BOOK JACKET Work and Its Discontents Daniel Bell, 1970 *Stirring of Soul in the Workplace* Alan Briskin, 1998-12-28

This deeply lyrical book offers perspective for those struggling to hear the quiet voice of the soul over the din of the contemporary workplace Alan Briskin shows how the modern organization has gradually increased its demands on us beginning with our bodies then our minds and now our souls But through the moving personal stories of people fighting to reclaim their souls he also sends a message that encourages individuals to keep their spiritual integrity and values alive In *The Stirring of Soul In the Workplace* Briskin weaves together lessons from history psychology and management theory with numerous real life examples to tell the story of how the modern workplace has evolved to value technology and productivity over soulfulness and relationship From the Industrial Revolution's marriage of mechanization and efficiency to the management theories of the early 20th century Briskin traces the emergence of the quest for efficiency and control in the workplace He questions the corporate concept of individual personality that asks us to check our emotions fantasies imaginations and souls at the door He describes the history of the soul as a dynamic force that continues to influence our behavior and shows how excluding it from our work life actually flattens our potential and dampens our creativity Rather than solve the conventional question organizations have been asking for years how can we change people Alan Briskin examines how organizations can better reflect personal and human values in the workplace For organizations that too often have sacrificed the well being of the individual for the goals of the organization the author suggests a more active way of taking up our work roles that can bring more of our experience and imagination into play He points out that meaning cannot come from corporate mission statements or reengineering programs Instead it needs to be nurtured through dialogue and reflection the courage to ask troubling questions and a willingness to face the consequences of our collective and individual actions When we learn to honor the contradictions uncertainties and interconnections inherent in the workplace the energies of the soul will begin to stir with revitalizing results

creative and stay creative Drawing on interviews with many key writers such as Sam Bain Paul Doolan Graham Linehan David Mitchell Simon Nye and Sue Teddern producers including Ash Atalla Lisa Clark Michelle Farr Ali McPhail Jon Plowman and Adam Tandy and commissioners the BBC s Shane Allen Channel 4 s Nerys Evans and Sky s Lucy Lumsden Creativity in the British Television Comedy Industry explores the creative processes that lead to successful programme making With detailed discussion of the processes by which series such as People Just Do Nothing and After Hours came to our screens this book examines how members of the comedy industry maintain careers manage failure develop their craft and stay creative Creativity in the British Television Comedy Industry is essential reading for students and researchers with an interest in comedy studies television production and the creative media industries Social Change and Politics Morris Janowitz,2017-07-05 This classic study deals with social control in advanced industrial society especially the United States and particularly the half century after World War I The United States is representative of Western advanced industrial nations that have been faced with marked strain in their political institutions These nation states have been experiencing a decline in popular confidence and distrust of the political process an absence of decisive legislative majorities and an increased inability to govern effectively that is to balance and to contain competing interest group demands and resolve political conflicts Janowitz uses the sociological idea of social control to explore the sources of these political dilemmas Social control does not imply coercion or the repression of the individual by societal institutions Social control is rather the face of coercive control It refers to the capacity of a social group including a whole society to regulate itself Self regulation implies a set of higher moral principles beyond those of self interest Since the end of World War II the expanded scope of empirical research has profoundly transformed the sociological discipline The repeated efforts to achieve a theoretical reformulation have left a positive residue but there have been no new conceptual breakthroughs that are compelling This book is a concerted and detailed effort organize and to make sense out of the vastly increased body of empirical research *Between God and Gold* Robert A. Wauzzinski,1993 The heart of Between God and Gold can be located in the survey of three representative nineteenth century Evangelical figures evangelist Charles Finney scholar Francis Wayland and philanthropist clergyman Russell Conwell The lives and thought of these notables are unfolded concretely thereby showing how the Evangelical Industrial synthesis occurred Wauzzinski concludes the book by suggesting theological and economic alternatives hoping to show in these examples that a third way between capitalism and socialism can be found These possibilities are drawn from theoretical and practical sources and thus provide opportunities for greater social revitalization An interdisciplinary methodology is employed throughout this work The author works from the assumption that various fields of study while analytically separated do manifest a fundamental coherence *The Invention of Prehistory* Stefanos Geroulanos,2024-04-02 A incisive and captivating reassessment of prehistory In lucid prose Geroulanos unspools an enthralling and detailed history of the development of modern natural science It s a must read Publishers Weekly starred

