**Literary Mapping in the Digital Age** David Cooper, Christopher Donaldson, Patricia Murrieta-Flores, 2016-05-20 Drawing on the expertise of leading researchers from around the globe this pioneering collection of essays explores how geospatial technologies are revolutionizing the discipline of literary studies The book offers the first intensive examination of digital literary cartography a field whose recent and rapid development has yet to be coherently analysed This collection not only provides an authoritative account of the current state of the field but also informs a new generation of digital humanities scholars about the critical and creative potentials of digital literary mapping The book showcases the work of exemplary literary mapping projects and provides the reader with an overview of the tools techniques and methods those projects employ

**Routes and Roads in Anatolia from Prehistory to Seljuk Times** Lutgarde Vandeput, Stephen Mitchell, 2025-08-05 Turkey has always been a crossroads and therefore offers an ideal location to study interaction between individuals and human communities and societies through time Interaction has always necessarily involved movement which in turn did not occur randomly in the landscape but was instead focused on routes and roads that secured faster and easier connections There is substantial evidence that exchange networks already existed in Anatolia at least since the Neolithic period with goods traveling over long distances From the second millennium BC onwards textual evidence has improved understanding of traveling routes The Roman long distance road network has been a focus of research over decades but local roads and pathways around individual sites are still mostly unknown Byzantine roads have also received attention whereas the Seljuk road and routes system is less well known It is likely that the younger roads and routes are overlying older ones at least partially but these palimpsests of older roads are hardly researched In this volume experts from different disciplines using a variety of methods and approaches aim to transcend the present fragmentation of knowledge and create a new level of understanding of connecting road and route systems in Anatolia throughout time for the first time

**Literary Atlas** Jon Anderson, 2024-12-26 This book documents a new approach to literary geographies based around the Literary Atlas of Wales It introduces an innovative plotted approach which empowers reading creates connections to localities histories and communities and inspires interest in literature and geography It showcases how literary geographies can be mobilized through the plotted approach to reading Through documenting the Literary Atlas of Wales project this book outlines how the plotted approach was used to engage with English language novels set in Wales It argues that the future of this interdisciplinary subject area should be premised upon nurturing instability turbulence and experimentation in order to produce new insights which can change the way we understand the relations not only between literature and place but also

between other modern categories including academic disciplines This book will be of interest to all readers of literature human geography mapping heritage studies and tourism It will be beneficial to those interested in the domains of cartography creative humanities cultural sociology human geography literary studies and print cultures

**Time for mapping** Sybille Lammes,Chris Perkins,Alex Gekker,Sam Hind,Clancy Wilmott,Daniel Evans,2018-06-29 Maps take place in time as well as representing space The Google map on your smartphone appears to fix the world serving as a practical spatial tool but in practice is deployed in ways that draw attention to memories rhythm synchronicity sequence and duration This interdisciplinary collection focuses on how these temporal aspects of mapping might be understood at a time when mapping technologies have been profoundly changed by digital developments It contrasts different aspects of this temporality bringing together experts from critical cartography media studies and science and technology studies Together the chapters offer a unique interdisciplinary focus revealing the complex and social ways in which time is wrapped up with digital technologies and revealed in everyday mapping tasks from navigating across cities to serving as scientific groundings for news stories from managing smart cities to visual art practice It brings time back into the map An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence
