Dispositifs et notions de la spatialité japonaise Benoît Jacquet, Philippe Bonnin, Nishida Masatsugu, 2014-05-05. Au Japon la manière d'habiter de vivre l'espace et la nature même de ces espaces c'est dire la spatialité a longtemps surpris et fasciné le visiteur occidental. Aujourd'hui la spatialité japonaise se caractérise par une grande diversité de formes architecturales par le désordre apparent de ses métropoles autant que par la résilience de lieux et de pratiques traditionnels. Depuis l'Antiquité des dispositifs spatiaux des expressions puis plus récemment des notions théoriques et des discours architecturaux ont tenu en place pour définir cette culture de l'espace et les particularismes de cette spatialité. Du point de vue de l'architecte de l'historien du géographe de l'anthropologue ou du philosophe ce livre présente la spatialité japonaise selon les dispositifs et notions qui lui sont propres. En suivant le cours de l'histoire des mythes et croyances du folklore japonais depuis la géomancie des villes anciennes jusqu'à l'architecture et l'urbanisme contemporains ce livre fait apparaître la spatialité sous ses différentes formes de la manière de s'asseoir ou de l'aménagement des jardins du pavillon de thé de l'architecture religieuse et monumentale. L'ouvrage servira l'amateur d'architecture et de culture japonaise l'esthète et le bricoleur le savant comme le bachelier désireux de comprendre les mécanismes mis en œuvre dans la construction et la production de l'espace au Japon.

La Reconstruction en Europe Après la Première Et la Seconde Guerre Mondiale Et Le Rôle de la Conservation Des Monuments Historiques Luc Verpoest, 2011. Living with History focuses on a particular aspect of heritage preservation in the twentieth century: destruction and postwar reconstruction in Belgium France Germany Great Britain and The Netherlands. This book establishes a status quaestionis for the historiography of wartime and postwar preservation and sets these particular developments in preservation history in the context of the general evolution of architecture and urbanism. The

authors investigate the specific role of conservationists and heritage institutions and administrations in the overall reconstruction and examine the part played by architects and planners in heritage preservation *France* Jean-Louis Cohen, 2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In *France* Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France's colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture
