Library of Congress Magazine ,2014-11 **Tempest** Liz Skilton,2019-06-01 Liz Skilton s innovative study tracks the naming of hurricanes over six decades exploring the interplay between naming practice and wider American culture In 1953 the U S Weather Bureau adopted female names to identify hurricanes and other tropical storms Within two years that convention came into question and by 1978 a new system was introduced including alternating male and female names in a pattern that continues today In *Tempest Hurricane Naming and American Culture* Skilton blends gender studies with environmental history to analyze this often controversial tradition Focusing on the Gulf South the nation s hurricane coast Skilton closely examines select storms including Betsy Camille Andrew Katrina and Harvey while referencing dozens of others Through print and online media sources government reports scientific data and ephemera she reveals how language and images portray hurricanes as gendered objects masculine named storms are generally characterized as stronger and more serious while feminine named storms are described as unladylike and in need of taming Further Skilton shows how the hypersexualized rhetoric surrounding Katrina and Sandy and the effeminate depictions of Georges represent evolving methods to define and explain extreme weather events As she chronicles the evolution of gendered storm naming in the United States Skilton delves into many other aspects of hurricane history She describes attempts at scientific control of storms through hurricane seeding during the Cold War arms race of the 1950s and relates how Roxcy Bolton a member of the National Organization for Women led the crusade against feminizing hurricanes from her home in Miami near the National Hurricane Center in the 1970s Skilton also discusses the skyrocketing interest in extreme weather events that accompanied the introduction of 24 hour news coverage of storms as well as the impact of social media networks on Americans tracking and understanding of hurricanes and other disasters The debate over hurricane naming continues as Skilton demonstrates and many Americans question the merit and purpose of the gendered naming system What is clear is that hurricane names matter and that they fundamentally shape our impressions of storms for good and bad **Library of Congress Magazine** ,2014 **Everyday Life in the Balkans** David W. Montgomery,2018-11-26 *Everyday Life in the Balkans* gathers the work of leading scholars across disciplines to provide a broad overview of the countries of Albania Bosnia and Herzegovina Bulgaria Croatia Greece Kosovo Macedonia Romania Serbia and Turkey This region has long been characterized as a place of instability and political turmoil from World War I through the Yugoslav Wars and even today as debate continues over issues such as the influx of refugees or the expansion of the European Union However the work gathered here moves beyond the images of war and post socialist stagnation which dominate Western media coverage of the region to instead focus on the lived experiences of the people in these countries Contributors consider a wide range of issues including family dynamics gay rights war memory religion cinema fashion and politics Using clear language and engaging examples *Everyday Life in the Balkans* provides the background context necessary for an enlightened conversation about the

S. B. Keats-Rohan,Neil Christie,David Roffe,2015 Medieval castles are as Professor Liddiard states in his Foreword to this volume evocative monuments and perhaps more than any other building capture the ideals of the Middle Ages This idealization and romanticism of castles however can often obscure their histories as functioning dwellings fortresses and political and social centres Wallingford Castle in Oxfordshire is a prime example of a structure with a rich history Its importance lies in its strategic position on the Thames allowing it to serve as a vital stronghold during conflicts and a royal

residence in more peaceful times This volume is a product of the Wallingford Burh to Borough Research Project 2008 2010 a collaborative project between the Universities of Leicester Exeter and Oxford It contains reports of excavations undertaken at the castle and its town excavated between the 1960s and today The results of the archaeological investigations are contextualized using contemporary documents and accounts of the castle such as surveys and rent agreements Combining the text and material evidence the contributions to this volume provide a detailed narrative of the history of the site from its construction to its destruction as well as helpful contextual sections on English history and medieval castles Also included are sections on excavations at the castle at the nearby town of Oxford and the priory at Wallingford The text is accompanied by colour photographs drawings plans maps and transcripts of the Medieval and Tudor documents This volume accompanies The Origins of the Borough of Wallingford Archaeological and historical perspectives edited by K S B Keats Rohan and D R Roffe in 2009 BAR 494 and Transforming Townscapes From burh to borough the archaeology of Wallingford AD 800 1400 edited by N Christie and O H Creighton in 2013 published by the Society for Medieval Archaeology
