Revolutions in Modern German History Andrew G. Bonnell, 2025-05-29 Andrew G Bonnell s innovative survey examines the history of revolution in modern Germany by focusing on key revolutionary developments in the German states There is coverage of Germany and the French Revolution the 1848 revolutions the Industrial Revolution the 1918 19 revolution the Nazi revolution of 1933 the revolution from above in Eastern Germany 1945 49 and the revolution in East Germany in 1989 90 Revolutions in Modern German History sheds new light on the subject by stressing the continuity of conflicts between revolution and counter revolution in German history thereby restoring a sense of the dramatic social conflicts that punctuated the history of the country It also reveals the significance of wider European and transnational developments of revolutionary and counter revolutionary movements and events Bonnell even reconstructs a sense of the participants changing horizon of expectations during these events by looking in depth at the lives of men and women who lived and experienced these tumultuous times

Debates on the German Revolution of 1918-19 Matthew Stibbe, 2023-05-23 In November 1918 a revolution overthrew the old imperial system in Germany and inaugurated a republic The revolution was formally completed in August 1919 when the social democrat Friedrich Ebert was sworn in as president By this time however many of the revolution s original aims and intentions had been swallowed up by new political concerns and lived experiences For contemporaries the meaning of 9 November changed becoming increasingly contested between rival parties military experts and scholars This book examines how the debate on the revolution has evolved from August 1919 to the present day It takes the reader through the ideological battles of the 1920s and 30s into the equally politicised historical writing of the cold war period It ends with a consideration of the marginalisation of the revolution in academic research since the 1980s and its revival from 2010

A Political Biography of Arkadij Maslow, 1891-1941 Mario Kessler, 2020-04-30 This book is a political biography of Arkadij Maksimovich Maslow 1891 1941 a German Communist politician and later a dissident and opponent to Stalin Together with his political and common law marriage partner Ruth Fischer Maslow briefly led the Communist Party of Germany the KPD and brought about its submission to

Moscow Afterwards Fischer and Maslow were removed from the KPD leadership in the fall of 1925 and expelled from the party a year later Henceforth they both lived as communist outsiders persecuted by both Hitler and Stalin Maslow escaped to Cuba via France and Portugal and was murdered under dubious circumstances in Havana in November 1941 He died as a communist dissident committed to the cause of a radical socialist labor movement that lay in ruins Kessler considers Maslow's role in pivotal events such as the Bolshevik Revolution in Soviet revolutionary parties and organizations through to the rise of Stalinism and Cold War anti communism What results is a deep dive into the life of a key yet understudied figure in dissident communism The International Trade Union Movement, 1921 Organizing Insurgency Immanuel

Ness, 2021-04-20 A breath of fresh air Norman Finklestein Workers in the Global South are doomed through economic imperialism to carry the burden of the entire world While these workers appear isolated from the Global North they are in fact deeply integrated into global commodity chains and essential to the maintenance of global capitalism Looking at contemporary case studies in India the Philippines and South Africa this book affirms the significance of political and economic representation to the struggles of workers against deepening levels of poverty and inequality that oppress the majority of people on the planet Immanuel Ness shows that workers are eager to mobilise to improve their conditions and can achieve lasting gains if they have sustenance and support from political organisations From the Dickensian industrial zones of Delhi to the agrarian oligarchy on the island of Mindanao a common element remains when workers organise they move closer to the realisation of socialism solidarity and equality **Claiming the City** Shelton Stromquist, 2023-02-14

Winner of the International Labor History Association ILHA 2023 Book of the Year Award for labor history For more than a century municipal socialism has fired the imaginations of workers fighting to make cities livable and democratic At every turn propertied elites challenged their right to govern Prominent US labor historian Shelton Stromquist offers the first global account of the origins of this new trans local socialist politics He explains how and why cities after 1890 became crucibles for municipal socialism Drawing on the colorful stories of local activists and their social democratic movements in cities as diverse as Broken Hill Christchurch Malm Bradford Stuttgart Vienna and Hamilton OH the book shows how this new urban politics arose Long governed by propertied elites cities in the nineteenth century were transformed by mass migration and industrialization that tore apart their physical and social fabric Amidst massive strikes and faced with epidemic disease fouled streets unsafe water decrepit housing and with little economic security and few public amenities urban workers invented a local politics that promised to democratize cities they might themselves govern and reclaim the wealth they created This new politics challenged the class power of urban elites as well as the centralizing tendencies of national social democratic movements Municipal socialist ideas have continued to inspire activists in their fight for the right of cities to govern themselves *A History of Political Theories* Charles Edward Merriam, Harry Elmer Barnes, 1924 **Where was**

the Working Class? Linda Fuller, 1999 In six months bridging 1989 and 1990 the German Democratic Republic underwent a

transformation that took the world almost completely by surprise Yet unlike the revolution in Poland a decade earlier only a small percentage of workers played apolitically active role in the fall of socialism in Germany In this unprecedented study Linda Fuller sets out to explain why the working class was largely missing from the 1989 90 revolution Drawing on pre and post revolutionary visits to East German work sites and dozens of interviews Fuller documents workers day to day experience of the labor process workplace union politics and class She shows how all three factors led most workers to withdraw from politics even while prompting a handful to become actively involved in the struggle

Building Power to Change the World James Muldoon, 2020-11-18 The German council movements arose through mass strikes and soldier mutinies towards the end of the First World War They brought down the German monarchy founded several short lived council republics and dramatically transformed European politics Building Power to Change the World reconstructs how participants in the German council movements struggled for a democratic socialist society It examines their attempts to democratize politics the economy and society through building powerful worker led organisations and cultivating workers political agency Drawing from the practices of the council movements and the writings of theorists such as Rosa Luxemburg Anton Pannekoek and Karl Kautsky Building Power to Change the World returns to their radical vision of a self determining society and their political program of democratization and socialization It presents a powerful argument for renewed attention to the political theories of this historical period and for their ongoing relevance for democratic politics today
