Universal Artificial Intelligence Marcus Hutter, 2005-12-29 Personal motivation The dream of creating artificial devices that reach or outperform human intelligence is an old one It is also one of the dreams of my youth which have never left me What makes this challenge so interesting A solution would have enormous implications on our society and there are reasons to believe that the AI problem can be solved in my expected lifetime So it's worth sticking to it for a lifetime even if it takes 30 years or so to reap the benefits The AI problem The science of artificial intelligence AI may be defined as the construction of intelligent systems and their analysis A natural definition of a system is anything that has an input and an output stream Intelligence is more complicated It can have many faces like creativity solving problems pattern recognition classification learning induction deduction building analogies optimization surviving in an environment language processing and knowledge A formal definition incorporating every aspect of intelligence however seems difficult Most if not all known facets of intelligence can be formulated as goal driven or more precisely as maximizing some utility function It is therefore sufficient to study goal driven AI e.g. the biological goal of animals and humans is to survive and spread The goal of AI systems should be to be useful to humans

Algorithmic Probability and Friends. Bayesian Prediction and Artificial Intelligence David L. Dowe, 2013-10-22

Algorithmic probability and friends Proceedings of the Ray Solomonoff 85th memorial conference is a collection of original work and surveys The Solomonoff 85th memorial conference was held at Monash University's Clayton campus in Melbourne Australia as a tribute to pioneer Ray Solomonoff 1926-2009 honouring his various pioneering works most particularly his revolutionary insight in the early 1960s that the universality of Universal Turing Machines (UTMs) could be used for universal Bayesian prediction and artificial intelligence machine learning This work continues to increasingly influence and underpin statistics econometrics machine learning data mining inductive inference search algorithms data compression theories of general intelligence and philosophy of science and applications of these areas Ray not only envisioned this as the path to genuine artificial intelligence but also still in the 1960s anticipated stages of progress in machine intelligence which would ultimately lead to machines surpassing human intelligence Ray warned of the need to anticipate and discuss the potential consequences and dangers sooner rather than later Possibly foremostly Ray Solomonoff was a fine happy frugal and adventurous human being of gentle resolve who managed to fund himself while electing to conduct so much of his paradigm changing research outside of the university system The volume contains 35 papers pertaining to the abovementioned topics in tribute to Ray Solomonoff and his legacy

An Introduction to Universal Artificial Intelligence Marcus Hutter, David Quarel, Elliot Catt, 2024-05-28 An Introduction to Universal Artificial Intelligence provides the formal underpinning of what it means for an agent to act intelligently in an unknown environment First presented in Universal Algorithmic Intelligence Hutter 2000 UAI offers a framework in which virtually all AI problems can be formulated and a theory of how to solve them UAI unifies ideas from sequential decision theory Bayesian inference and algorithmic information theory to construct AIXI an optimal reinforcement learning agent that learns to act optimally in unknown environments AIXI is the theoretical gold standard for intelligent behavior The book covers both the theoretical and practical aspects of UAI Bayesian updating can be done efficiently with context tree weighting and planning can be approximated by sampling with Monte Carlo tree search It provides algorithms for the reader to implement and experimental results to compare against These algorithms are used to approximate AIXI The book ends with a philosophical discussion of Artificial General Intelligence Can super intelligent agents even be constructed Is it inevitable that they will be constructed and what are the potential consequences This text is suitable for late undergraduate students It provides an extensive chapter to fill in the required mathematics probability

Michael Dunn,Amos Golan,Aman Ullah,2020-11-06 Info metrics is a framework for modeling reasoning and drawing inferences under conditions of noisy and insufficient information It is an interdisciplinary framework situated at the intersection of information theory statistical inference and decision making under uncertainty In Advances in Info Metrics Min Chen J Michael Dunn Amos Golan and Aman Ullah bring together a group of thirty experts to expand the study of info metrics across the sciences and demonstrate how to solve problems using this interdisciplinary framework Building on the theoretical underpinnings of info metrics the volume sheds new light on statistical inference information and general problem solving The book explores the basis of information theoretic inference and its mathematical and philosophical foundations It emphasizes the interrelationship between information and inference and includes explanations of model building theory creation estimation prediction and decision making Each of the nineteen chapters provides the necessary tools for using the info metrics framework to solve a problem The collection covers recent developments in the field as well as many new cross disciplinary case studies and examples Designed to be accessible for researchers graduate students and practitioners across disciplines this book provides a clear hands on experience for readers interested in solving problems when presented with incomplete and imperfect information **Risks of Artificial**

Intelligence Vincent C. Müller,2016-01-05 Featuring contributions from leading experts and thinkers in the theory of artificial intelligence AI this is one of the first books dedicated to examining the risks of AI The book evaluates predictions of the future of AI proposes ways to ensure that AI systems will be beneficial to humans and then critically evaluates such proposals The book covers the latest AI research including the risks and future impacts Ethical issues in AI are covered extensively along with an exploration of autonomous technology and its impact on humanity Agricultural Internet of Things and Decision Support for Precision Smart Farming Annamaria Castrignano,Gabriele Buttafuoco,Raj Khosla,Abdul Mouazen,Dimitrios Moshou,Olivier Naud,2020-01-09 Agricultural Internet of Things and Decision Support for Smart Farming reveals how a set of key enabling technologies KET related to agronomic management remote and proximal sensing data mining decision making and automation can be efficiently integrated in one system Chapters cover how KETs enable real time monitoring of soil conditions determine real time site specific requirements of crop systems help develop a decision support system DSS aimed at maximizing the efficient use of resources and provide planning for agronomic inputs differentiated in time and space This book is ideal for researchers academics post graduate students and practitioners who want to embrace new agricultural technologies Presents the science behind smart technologies for agricultural management Reveals the power of data science and how to extract meaningful insights from big data on what is most suitable based on individual time and space Proves how advanced technologies used in agriculture practices can become site specific locally adaptive operationally feasible and economically affordable A Level of Martin-Lof Randomness Bradley S.

Tice,2012-10-09 This work addresses the notion of compression ratios greater than what has been known for random sequential strings in binary and larger radix based systems as applied to those traditionally found in Kolmogorov complexity. A culmination of the author's decade long research that began with his discovery of a compressible random sequential string.
