include the event management team many paid staff hundreds of volunteers and multiple contractors such as food vendors and cleaning teams Everyone working on the site comes into the scope of the event workforce Little time is available for training and motivation plays a key role in retention and customer service Decision making occurs on the run and the event is over before anyone can think about performance appraisal The environment is further characterised by a fast pace high stress levels and many workers are fatigued by the bump in period before the event audience pours through the gates to add yet another level of pressure These features of the human resources environment are quite different to those of the traditional workforce Human Resource Management for Events is vital reading for both students and practitioners involved in this crucially important aspect of event management

Mergent Transportation Manual ,2002 *Dynamics of Fluid and Structural Interactions* Jannette Behrndtz Frandsen,2012-05-15 The book s aim is to integrate the topics of fluid and structural dynamics a developing field in research and academia The purpose of this integration is to identify the causes of structural vibration problems which can be experienced on large engineering structures such as buildings bridges or oil installations and to prevent them at the design stage There are currently no books of this type offered to the primary target group structural engineers There are textbooks on wind loading structural dynamics ocean engineering presented as separate topics but very little material in the literature which attempts to integrate fluid structural dynamics Integration of accurate description of fluid loading and the structural response can provide important knowledge to structural engineers in their analysis and design of structures The book will therefore be of interest to engineers in all areas who have an interest in fluids structures and general vibration problems The book will contribute to the next generation of tools for improving the performance of large structures in coastal areas in the ocean and other areas where large structures will be built It will prepare the new generation of engineers for thorough plans of mitigation strategies in early phases of the analysis and design of structures thus potentially saving human lives during natural hazard events Integrates the study of fluid and structural dynamics Explains and assesses damping techniques Many worked examples and solutions
