Transhumanism And Transcendence Christian Hope In An Age Of Technological Enhancement:

Transhumanism and Transcendence Ronald Cole-Turner, 2011-09-29 The timeless human desire to be more beautiful intelligent healthy athletic or young has given rise in our time to technologies of human enhancement Athletes use drugs to increase their strength or stamina cosmetic surgery is widely used to improve physical appearance millions of men take drugs like Viagra to enhance sexual performance And today researchers are exploring technologies such as cell regeneration and implantable devices that interact directly with the brain Some condemn these developments as a new kind of cheating not just in sports but in life itself promising rewards without effort and depriving us most of all of what it means to be authentic human beings Transhumanists on the other hand reject what they see as a rationalizing of human limits as if being human means being content forever with underachieving bodies and brains To be human they insist is to be restless with possibilities always eager to transcend biological limits As the debate grows in urgency how should theology respond Christian theologians recognize truth on both sides of the argument pointing out how the yearnings of the transhumanists if not their technological methods find deep affinities in Christian belief In this volume Ronald Cole Turner has joined seasoned scholars and younger emerging voices together to bring fresh insight into the technologies that are already reshaping the future of Christian life and hope

Theologically Engaged Anthropology J. Derrick Lemons, 2018-08-16 After years of discussion within the field of anthropology concerning how to properly engage with theology a growing number of anthropologists now want to engage with theology as a counterpart in ethnographic dialogue Theologically Engaged Anthropology focuses on the theological history of anthropology illuminating deeply held theological assumptions that humans make about the nature of reality and illustrating how these theological assumptions manifest themselves in society This volume brings together leading anthropologists and theologians to consider what theology can contribute to cultural anthropology and ethnography It provides anthropologists and theologians with a rationale and framework for using theology in anthropological research

Religious Narratives in Contemporary Culture , 2021-04-26 Religious Narratives in Contemporary Culture Between Cultural Memory and Transmediality analyses the meaning and role of religion in western cultural practices in the twenty first century This inquiry situates itself at the intersection between cultural memory studies and the transmedial study of narrative and art Contributors focus on genres which have yet to receive significant critical attention within the field including speculative fiction films and television series autobiographical prose and poetry and action adventure video games In this time of crisis where traces of religious thinking still persist in the presence or absence of religious faith this volume s collective look into some of their cultural embodiments is necessary and timely The volume is addressed primarily to scholars and students interested in intersections between religious and cultural studies revisions of traditional religious narratives literature as a space of reflection on today s world contemporary media studies and remediation Maria Sabina Draga Alexandru s editing work in the last stages of this volume was supported by a grant of the

Romanian Ministry of Education and Research CNCS UEFISCDI project number PN III P3 3 6 H2020 0035 **The Eternal Present of Sport** Daniel A. Grano, 2017-06 In his persuasive study *The Eternal Present of Sport* Daniel Grano rethinks the sport religion relationship by positioning sport as a source of theological trouble Focusing on bodies time movement and memory he demonstrates how negative theology can be practically and theoretically useful as a critique of elite televised sport Grano asserts that it is precisely through sport's highest religious ideals that controversies are taking shape and constituting points of political and social rupture He examines issues of transcendence legacy e.g. greatest ever or all time and witnessing through instant replay which undermine institutional authority Grano also reflects on elite athletes representing especially powerful embodiments of religious and social conflict including around issues related to gender sexuality ability doping traumatic brain injury and institutional greed Elite sport is in a period of profound crisis It is through the ideals Grano analyzes that we can imagine a radically alternative future for elite sport Theology and Star Trek Shaun C. Brown, Amanda MacInnis Hackney, 2023-05-22 After *Star Trek Enterprise* concluded in 2005 *Star Trek* went on hiatus until the 2009 film *Star Trek* and its sequels With the success of these films *Star Trek* returned to the small screen with series like *Discovery* *Picard* and *Strange New Worlds* These films and series in different ways reflect cultural shifts in Western society *Theology and Star Trek* gathers a group of scholars from various religious and theological disciplines to reflect upon the connection between theology and *Star Trek* anew The essays in part one *These are the Voyages* explore the overarching themes of *Star Trek* and the thought of its creator Gene Roddenberry Part two *Strange New Worlds* discusses politics and technology Part three *To Explore and to Seek* focuses on issues related to practice and formation Part four *To Boldly Go* contemplates the future of *Star Trek* **Monsters of Film, Fiction, and Fable** Lisa Wenger Bro, Mary Ann Gareis, Crystal O'Leary-Davidson, 2018-07-27 Monsters are a part of every society and ours is no exception They are deeply embedded in our history our mythos and our culture However treating them as simply a facet of children's stories or escapist entertainment belittles their importance When examined closely we see that monsters have always represented the things we fear that which is different which we can't understand which is dangerous which is Other But in many ways monsters also represent our growing awareness of ourselves and our changing place in a continually shrinking world Contemporary portrayals of the monstrous often have less to do with what we fear in others than with what we fear about ourselves what we fear we might be capable of The nineteen essays in this volume explore the place and function of the monstrous in a variety of media stories and novels like Baum's *Oz* books or Gibson's *Neuromancer* television series and feature films like *The Walking Dead* or *Edward Scissorhands* and myths and legends like *Beowulf* and *The Loch Ness Monster* in order to provide a closer understanding of not just who we are and who we have been but also who we believe we can be for better or worse

