure in which Black popular culture emerged He highlights the contradictions that are central to the juxtaposition of Black cultural artists as political participants in socioeconomic struggle and the political participants who perform the rigorous task of social criticism Adopting capitalism as an explanatory framework Ferguson investigates the relationship between postmodernism as social theory current manifestations of Black popular culture and the theoretical work of Black thinkers and scholars to demonstrate how African American studies have been shaped **African Studies Newsletter**, 1975

Gordon, 1999-07-30 The plight of the Black male in American society has been well documented by scholars and practitioners

Although Black males represent only 6 percent of the American population they represent about 40 percent of the prison population the number of Black males in prison and jail exceeds the number of Black males in higher education The homicide rates for Black males were 72.5 percent per 100 000 nearly eight times higher than for White males This bibliographic volume explores the extent to which American academia has addressed these problems It will be an invaluable resource for researchers as well as practitioners in social service programs In addition to more than 400 annotated publications the book includes a selected list of works on the African American male and a compilation of doctoral dissertations This publication will serve as a reference in public as well as academic libraries human service agencies government policymaking agencies and in academic courses in gender and ethnic studies criminal justice and social psychology The Black Male in White America Jacob U. Gordon, 2004 This book explores twelve related research topics each constituting a chapter These chapters reflect the magnitude of the problems facing the African American male The book also documents the success stories of African American men and how they have lived beyond stereotypes and other odds These issues are not likely to go away in the 21st century They require government action and individual initiative toward a civil society in which America's promise can be a reality for all Americans thus making sure that no single American will be left behind Contents Preface African American Males in Kindergarten African American Males in Higher Education African American Fatherhood Theatre and the Re Creation of the Black Experience Contributions of African American Males to the Sciences and Medicine The African American Male in American Journalism African American Males and the Economics of Poverty The Black Male in the Clinton Administration Transitioning African American Men From the Prison Back to the Community African American MSM The Black Male and Recent U S Policy Toward Africa Foreign Born Black Males The Invisible Voices Toward Healing the Exposed Being Robert Thornton, 2017-05-01 This ethnography explores the Ngoma healing tradition as practiced in eastern Mpumalanga South Africa Bungoma is an active philosophical system and healing practice consisting of multiple strands based on the notion that humans are intrinsically exposed to each other and that this is the cause of illness but also the condition for the possibility of healing This healing seeks to protect the exposed being from harm through augmenting the self Unlike Western medicine it does not seek to cure physical ailments but aims to prevent suffering by allowing patients to transform their personal narratives of Self Like Western medicine it is empirical and is presented as a local knowledge that amounts to a practical anthropology of human conflict and the environment The book seeks to bring this anthropology and its therapeutic applications into relation with global academic anthropology by explaining it through political economic interpretive and environmental lenses
