Uneven Growth Tactical Urbanisms For Expanding:

Uneven Growth Pedro Gadanho, 2014 In 2030 the world's population will be a staggering eight billion people. Of these two thirds will live in cities and most will be poor. With limited resources this uneven growth will be one of the greatest challenges faced by societies across the globe. Over the next years city authorities, urban planners and designers, economists and many others will have to join forces to avoid major social and economical catastrophes, working together to ensure these expanding megacities will remain habitable. To engage this international debate, The Museum of Modern Art presents *Uneven Growth: Tactical Urbanisms for Expanding Megacities*, its third iteration in the *Issues in Contemporary Architecture* series. Following the same model as the critically acclaimed *Rising Currents: Projects for New York's Waterfront and Foreclosed Rehousing the American Dream*, *Uneven Growth* brings together an international group of scholars, practitioners and experts of architecture and urbanism in a series of workshops, an exhibition and a publication to focus on how emergent forms of tactical urbanism can address the increasing inequality of urban development around the globe. Featuring proposals for six global metropolises: New York, Mumbai, Rio de Janeiro, Istanbul, Hong Kong and Lagos, each developed by a team pairing local practitioners with international researchers, *Uneven Growth* documents the brainstorming sessions and workshops. Interviews with each team and essays by leading scholars on the issue make the publication a rich resource for students and professionals alike and a catalyst for worldwide change.

The Social (Re)Production of Architecture Doina Petrescu, Kim Trogal, 2017-07-14 *The Social Re Production of Architecture* brings the debates of the right to the city into today's context of ecological, economic and social crises. Building on the 1970s discussions about the production of space, which French sociologist Henri Lefebvre considered a civic right, the authors question who has the right to make space and explore the kinds of relations that are produced in the process. In the emerging post-capitalist era, this book addresses urgent social and ecological imperatives for change and opens up questions around architecture's engagement with new forms of organization and practice. The book asks what new kinds of social can architecture re-produce and what kinds of politics, values and actions are needed. The book features 24 interdisciplinary essays written by leading theorists and practitioners, including social thinkers, economic theorists, architects, educators, urban curators, feminists, artists and activists from different generations and global contexts. The essays discuss the diverse global locations with work taking different and specific forms in these different contexts. A cutting edge critical text which rethinks both practice and theory in the light of recent crises, making it key reading for students, academics and practitioners.

Sandra Karina Löschke, 2019-07-30 This book captures concepts and projects that reshape the discipline of architecture by prioritizing people over buildings In doing so it uncovers sophisticated approaches that go beyond standard architectural protocols to explore experience based aesthetics encounters action based research critical practices and social engagement If these are widely understood as singular or incompatible approaches the book reveals that they form a growing network of interrelations and generate levels of flexibility and dynamism that are reshaping the discipline The thirteen chapters analyze thought provoking projects branded museums restaged exhibitions home work spaces multi cultural spaces ageing apartment blocks abandoned homes and urban slums amongst them Together they enliven the stalled debate about a single architectural response to the complex challenges of the contemporary world by highlighting pluralistic perspectives on architecture that offer fresh solutions on how architecture can improve people s lives Featuring essays from an international range of authors this book makes a vital contribution to our understanding of the wider conditions under which and in relation to which contemporary architecture is produced

Extreme Cities Ashley Dawson, 2017-10-17 A cutting exploration of how cities drive climate change while being on the frontlines of the coming climate crisis How will climate

change affect our lives Where will its impacts be most deeply felt Are we doing enough to protect ourselves from the coming chaos In *Extreme Cities* Ashley Dawson argues that cities are ground zero for climate change contributing the lion's share of carbon to the atmosphere while also lying on the frontlines of rising sea levels Today the majority of the world's megacities are located in coastal zones yet few of them are adequately prepared for the floods that will increasingly menace their shores Instead most continue to develop luxury waterfront condos for the elite and industrial facilities for corporations These not only intensify carbon emissions but also place coastal residents at greater risk when water levels rise In *Extreme Cities* Dawson offers an alarming portrait of the future of our cities describing the efforts of Staten Island New York and Shishmareff Alaska residents to relocate Holland's models for defending against the seas and the development of New York City before and after Hurricane Sandy Our best hope lies not with fortified sea walls he argues Rather it lies with urban movements already fighting to remake our cities in a more just and equitable way As much a harrowing study as a call to arms *Extreme Cities* is a necessary read for anyone concerned with the threat of global warming and of the cities of the world

Re-living the City Gideon Fink Shapiro, 2020-02-08 This richly illustrated book presents the exhibits and curatorial visions of the 2015 Shenzhen Biennale of Architecture and Urbanism UABB organized around the theme *Re Living the City* It highlights the contributions of dozens of international architects designers and artists and offers 12 probing original essays The projects and essays of UABB 2015 *Re Living the City* criticize the status quo of architecture and urbanism but they also resist the false dream of designing a perfect city from scratch Instead they portray the city as the incremental product of its inhabitants and designers who provisionally make and remake its fabric through various means at their disposal Urbanization in the world's fastest growing regions today has a dual character officially sanctioned large scale development shadowed by unregulated or informal spaces built by disenfranchised migrants UABB 2015 operates between these poles seeking alternative paradigms to generate a more sustainable equitable and imaginative urbanity The principal exhibitions of UABB 2015 include 1 *Radical Urbanism* curated by Alfredo Brillembourg and Hubert Klumpner *Urban Think Tank* based on the proposition that the city today is more radical than the architects and planners operating within it 2 *Collage City 3D* curated by Aaron Betsky in which artists and architects are asked to create adjacent three dimensional installations to explore the idea of habitable collage as a mode of urban design and 3 *PRD 2.0* curated by Doreen Heng Liu focusing on the need for a more balanced approach to urbanism and architecture in the Pearl River Delta region in southeast China Liu also offers an account of the renovation of the Shenzhen exhibition venue the former Dacheng Flour Factory complex In addition the book presents the *Social City* online platform and exhibition curated by Renny Ramakers the *Maker* showcase of contemporary craft and a series of national regional and thematic pavilions Curatorial essays are complemented by guest essays from international critics researchers and practitioners