Title page verso **Religion and Transhumanism** Calvin Mercer, Tracy J. Trothen, 2014-11-17 Should technology be used to improve human faculties such as cognition and longevity This thought provoking dialogue between transhumanism and religion examines enhancement technologies that could radically alter the human species Transhumanism or human enhancement is an intellectual and cultural movement that advocates the use of emerging technologies to change human traits Although they may sound like science fiction the possibilities suggested by transhumanism are very real and the questions they raise have no easy answers If these enhancements especially major ones like the indefinite extension of healthy human life become widely available they would arguably have a more radical impact on humankind than any other development in history This book comprises essays that explore transhumanism and the issues that surround it addressing numerous fascinating questions posed by scholars of religion from various traditions How will immortality or extreme longevity change our religious beliefs and practices How might pharmaceuticals enhance spiritual experiences Will post human technologies be available to all persons or will a superior post human race arise to dominate the human species The discussions are as intriguing as the future they suggest Christian Perspectives on Transhumanism and the Church Steve Donaldson, Ron Cole-Turner, 2018-08-02 Christians have always been concerned with enhancement now they are faced with significant questions about how technology can help or harm genuine spiritual transformation What makes traditional and technological enhancement different from each other Are there theological insights and spiritual practices that can help Christians face the challenge of living in a technological world without being dangerously conformed to its values This book calls on Christians to understand and engage the deep issues facing the church in a technological transhumanist future Religious Transhumanism and Its Critics Arvin M. Gouw, Brian Patrick Green, Ted Peters, 2022-03-10 Why do representatives of different religious traditions find the transhumanist vision of the future not only theologically compatible but even inspiring Transhumanism is a global movement seeking radical human enhancement The trans in transhumanism marks the transition from the present stage in human evolution into the future namely post human existence Containing chapters written by adherents to a variety of religious traditions Religious Transhumanism and Its Critics provides first hand testimony to the value of the transhumanist vision perceived by the religious mind In addition the

contributors critique both secular and religious transhumanism in light of realistic science and commitment to social justice

Reaching for Immortality: Can Science Cheat Death? Sandra J. Godde, 2022-04-01 At the forefront of science and technology there lie competing ideologies as to the nature of humanity and the future of human flourishing Will technology become the ultimate savior or has the work of salvation already been accomplished Are we only creatures of mind and body or are we spiritual beings at our core *Reaching for Immortality* bravely examines the agenda and ideals of the transhumanist movement and compares and contrasts these with the biblical vision of a physical resurrection and a divine upgrade of the entire created order Which vision of the future will inspire you and capture your allegiance This book is a primer to provoke deep thought about the impact of technological change on human personhood and asks crucial questions facing our age What does it mean to be human in light of exponential technological growth What is transhumanism and where is it leading us How important is embodiment for our personal identity How would the biblical understanding of personhood survive in a posthuman future

