Maher,2014-09-17 This collection of original articles a sequel of sorts to the 2009 Religion and the Implications of Radical Life Extension Palgrave Macmillan is the first sustained reflection by scholars with expertise in the faith traditions on how the transhumanist agenda might impact the body **Religion and Transhumanism** Calvin

Mercer,Tracy J. Trothen,2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest

Religion and the Technological Future Calvin Mercer,Tracy J. Trothen,2021-02-22 We live in an age of rapid technological advancement Never before has humankind wielded so much power over our own biology Biohacking the attempt at human enhancement of physical cognitive affective moral and spiritual traits has become a global phenomenon This textbook introduces religious and ethical implications of biohacking artificial intelligence and other technological changes offering perspectives from monotheistic and karmic religions and applied ethics These technological breakthroughs are transforming our societies and ourselves fundamentally via genetic modification tissue engineering artificial intelligence robotics the merging of computer technology with human biology extended reality brain stimulation and nanotechnology The book also considers the extreme possibilities of mind uploading cryonics and superintelligence Chapters explore some of the political economic sociological and psychological dimensions of these advances with bibliographies for further study and questions for discussion The technological future is here and it is up to us to decide its moral and religious shape Muslim and Supermuslim Roy Jackson,2020-02-05 This book looks to the rich and varied Islamic tradition for insights into what it means to be human and by implication what this can tell us about the future human The transhumanist movement in its more

radical expression sees Homo sapiens as the cousin perhaps the poorer cousin of a new Humanity 2.0 Man is replaced by Superman The contribution that Islam can make to this movement concerns the central question of what this Superman or Supermuslim would actually entail To look at what Islam can contribute we need not restrict ourselves to the Qur'an and the legal tradition but also reach out to its philosophical and literary corpus Roy Jackson focuses on such contributions from Muslim philosophy science and literature to see how Islam can confront and respond to the challenges raised by the growing movement of transhumanism

Religion and Human Enhancement Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics

Governing the Future Henning Glaser, Pindar Wong, 2025-02-28 We are living in times of deep and disruptive change Perhaps the most powerful vector of this change can be described by three related catchphrases digitalization artificial intelligence and dataism Drawing on considerable expertise from a wide range of scholars and practitioners this interdisciplinary collection addresses the challenges impacts opportunities and regulation of this civilizational transformation from a variety of angles including technology philosophy cultural studies international law sociology and economics This book will be of special interest to scholars students analysts policy planners and decision makers in think tanks international organizations and state agencies studying and dealing with the development and governance of disruptive technologies

The Ethics of Generating Posthumans Calum MacKellar, Trevor Stammers, 2022-01-27 Should transhuman and posthuman persons ever be brought into existence And if so could they be generated in a good and loving way This study explores how society may respond to the actual generation of new kinds of persons from ethical philosophical and theological perspectives Contributors to this volume address a number of essential questions including the ethical ramifications of generating new life the relationships that generators may have with their creations and how these creations may consider their generation This collection's interdisciplinary approach traverses the philosophical writings of Aristotle Aquinas Kant Nietzsche and Heidegger alongside theological considerations from Jewish Christian and Islamic traditions It invites academics faith leaders policy makers and stakeholders to think through the ethical gamut of generating posthuman and transhuman persons

Tales of the Turing Church: Hacking religion, enlightening science, awakening technology Giulio Prisco, 2020-02-07 This book explores intersections of science and religion spirituality and technology engineering and science fiction mind and matter and outlines a new cosmic transhumanist religion Hacking religion enlightening science awakening technology

Religion and the New

Technologies Noreen Herzfeld, 2018-07-05 This book is a printed edition of the Special Issue Religion and the New Technologies that was published in Religions

Ecology, Ethics, and the Future of Humanity Adam Riggio, 2015-08-18 A book that combines moral and political philosophy with traditions of activism and literature in a background of scientific knowledge and interpretation to build a comprehensive picture of an ecological humanity

Temples of Modernity Robert M. Geraci, 2018-08-15 Temples of Modernity uses ethnographic data to investigate the presence of religious ideas and practices in Indian science and engineering Geraci shows 1 how the integration of religion science and technology undergirds pre and post independence Indian nationalism 2 that traditional icons and rituals remain relevant in elite scientific communities and 3 that transhumanist ideas now percolate within Indian visions of science and technology This work identifies the intersection of religion science and technology as a worldwide phenomenon and suggests that the study of such interactions should be enriched through attention to the real experiences of people across the globe

