Handbook of Research on Integrating Social Media into Strategic Marketing Hajli, Nick,2015-04-30 To survive in today s competitive business environment marketing professionals must look to develop innovative methods of reaching their customers and stakeholders Web 2 0 provides a useful tool in developing the relationships between business and consumer The Handbook of Research on Integrating Social Media into Strategic Marketing explores the use of social networking and other online media in marketing communications including both best practices and common pitfalls to provide comprehensive coverage of the topic This book is intended for marketing professionals business managers and anyone interested in how social media fits into today s marketing environments *Computational Network Science* Henry Hexmoor,2014-09-23 The emerging field of network science represents a new style of research that can unify such traditionally diverse fields as sociology economics physics biology and computer science It is a powerful tool in analyzing both natural and man made systems using the relationships between players within these networks and between the networks themselves to gain insight into the nature of each field Until now studies in network science have been focused on particular relationships that require varied and sometimes incompatible datasets which has kept it from being a truly

universal discipline Computational Network Science seeks to unify the methods used to analyze these diverse fields This book provides an introduction to the field of Network Science and provides the groundwork for a computational algorithm based approach to network and system analysis in a new and important way This new approach would remove the need for tedious human based analysis of different datasets and help researchers spend more time on the qualitative aspects of network science research Demystifies media hype regarding Network Science and serves as a fast paced introduction to state of the art concepts and systems related to network science Comprehensive coverage of Network Science algorithms methodologies and common problems Includes references to formative and updated developments in the field Coverage spans mathematical sociology economics political science and biological networks *Curating Access* Amanda Cachia, 2022-09-14 This book is

an interdisciplinary collection of twenty four essays which critically examine contemporary exhibitions and artistic practices that focus on conceptual and creative aspects of access Oftentimes exhibitions tack on access once the artwork has already been executed and ready to be installed in the museum or gallery But what if the artists were to ponder access as an integral and critical part of their artwork Can access be creative and experimental And furthermore can the curator also fold access into their practice while working collaboratively with artists considering it as a theoretical and practical generative force that seeks to make an exhibition more engaging for a wider diversity of audiences This volume includes essays by a growing number of artists curators and scholars who ponder these ideas of ad hoc experimental and underground approaches within exhibition making and artistic practices It considers how through these nascent exhibition models and art practices enhanced experiences of access in the museum can be a shared responsibility amongst museum workers curators and artists in tandem with the public so that access becomes a zone of intellectual and creative accommodation rather than strictly a discourse on policy The book provides innovative case studies which provide a template for how access might be implemented by individuals artists curators museum administrators and educators given the growing need to offer as many modalities of access as possible within cultural institutions This book shows that anyone can be a curator of access and demonstrates how to approach access in a way that goes beyond protocol and policy It will thus be of interest to students and scholars engaged in the study of museums art history and visual culture disability culture and communication **ePub - European**
