Equally in God's Image Julia Bolton Holloway, Constance S. Wright, Joan Bechtold, 1990 *Equally in God's Image* Women in the Middle Ages is a volume of essays presenting the argument that with the coming of the universities women were excluded in an apartheid of gender from education and power It discusses the resulting paradigm shift from Romanesque to Gothic describing the images which women had of themselves and which the dominant male society had of them We meet in the pages of this book medieval women in their roles as writers pilgrims wives anchoresses and nuns at court on pilgrimage in households and convents The volume as a Distant Mirror for ourselves today seeks to present ways in which women then fulfilled the roles society expected of them and the ways in which they also subverted through entering into textuality the expectations of the dominating culture in order to quest identity and equality

[A Cultural History of Women in the Middle Ages](#) Kim M. Phillips, 2015-04-02 The medieval era has been described as the Age of Chivalry and the Age of Faith but also as the Dark Ages Medieval women have often been viewed as subject to a punishing misogyny which limited their legal rights and economic activities but some scholars have claimed they enjoyed a rough and ready equality with men The contrasting figures of Eve and the Virgin Mary loom over historians interpretations of the period 1000 1500 Yet a wealth of recent historiography goes behind these conventional motifs showing how medieval women's lives were shaped by status age life stage geography and religion as well as by gender *A Cultural History of Women in the Middle Ages* presents essays on medieval women's life cycle bodies and sexuality religion and popular beliefs medicine and disease public and private realms education and work power and artistic representation to illustrate the diversity of medieval women's lives and constructions

Women in Early Medieval Europe, 400-1100 Lisa M. Bitel, 2002-10-24 This is a history of the early European middle ages through the eyes of women combining the rich literature of women's history with original research in the context of mainstream history and traditional chronology The book begins at the end of the Roman empire and ends with the start of the long eleventh century when women and men set out to test the old frontiers of Europe The book recreates the lives of ordinary women but also tells personal stories of individuals Each chapter also questions an assumption of medieval historiography and uses the few documents produced by women themselves along with archaeological evidence art and the written records of medieval men to tell of women their experiences and ideas and their relations with men It covers the continent and its exotic edges such as Iceland Ireland and Iberia looking at women Christian and non Christian alike

Gendering the Master Narrative Mary C. Erler, Maryanne Kowaleski, 2018-08-06 Gendering the Master Narrative asks whether a female tradition of power might have existed distinct from the male one and how such a tradition might have been transmitted It describes women's progress toward power as a push pull movement showing how practices and institutions that ostensibly enabled women in the Middle Ages could sometimes erode their authority as well This book provides a much needed theoretical and historical reassessment of medieval women's power It updates the conclusions from the editors' essential volume on that topic *Women and Power in the Middle Ages* which was published in 1988 and altered the prevailing view of female subservience by correcting the nearly ubiquitous equation of power with public authority Most scholars now accept a broader definition of power based on the interactions between men and women In their Introduction Mary C Erler and Maryanne Kowaleski survey the directions in which the study of medieval women's agency has developed in the past fifteen years Like its predecessor this volume is richly interdisciplinary It contains essays by highly regarded scholars of history literature and art history and features seventeen black and white illustrations and two maps

Medieval Women and Their Objects Jennifer Adams, Nancy Bradbury, 2016-11-29 The essays gathered in this volume present multifaceted considerations of the intersection of objects and gender within the cultural contexts of late medieval France and England Some take a material view of objects showing buildings books and pictures as sites of gender negotiation and resistance and as extensions of women's bodies Others reconsider the concept of objectification in the lives of fictional and historical medieval women by looking closely at their relation to gendered material objects taken literally as women's possessions and as figurative manifestations of their desires The opening section looks at how medieval authors imagined fictional and legendary women using particular objects in ways that reinforce or challenge gender roles These

women bring objects into the orbit of gender identity employing and relating to them in a literal sense while also taking advantage of their symbolic meanings The second section focuses on the use of texts both as objects in their own right and as mechanisms by which other objects are defined The possessors of objects in these essays lived in the world their lives documented by historical records yet like their fictional and legendary counterparts they too used objects for instrumental ends and with symbolic resonances The final section considers the objectification of medieval women's bodies as well as its limits While this at times seems to allow for a trade in women authorial attempts to give definitive shapes and boundaries to women's bodies either complicate the gender boundaries they try to contain or reduce gender to an ideological abstraction This volume contributes to the ongoing effort to calibrate female agency in the late Middle Ages honoring the groundbreaking work of Carolyn P Collette *The Early Middle Ages* Franca Ela Consolino, Judith Herrin, 2020-07-08

Examine the creative profound dialogue between medieval women and biblical traditions The latest volume in the Bible and Women series examines the relationship between women and the Bible's reception during the early Middle Ages 500 1100 CE in both the Greek East and the Latin West Essays focus on interactions between women and the Bible through biblical precepts on women and for women biblical women as the subjects of action or objects of discussion and writings by women that refer to the Bible as a moral authority The women discussed in the volume range from the well known including the nuns Kassia in Byzantium and Hrosvita in the West the aristocrat Dhuoda author of a moral guide for her son Gisela the sister of Charlemagne and abbess of Chelles and her niece Rotrude to those who remain anonymous Contributions also explore how the Old and New Testaments exercised influence on emerging Islam Features Analysis of images of the Virgin Mary as a means of tracing the spread of her cult and feast days from East to West Exploration of the significance of classical culture for medieval women who composed poems for a Christian audience Evaluation of art as a means of establishing devotional relationships not necessarily mediated by the voices of preachers or the reading of texts **Women in the Middle Ages** Sibylle Harksen, 1975

Same Bodies, Different Women Christopher Mielke, Andrea-Bianka Znorovszky, 2019-12-31 This volume is a collection of essays focusing on marginalized women mostly in Central and Eastern Europe from around 1350 to 1650 Other women are discussed in three different categories women whose religious practices put them on the social margins common women who are in society but not of society because they are in the sex trade and women whose occupations were reason enough to shunt them In order to fill a gap in gender history for countries east of the Rhine River the studies included present how official city funded brothels in medieval Austria worked how a princess disability affected her life as Byzantine empress how one unmarried Transylvanian woman who got pregnant dealt with being the center of a court case and how enslaved women in medieval Hungary were treated as sexual property The hope with this volume is that it will show the many interdisciplinary ways that women on the margins can be studied in this region and to diminish the taboo of discussing this topic to begin with
