Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants

Structural Reforms Without Prejudices Tito Boeri, Giorgio Barba Navaretti, 2006-06-15 Our economies face constant challenges from many different directions Structural reforms are implemented every day either to grasp the benefits of globalization and technological change or to avoid foundering on unaffordable welfare systems or the rise of new economies Despite this flurry of reforms many of their effects are insufficiently understood What makes reforms a success or a failure Why do we witness systematically ambivalent attitudes to reforms Can governments implement reforms differently without inflicting prejudice to large fringes of the population This book explores these issues by comparing a number of reforms across a large set of countries and sectors First through an innovative multisectorial input output analysis the authors compare the effects of liberalisation reforms in the telecommunication and electricity sectors across Europe Surprisingly they find that very similar and well intended reforms can generate highly contrasted outcomes It is also shown that governments must consider the effects of each reform on all sectors of the economy Second the authors explore how governments can tailor their reform strategy to alter the redistributive effects of reforms They show that the government's approach to reforms has been very different across time and across countries A government's approach depends on local institutions on the nature of the opposition and on the scope of the reform under way The authors however show that governments do have alternatives Often there are ways to tailor reforms so as to protect specific parts of the population and there are ways to experiment gradually to avoid costly policy mistakes Services Policy Reform and Economic Growth in Transition Economics , World Scientific Reference On Asia-Pacific Trade Policies (In 2 Volumes) Kym

Anderson, 2019-12-19 Protectionism has been placed under the media spotlight with news headlines generated by populist anti globalization movements and Donald Trump's term as US President Such a policy stance is putting at risk unilateral trade reform efforts in the Asia Pacific region and elsewhere This two volume reference work provides a timely update on how far the region has come in opening markets It analyzes the motivations or ostensible objectives of policies adopted in the past the changing extent of the domestic price distortions involved the economic effects of those policies at home and abroad the political economy forces at work that brought about those policies and their subsequent reform their consequences for international trade economic welfare and poverty alleviation and prospects for sustainable improvements in current policies Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers changed over the past century but especially since the 1980s and how that has affected trade between natural resource poor and resource rich economies This set is highly recommended for those who are interested in the economics and politics of trade policies agricultural economics economic development and food and nutrition security in the Asia Pacific region and beyond **Neoliberalism and the Transforming Left in India** Ritanjan Das, 2017-10-30 West Bengal has

often been perceived as somewhat of an aberration in the wider context of a rather chaotic Indian democracy as the Left Front spearheaded by the Communist Party of India Marxist CPIM demonstrated a rare instance of political stability decisively winning seven consecutive democratic elections from 1977 to 2006 Its development record has also been substantial with a focus on land reforms the panchayati raj institution and an agriculture centric development agenda This book presents a reappraisal of the political economic history of the CPIM Left Front regime against the backdrop of the Indian reform experience It examines two distinct areas the conditions that necessitated the regime to engineer a transition from an erstwhile agricultural based growth model to a more pro market economic agenda post 1991 and the political strategy employed to manage such a transition attract private capital and at the same time sustain the regime s traditional rhetoric and partisan character In order to develop a more textured understanding of the recent political developments in West Bengal the author applies a historically nuanced and inductive political economic analysis which draws on published materials and primary material such as government documents and interviews with bureaucrats political activists members of the intelligentsia and ministers A valuable contribution to the ongoing debate in the literature on the drifts underway with the Indian Left and India s economic transformation post 1990s this book will be of interest to academics in the field of Political Science Government Political Economy and South Asian Studies *Learning to be Capitalists* Annette Miae Kim, 2008-10-02 Why have some countries been able to escape the usual dead end of international development efforts and build explosively growing capitalist economies Based on years of fieldwork this book provides a detailed account of the first generation of entrepreneurs in Vietnam in comparison to those in other transition countries Focusing on the emergence of private land development firms in Ho Chi Minh City the author shows how within seven years the private sector produced the majority of all new houses in the real estate market This book demonstrates that capitalist entrepreneurialism was not the result of state initiative properly incentivized policies or individual personality traits Rather a society wide reconstruction of cognitive paradigms enabled entrepreneurs to emerge and transformed Vietnam from a poor centrally planned economy to one of the fastest growing market economies in the world **China's Great Economic Transformation** Loren Brandt, Thomas G. Rawski, 2008-04-14 This landmark study provides an integrated analysis of China s unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China s remarkable combination of high speed growth and deeply flawed institutions Their work exposes the mechanisms underpinning the origin and expansion of China s great boom Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development The editors probe both achievements and weaknesses across many sectors including China s fiscal legal and financial institutions The book shows how an intricate minuet combining China s political system with sectorial development globalization resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt *Handbook of New Institutional Economics* Claude