Deconstructing Transhumanism Michael G. Sherbert, 2025-09-30 Deconstructing Transhumanism A Religion Without Religion challenges the widely held view that transhumanism a movement advocating for the enhancement of human life through technology is purely secular and scientific Instead this groundbreaking study reveals how transhumanist thought remains deeply shaped by religious ideas particularly those rooted in Christianity Drawing on the philosophy of Jacques Derrida Michael G Sherbert explores how religious concepts like the sacred messianism salvation and transcendence quietly persist within transhumanist visions of the future often without reflection on the potential dangers they carry From artificial intelligence to the dream of digital immortality this book uncovers how technological aspirations often mirror age old religious hopes Through a careful analysis of leading figures such as Ray Kurzweil David Pearce and Nick Bostrom Sherbert shows that even the most futuristic goals often retain hidden religious structures what Derrida calls a religion without religion Spanning philosophical inquiry ethical reflection and cultural critique Deconstructing Transhumanism invites readers to rethink the assumptions behind some of today s most influential ideas about technology progress and the future It offers a timely examination of the religious undercurrents shaping Western technological imaginaries urging greater awareness of the powerful and sometimes perilous narratives we carry into our increasingly high tech future

Julian Huxley, Evolutionism and the History of Transhumanism Ingrid Dunér, 2025-03-18 The evolutionary biologist Julian Huxley 1887 1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley s transhumanism

develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable **Braving the Future** Douglas

Estes, 2018-11-06 Humanity is nearing a technological tipping point The blistering pace of technological scientific and social change is ushering in an era in which human bodies merge with devices corporations know everything about us and artificial intelligence develops human and even godlike potential In possession of the most powerful tools history has ever seen we will be faced with questions about wisdom authority faith desire and what it means to be human In *Braving the Future* Douglas Estes equips Christians to thoughtfully and prayerfully prepare for a future of technological reign that is rapidly expanding Drawing on Scripture Christian tradition and scientific literature Estes offers a theology of work creation and personhood that is both prophetic and sturdy enough to keep pace with the technology of a future as yet unknown He helps readers choose trust in God over fearful retreat and following Jesus over uncritical engagement with technology The future may not look exactly like a science fiction movie but are we ready to brave a future of limitless tech and boundless change **New**

Confucian Horizons Jonathan Keir, Peter C. Phan, Young-chan Ro, 2024-10-08 *New Confucian Horizons* Essays in Honor of Tu Weiming represents both a sustained reflection on Tu Weiming's legacy from those who have worked with him and an original contribution to the field of intercultural dialogue that Tu himself spent a lifetime cultivating The importance of Sino American intellectual relations in an era of mounting geopolitical rivalry between the United States and China scarcely requires explanation Tu Weiming's work has significantly deepened Sino American cultural relations and continues to provide a vital antidote to those who would sow division between the two worlds This book deals with Confucianism and New Confucianism and Tu Weiming's contribution to both of these Chinese philosophical traditions studies how Confucianism has been received especially in Asia and considers Confucianism in connection with contemporary challenges Those new to Tu Weiming will sense by the end of the volume just how vast his influence as a teacher scholar and public intellectual has been Those more familiar with Tu's work will uncover lacunae in their understanding of his legacy and new angles from which to savour the value of Confucian intellectual resources Religious Transhumanism and Its Critics Arvin M. Gouw, Brian

Patrick Green, Ted Peters, 2022-03-10 Why do representatives of different religious traditions find the transhumanist vision of the future not only theologically compatible but even inspiring Transhumanism is a global movement seeking radical human enhancement The trans in transhumanism marks the transition from the present stage in human evolution into the future namely post human existence Containing chapters written by adherents to a variety of religious traditions Religious

Transhumanism and Its Critics provides first hand testimony to the value of the transhumanist vision perceived by the religious mind In addition the contributors critique both secular and religious transhumanism in light of realistic science and commitment to social justice **Ethics at the Center** Elliot N. Dorff,2024 Ethics at the Center culls the best of Rabbi Elliot Dorff s pioneering thinking in Jewish ethics over the course of nearly five decades **Science and Religions in America** Greg Cootsona,2022-12-30 What is religion What is science How do they interact with each other Science and Religions in America A New Look offers a cutting edge overview of the diverse range of religious traditions and their complex and fascinating interaction with science Pluralistic in scope the book is different from traditional Christian and or monotheistic approaches to studying the rich interplay of religion and science in multi religious American culture Featuring interviews with specialists in the field Greg Cootsona draws on their insights to provide a comprehensive accessible and engaging introduction to the challenging interrelationship of religion and science Each chapter focuses on a different religion within the United States covering Buddhism Christianity Nature Religions Islam Judaism Hinduism and the Spiritual but Not Religious SBNR Global religious traditions and their inextricable relationship with science and technology are examined in an accessible and interactive format With lightning round Q As contributions from leading thinkers and suggestions for further reading this book primes undergraduate students for studying the interchange of science and religions in the plural and is an exciting new resource for those interested in these topics in contemporary America *Theology and Black Mirror* Amber Bowen,John Anthony Dunne,2022-04-14 Black Mirror Netflix s dystopian anthology probes what it means to be human in a technological world While the show raises interesting if not disturbing questions it refrains from giving answers putting the onus on viewers to continue the conversation Accordingly Theology and Black Mirror engages questions and prominent themes in the show with resources from the Christian tradition including the academic disciplines of biblical studies theology philosophy and ethics