review An astute powerfully rendered history of humanity Kirkus Reviews starred review An eminent historian tells the story of how we came to obsess over the origins of humanity and how for three centuries ideas of prehistory have been used to justify devastating violence against others Books about the origins of humanity dominate bestseller lists while national newspapers present breathless accounts of new archaeological findings and speculate about what those findings tell us about our earliest ancestors We are obsessed with prehistory and in this respect our current era is no different from any other in the last three hundred years In this coruscating work acclaimed historian Stefanos Geroulanos demonstrates how claims about the earliest humans not only shaped Western intellectual culture but gave rise to our modern world The very idea that there was a human past before recorded history only emerged with the Enlightenment when European thinkers began to reject faith based notions of humanity and history in favor of supposedly more empirical ideas about the world From the state of nature and Romantic notions of virtuous German barbarians to theories about Neanderthals killer apes and a matriarchal paradise where women ruled Geroulanos captures the sheer variety and strangeness of the ideas that animated many of the major thinkers of the eighteenth and nineteenth centuries including Jean Jacques Rousseau Charles Darwin and Karl Marx Yet as Geroulanos shows such ideas became for the most part the ideological foundations of repressive regimes and globe spanning empires Deeming other peoples savages allowed for guilt free violence against them notions of killer apes who were our evolutionary predecessors made war seem natural The emergence of modern science only accelerated the West s imperialism The Nazi obsession with race was rooted in archaeological claims about prehistoric IndoGermans the idea that colonized peoples could be bombed back to the Stone Age was made possible by the technology of flight and the anthropological idea that civilization advanced in stages As Geroulanos argues accounts of prehistory tell us more about the moment when they are proposed than about the deep past and if we hope to start improving our future we would be better off setting aside the search for how it all started A necessary timely indelible account of how the quest for understanding the origins of humanity became the handmaiden of war and empire The Invention of Prehistory will forever change how we think about the deep past

Purpose and a Paycheck Chris Farrell, 2019-02-05 Purpose and a Paycheck tells the compelling story of how a growing movement of older entrepreneurs and part time workers are creating a stronger and more vibrant economy People 65 and older will account for 20 percent of the population in 2030 up from 13 percent in 2000 Many prognosticators blame the aging population for the stagnating economy citing that as more people retire they will stop working as relatively fewer working people have to support growing numbers of dependent elderly Purpose and a Paycheck debunks this line of thought by showing how a growing movement of elderly entrepreneurs and part time workers are creating conditions for a stronger economy Growing numbers of Americans are no longer retiring in the traditional sense and the numbers are striking such as the labor force participation rate of men 60 years and over has risen nearly one third from a low of 26 percent in 1996 to 35 percent in 2014 the comparable rate for women is from 15 percent to 25 percent and 25 5 percent of new

business ventures in 2016 were started by the 55 to 64 year old age group up from 14.8 percent in 1996. America's aging society and workforce is redefining work for all generations and is a strong force in shaping the U.S. economy and society alongside globalization, automation, and climate change. Reframing aging will result in faster rates of economic growth and higher living standards for all of us in addition to a more fulfilling and financially secure second half of life for our aging population.

Race Rebels Robin D. G. Kelley, 1996-06-01 From notable historian and author of *Freedom Dreams: the untold history of the Black working class resistances throughout the 20th century*. Many Black strategies of daily resistance have been obscured until now. *Race Rebels* argues Kelley have created strategies of resistance movements and entire subcultures. Here for the first time everyday race rebels are given the historiographical attention they deserve from the Jim Crow era to the present.

Unretirement Chris Farrell, 2014-09-02 The budget battles of recent years have amplified the warnings of demographic doomsayers who predicted that a wave of baby boomers would bleed America dry bankrupting Social Security and Medicare as they faded into an impoverished old age. On the contrary argues award winning journalist Chris Farrell we are instead on the verge of a broad positive transformation of our economy and society. The old idea of retirement a word that means withdrawal describing a time when people gave up productive employment and shrank their activities was a short lived historical anomaly. Humans have always found meaning and motivation in work and community Farrell notes and the boomer generation poised to live longer in better health than any before is already discovering unretirement extending their working lives with new careers entrepreneurial ventures and volunteer service. Their experience wisdom and importantly their continued earnings will enrich the American workplace treasury and our whole society in the decades to come. Unretirement not only explains this seismic change now in its early stages it provides key insights and practical advice for boomers about to navigate this exciting but unsettled new frontier drawing on Chris Farrell's decades of covering personal finance and economics for Bloomberg Businessweek and Marketplace Money. This will be an indispensable guide to the landscape of unretirement from one of America's most trusted experts.

Sociology and Management Education Manish Thakur, 2021-10-31 While examining the intersections and engagements between sociology and management education in historical and contemporary terms this slim volume outlines the agenda of a promising prospective engagement between the two. It specifically foregrounds the Indian experience without being indifferent to the global context that has shaped the unprecedented rise of business schools. Employing a perspective from the Global South it contextualises the dominance of the US model of management curriculum and disciplinary practices in relation to wider geopolitics of knowledge production. Parenthetically it presents a critical assessment of Indian scholarly contributions to the field of management studies. This book should be of interest to management educators administrators and sociologists besides the students and researchers in the broad area of organisation studies.
