Understanding Developmental Dyspraxia Madeleine M. Portwood, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company *Developing School Provision for Children with Dyspraxia* Nichola Jones, 2005-10-18 This guide shows how to plan a whole school approach to including children with dyspraxia and DCD developmental co ordination disorder It offers those in managerial and supervisory roles and special education support services guidance on models of provision that have worked successfully in schools and LEAs *Understanding Developmental Dyspraxia* Madeleine Portwood, 2013-05-13 In this text the emphasis is placed on the theoretical aspects of developmental dyspraxia the latest research data and the neurological basis of the condition The focus is to enable professionals to diagnose the disorder and determine the most appropriate and effective methods of intervention *Living with Dyspraxia* Mary Colley, 2006-08-15 This book was written to help all adults with Dyspraxia tackle the everyday situations that many people take for granted It is full of practical advice on everything from getting a diagnosis to learning how to manage household chores Topics addressed include self esteem and how Dyspraxia often interacts with other conditions *Dyslexia, Dyspraxia and Mathematics* Dorian Yeo, 2008-04-30 Written by a teacher with many years experience of teaching mathematics to primary school dyslexic and dyspraxic children with a wide range of abilities this book is designed to be a practical teaching guide It offers detailed guidance and specific teaching suggestions to all specialist teachers support teachers classroom teachers and parents who either directly teach mathematics to dyslexic and dyspraxic children or who support the mathematics teaching programmes of dyslexic or dyspraxic children Although the book has grown out of teaching experience it is also informed by widely acknowledged contemporary and international research which explores the cognitive aspects of learning mathematics and tries to understand why it is that some children fail to learn mathematics Many of the teaching principles described in the text have specific and quite far reaching implications The theoretical arguments should therefore also be of interest to special needs co ordinators heads of maths departments head teachers or other professionals who are responsible for designing or modifying the maths learning programmes of children with special learning and maths difficulties In more general terms the book hopes to contribute to the broad discussion of the cognitive features and educational needs of dyslexic and dyspraxic children **Guide to Dyspraxia and Developmental Coordination Disorders** Amanda Kirby, Sharon Drew, 2013-04-15 Built upon the good practice for which the Dyscovery Centre has become so well known this book takes a broader view of the difficulties that those with additional needs face It considers whether this is a health educational or social difficulty and what the wider implications are for the individual and how they manage at home and in the community The authors look at what happens what can be done to help and what changes occur as the child becomes an adolescent and eventually an adult Teachers SENCOs teaching assistants occupational therapists physiotherapists speech and language therapists and parents of children with dyspraxia or developmental co ordination disorders should find this

book stimulates their thinking and helps them in their work *Supporting Children with Motor Co-ordination Difficulties*
Susan Coulter, Lesley Kynman, Elizabeth Morling, 2013-09-05 Off the shelf support containing all the vital information
practitioners need to know about Motor Co ordination Difficulties this book includes Definition and causes of different types
of Motor Co ordination Difficulties Educational implications Advice on how to manage support staff *Special Teaching for
Special Children* Ann Lewis, Brahm Norwich, 2004-11-16 I recommend this book as an important contribution to the debate on
pedagogy in special education It is largely well written and informative and rich with ideas and opinions Educational Review
What if anything is special about teaching children with special or exceptional learning needs This book addresses this
question looking at pupils special learning needs including low attainment learning difficulties language difficulties emotional
and behavioural problems and sensory needs Some special needs groups for example dyslexia have argued strongly for the
need for particular specialist approaches In contrast many proponents of inclusion have argued that good teaching is good
teaching for all and that all children benefit from similar approaches Both positions fail to scrutinise this issue rigorously and
coherently and it is this aspect which distinguishes this book Leading researchers in each special needs field defend and
critique a conceptual analysis of teaching strategies used with particular learner groups with special educational needs
Summaries by the editors after each chapter link pedagogic strategies knowledge and curriculum to key points from the
chapter and pave the way for discussion This book is indispensable reading for students policy makers researchers and
professionals in the field of special educational needs and inclusion Shortlisted for the TES NASEN Book Awards 2005
