Societal Impact of Spaceflight Steven J. Dick, Roger D. Launius, 2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions Spacewear Barbara Brownie, 2019-01-10 Today we are living in the New Space Age where mass commercial space travel is almost within our grasp This otherworldly possibility has opened up new cultural images of space both real and fictional and has caused fashion design and spacesuit engineering to intersect in new exciting ways Spacewear traverses this uncharted territory by exploring the changing imagination of space in fashion and fashion in space from the first Space Age to the 21st century Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment Spacewear connects the catwalk and the space station This book draws together speculative fantasies in sci fi films such as *Star Trek* and *2001 A Space Odyssey* with the engineered spacesuits Biosuit and the NASA Z 2 and with catwalk interpretations by the likes of Alexander McQueen Hussein Chalayan Andr Courr ges and Iris van Herpen While the development of commercial space agencies has led to new concerns for style in garments for outer space that re think fundamental design principles such as drape high fashion has experimented with new possibilities for weightlessness that
