Learning to Be Old Margaret Cruikshank, 2013-02-14 Margaret Cruikshank's Learning to Be Old examines what it means to grow old in America today The book questions social myths and fears about aging sickness and the other social roles of the elderly the over medicalization of many older people and ageism In this book Cruikshank

proposes alternatives to the ways aging is usually understood in both popular culture and mainstream gerontology Learning to Be Old does not propose the ideas of successful aging or productive aging but more the idea of learning how to age Featuring new research and analysis the third edition of Learning to be Old demonstrates more thoroughly than the previous editions that aging is socially constructed Among texts on aging the book is unique in its clear focus on the differences in aging for women and men as well as for people in different socioeconomic groups Cruikshank is able to put aging in a broad context that not only focuses on how aging affects women but men as well Key updates in the third edition include changes in the health care system changes in how long older Americans are working especially given the impact of the recession and new material on the brain and mind body interconnections Cruikshank impressively challenges conventional ideas about aging in this third edition of Learning to be Old This will be a must read for everyone interested in new ideas surrounding aging in America today

Cultural Methods in Psychology Kate C. McLean, 2022 As I sat down to write this chapter about the use of life story methods for capturing cultural historical aspects of LGBTQ identity development I was transported back in time It was a hot summer day in 2004 I had travelled back from the big city where I was attending university to visit my family This was my first summer away from home At that moment my family and I sat in the parking lot of a diner having just finished breakfast at a local greasy spoon a ritualistic send off before I started my four hour return drive In those moments our car felt unusually cramped My dad was in the back seat with me my mom and brother in the front I didn't have much of an appetite that morning knowing that in mere minutes I would come out to my family as gay On our way out of the restaurant walking to our separate cars I somehow managed to muster up the courage to tell my family there was something important I wanted them to know So there I was in the backseat of the car with a message for my family Looking back on it the message was more like an ultimatum They could learn to love this new version of me as I had done or our routine see you later might be a goodbye This is the beginning of my story both my coming out story and in some ways my life story Thankfully my family is still an important part of this story

Memory Practices and Learning Åsa Mäkitalo,Per Linell,Roger Säljö,2017-01-01 Memory and learning are seen as mental phenomena and generally studied as brain processes for example within various branches of psychology and neuroscience This book represents a rather different tack based on sociocultural theory cultural psychology and dialogism Authors from many different disciplines and countries study memory and learning as practices adopted by people in different interactional and institutional contexts Studies range from detailed analyses of situated activities to broad sociohistorical studies of cultural phenomena and collective memories such as national narratives and physical symbols for commemorating events and traditions By focusing on how people engage in remembering and learning this book provides a necessary complement to currently popular neuroscientific approaches