Religion and the Technological Future Calvin Mercer, Tracy J. Trothen, 2021-02-22 We live in an age of rapid technological advancement Never before has humankind wielded so much power over our own biology Biohacking the attempt at human enhancement of physical cognitive affective moral and spiritual traits has become a global phenomenon This textbook introduces religious and ethical implications of biohacking artificial intelligence and other technological changes offering perspectives from monotheistic and karmic religions and applied ethics These technological breakthroughs are transforming our societies and ourselves fundamentally via genetic modification tissue engineering artificial intelligence robotics the merging of computer technology with human biology extended reality brain stimulation and nanotechnology The book also considers the extreme possibilities of mind uploading cryonics and superintelligence Chapters explore some of the political economic sociological and psychological dimensions of these advances with bibliographies for further study and questions for discussion The technological future is here and it is up to us to decide its moral and religious shape

Crossing Wires Joel Oesch, 2020-12-10 The Digital Age has transformed nearly every facet of Western culture More than ever people are turning away from face to face interactions to spend countless hours mediating life through a screen Such changes can be felt in the arenas of politics sexuality work and recreation Some futurists argue for the development of Transhumanism a commitment to expanding human capacities through the use of applied technologies across a variety of platforms The proponents promise radically long life super intelligence and extreme bliss But how does technology shape us at the spiritual level Do our bodies even matter anymore *Crossing Wires* navigates the complex terrain of digital and robotic technologies with refreshing approachability The book opens the door for discussions on technology's influence on human identity while laying out a case for embodied empathetic communities of grace that can serve as a necessary antidote to a society that seems to love and trust devices above all else

Transhumanism and the Image of God Jacob Shatzer, 2019-04-09 Examining the transhumanist movement biblical ethicist Jacob Shatzer grapples with the potential for

technology to transform the way we think about what it means to be human Exploring the doctrine of incarnation and topics such as artificial intelligence robotics medical technology and communications tools he guides us into careful consideration of the future of Christian discipleship in a disruptive technological environment *Transhumanism and Society* Stephen Lilley,2012-07-31 This book provides an introductory overview to the social debate over enhancement technologies with an overview of the transhumanists call to bypass human nature and conservationists argument in defense of it The author present this controversy as it unfolds in the contest between transhumanists proponents and conservationists who push back with an argument to conserve human nature and to ban enhancement technologies This book provides an overview of the key contested points and present the debate in an orderly constructive fashion Readers are informed about the discussion over humanism the tension between science and religion and the interpretation of socio technological revolutions and are invited to make up their own mind about one of the most challenging topics concerning the social and ethical implications of technological advancements Human Technological Enhancement and Theological Anthropology Victoria Lorrimar,2022-05-05 A cross disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension mind uploading mood enhancement and moral enhancement This work draws on metaphor studies cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity Religion and Human Enhancement Tracy J. Trothen,Calvin Mercer,2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics

The Hope and Despair of Human Bioenhancement Paschal M. Corby,2019-12-23 The Hope and Despair of Human Bioenhancement is a virtual dialogue between Transhumanists of the Oxford School and the thought of Joseph Ratzinger Set in the key of hope and despair it considers whether or not the transhumanist interpretation of human limitations is correct and whether their confidence in the methods of human enhancement especially through biotechnology corresponds to genuine hope To this end it investigates the philosophical foundations of transhumanism in modernity s rejection of metaphysics the triumph of positivism and the universalism of the theory of evolution which when applied to anthropology becomes the materialist reduction of the human person Ratzinger calls into question this absolutization of positive reason and its limitation of hope to what human beings can produce naming it a pathology of reason a mutilation of human dignity and a fade of a world without hope In its place he offers a richer concept of hope that acknowledges our contingency and limitations *From Human to Posthuman* Brent Waters,2006-01-01 In this volume the author critically examines and

assesses the influence of technology on the formation of contemporary culture from the standpoint of Christian theological ethics *The Philosophy of Transhumanism* Benjamin Ross, 2020-05-11 Transhumanism is an international movement which anticipates humans developing posthuman capacities in the near future This work provides an introduction to transhumanism and the ethical and philosophical issues raised by radical human enhancement The book investigates these questions in a way that is timely and accessible to the non specialist
