Pro-Poor Mountain Tourism Michal Apollo, Yana Wengel, Thomas Pogge, 2024-12-06. This timely and interdisciplinary book is the first to examine mountain tourism and local communities with a pro-poor lens. By drawing on human geography, political and social science, ethics and moral philosophy and empirical research, the volume explores how mountain tourism can be used to fight poverty and inequality in mountain regions. Mountain tourism represents a growing mass tourism phenomenon. The local population, recognizing the possibilities for increased income, started to develop in situ services. However, sensitive to outside influences, the environment of high altitude mountain areas, resident communities have been abruptly exposed to impacts from mountain tourism related activities, although until recently they have been cut off from civilization. The natural environment and people living in mountain regions have been affected by an increasing number of visitors in the last few decades. Hence, this book provides an expert-led and comprehensive summary of mountain tourism development and illustrates how tourism can increase benefits for the poor within local communities. Furthermore, it presents updated management and governance policies. This volume will be of pivotal interest to scholars and practitioners from the fields of geography and tourism studies, ethics and development, economics as well as policymakers, aid agencies and general readers interested in sustainable development in mountain regions.
