Toward A Unified Theory Of Problem Solving Views From The Content Domains:

Toward a Unified Theory of Problem Solving Mike U. Smith, 1991 One of the most active fields of educational research in recent years has been the investigation of problem solving performance Two opposing views of current research one suggesting that there are more differences than similarities within different domains and the other stating that there is great similarity lead to a variety of questions Is problem solving a single construct Are there aspects of problem solving performance that are similar across a variety of content domains What problem solving skills learned within one context can be expected to transfer to other domains The purpose of this book is to serve as the basis for the productive exchange of information that will help to answer these questions by drawing together preliminary theoretical understandings sparking debate and disagreement raising new questions and directions and perhaps developing new world views *Toward a Unified Theory of Problem Solving* Mike U. Smith, 2012-11-12 One of the most active fields of educational research in recent years has been the investigation of problem solving performance Two opposing views of current research one suggesting that there are more differences than similarities within different domains and the other stating that there is great similarity lead to a variety of questions Is problem solving a single construct Are there aspects of problem solving performance that are similar across a variety of content domains What problem solving skills learned within one context can be expected to transfer to other domains The purpose of this book is to serve as the basis for the productive exchange of information that will help to answer these questions by drawing together preliminary theoretical understandings sparking debate and disagreement raising new questions and directions and perhaps developing new world views *Toward a General Theory of Expertise* K. Anders Ericsson, Jacqui Smith, 1991-08-30 During the last twenty years our understanding of expertise has dramatically increased Laboratory analysis of chess masters experts in physics and medicine musicians athletics writers and performance artists have included careful examination of the cognitive processes mediating outstanding performance in very diverse areas of expertise These analyses have shown that expert performance is primarily a reflection of acquired skill resulting from the accumulation of domain specific knowledge and methods during many years of training practice The importance of domain specific knowledge has led researchers on expertise to focus on characteristics of expertise in specific domains In *Toward a General Theory of Expertise* many of the world's foremost scientists review the state of the art knowledge about expertise in different domains with the goal of identifying characteristics of expert performance that are generalizable across many different areas of expertise These essays provide a comprehensive summary of general methods for studying expertise and of current knowledge about expertise in chess physics medicine sports and performance arts music writing and decision making Most important the essays reveal the existence of many general characteristics of expertise **Chemical Education: Towards Research-based Practice** J.K. Gilbert, Onno de Jong, Rosária Justi, David F. Treagust, Jan H. van Driel, 2006-03-11 Chemical education is essential to everybody because it deals with ideas that play

major roles in personal social and economic decisions This book is based on three principles that all aspects of chemical education should be associated with research that the development of opportunities for chemical education should be both a continuous process and be linked to research and that the professional development of all those associated with chemical education should make extensive and diverse use of that research It is intended for pre service and practising chemistry teachers and lecturers chemistry teacher educators chemical education researchers the designers and managers of formal chemical curricula informal chemical educators authors of textbooks and curriculum support materials practising chemists and chemical technologists It addresses the relation between chemistry and chemical education curricula for chemical education teaching and learning about chemical compounds and chemical change the development of teachers the development of chemical education as a field of enquiry This is mainly done in respect of the full range of formal education contexts schools universities vocational colleges but also in respect of informal education contexts books science centres and museums

Instructing and Testing Advanced Learners Slava Kalyuga, 2006 When we learn new and complex materials our cognitive processing capabilities are usually severely reduced due to limited working memory capacity Learner expertise in a specific domain decreases those limitations by enabling the use of the expert's organised knowledge base In many instructional situations however expertise may also trigger additional cognitive load because of the processing of redundant information Recently strong evidence has emerged that instructional techniques which are highly effective with novice learners can lose their effectiveness and even have negative consequences when used with advanced learners As learners become more knowledgeable in a domain instructional techniques and procedures often need to change radically in order to remain efficient To tailor instruction to levels of learner knowledge in computer based learning environments it is critical to
