China's Transition from Communism - New Perspectives Guoguang Wu,Helen Lansdowne,2015-11-06 As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy It is now clear however that political liberalisation does not necessarily follow economic liberalisation This book explores this apparent contradiction presenting many new perspectives and new thinking on the subject It considers the path of transition in China historically makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present A key feature of the book is the fact that most of the contributors are China born Western trained scholars who bring deep knowledge and well informed views to the study

The Future of Chinese Capitalism Gordon Redding,Michael A.

Witt,2010-01-07 Much has been said about the re emergence of China to its historical position of eminence in the world economy yet little is understood about the kind of economic system China is evolving What are the rules of the game of business in today's China and how are they likely to change over the next decades The answers to these questions are crucial to business persons formulating strategy toward China but also for policy makers concerned with retaining the competitiveness of their nations in the face of Chinese competition and for researchers seeking to gain deeper insights into the workings of economic systems and institutional change Written by two leading experts in the field this book sheds much needed light on these questions Building on recent conceptual and empirical advances and rich in concrete examples it offers

a comprehensive and systematic exploration of present day Chinese capitalism its component parts and their interdependencies It suggests that Chinese capitalism as practiced today in many respects represents a development from traditional business practices whose revival has been greatly aided by the influx of investments and managerial talent from the Regional Ethnic Chinese On the basis of present trends in the Chinese economy as well as through comparison with five major types of capitalism those of France Germany Japan Korea and the United States the book derives a prediction of the probable development paths of Chinese capitalism and its likely competitive strengths and weaknesses **Liberalism 2.0 and the Rise of China** David Tyfield,2017-09-05 What can we do in this period of historic global turbulence Mainstream narratives have no plausible account of how to stop exacerbating the multiple overlapping challenges much less begin to address them meaningfully The only thing everyone agrees is innovation will be needed But what is innovation Usually it is understood as new technologies that will solve specific problems and it is hoped return life to a business as usual of progress in individual freedom and wealth But innovation is a thoroughly social process with profound implications for the arrangement of power in a society hence shaping the emergence of new social systems Exploring evidence from the key arenas of low carbon innovation including in the pivotal location of a rising China this book describes the global systemic crisis of a neoliberal world order and the embryonic emergence of an alternative global power regime of a liberalism 2 0 This augurs both a web 2 0 based revitalization of the classical liberalism of the nineteenth century and new Dickensian inequalities and injustices Against hopes that the present is a revolutionary moment therefore political engagement with this emerging power regime is thus presented as the most productive strategy for a progressive twenty first century politics

The Chinese and Indian Corporate Economies Raj Brown,2017-02-03 This is a compelling analysis of the corporate economies of China and India which are having a huge impact not just on the international economy but also in the geopolitical and international strategy sphere as a result of an accelerated globalisation by these two countries which is unleashing powerful economic challenges to corporate structures economic institutions and law worldwide The big question is how after centuries of underdevelopment China and now India are emerging powerfully and pulling ahead of Western European economies Analysing the role of the state and the adroit use of law and their impact on the corporate evolution of both China and India provides greater clarity and insight into why China has evolved as a manufacturing nation utilizing cheap abundant labour while India has not exploited such advantages but instead focused on IT and higher value industries even abroad as Tata has demonstrated in the motor industry in Europe Again while Chinese corporations have expanded abroad as an arm of the state into Asia Middle East Africa Europe Latin America and parts of the southern states of the USA India has pushed principally into Europe through the efforts of powerful minority capitalists of Parsi and Gujerati background overcoming technological gaps and differences through acquisitions and absorptions of existing corporations in particular industries especially in steel automobiles and textiles In China state owned corporations have been dominant In India though state owned enterprises

have been powerful since 1951 it has been private capitalists with an established stronghold since the colonial period and even under the Socialist period from 1951 1991 who have been the more productive main actors both in India and abroad

China's Macao Transformed Eilo W.Y.YU,Ming K.CHAN,2014-10-01 The return of Macao from the Portuguese

administration to the People's Republic of China (PRC) in 1999 marks the beginning of its transformation in the 21st century. Macao was confronted with various issues concerning then existing political system, economic downturn and gangland violence during the transition period. Beijing put Macao under the One country Two Systems and implemented a wide variety of measures in order to restore its law and order as well as to recover its tourism dependent economy. Gradually Macao transformed itself to Las Vegas of the East. This volume of 18 essays highlights the key dimensions of Macao's remarkable One country Two Systems actualisation experience in its first 15 years and discusses how Macao transformed and what challenges it encountered during its post handover transformation. The volume has several focuses. It first investigates the political and electoral issues in a critical manner. Post handover Macao suffered from maladministration and limited democratization and the chief executives selected lacked representativeness due to restricted public participation in the electoral process. Overall speaking the government lacked legitimacy and popular support. From a socio-economic point of view this book looks into the business model in running Macao's casinos and the emerging culture of mass participation and youth participation in political affairs. The education reformation and changes in civic identity of local Macao Chinese are also addressed. Finally the volume looks into how post handover Macao relates itself in the international politics affair.
