outsourcing markets of 41 countries Scott proposes original theoretical models aimed both at training legal translators and informing all stakeholders including principals and agents These include models of legal translation performance a classification of constraints on legal translation applying upstream during and downstream of translation work and a description of the complex chain of supply Working to improve the enterprise itself Scott shows how implementing a comprehensive legal translation brief a sorely needed template can significantly benefit clients by increasing the fitness of translated texts Further she opens a number of avenues for future research with an eye to translator empowerment and professionalization

Legal Translation and the Dictionary Marta Chromá, 2013-10-10 This study concentrates on three major issues creating a basis for the making of the Czech English Law Dictionary with Explanations namely language including terminology in both the Czech and Anglo American systems of law the process of legal translation and the lexicographic method of producing a bilingual law dictionary Terminology has been considered the most significant feature of language for legal purposes It encompasses a wide range of special purpose vocabulary and higher syntactic units including legal jargon Conceptual analysis is to be pursued whenever an identical term in the target language does not exist or its full equivalent is in doubt Legal translation should be based primarily on comparative legal linguistic and genre analysis in order to make the transfer of legal information as precise accurate and comprehensible as possible The primary objective of legal translation is for the target recipient to be provided as explicit extensive and precise legal information in the target language as is contained in the source text complemented by the translator with facts rendering the original information fully comprehensible in the different legal environment and culture A dictionary which will help its users to produce legal texts in the target language should be founded upon a profound comparative legal and linguistic analysis that will a determine equivalents at the levels of vocabulary syntax and genre b select the appropriate lexicographic material to be included in the dictionary and c create entries in a user friendly manner

Comparative Law - Engaging Translation Simone Glanert, 2014-06-27 In an era marked by processes of economic political and legal integration that are arguably unprecedented in their range and impact the translation of law has

assumed a significance which it would be hard to overstate The following situations are typical A French law school is teaching French law in the English language to foreign exchange students Some US legal scholars are exploring the possibility of developing a generic or transnational constitutional law German judges are referring to foreign law in a criminal case involving an honour killing committed in Germany with a view to ascertaining the relevance of religious prescriptions European lawyers are actively working on the creation of a common private law to be translated into the 24 official languages of the European Union Since 2004 the World Bank has been issuing reports ranking the attractiveness of different legal cultures for doing business All these examples raise in one way or the other the matter of translation from a comparative legal perspective However in today's globalised world where the need to communicate beyond borders arises constantly in different guises many comparatists continue not to address the issue of translation This edited collection of essays brings together leading scholars from various cultural and disciplinary backgrounds who draw on fields such as translation studies linguistics literary theory history philosophy or sociology with a view to promoting a heightened understanding of the complex translational implications pertaining to comparative law understood both in its literal and metaphorical senses

Difficulties in Translating Legal Terms Berenice Walther, 2014-02-03 Thesis M A from the year 2008 in the subject English Language and Literature Studies Other grade 2 University of Münster Arbeitsbereich Sprachwissenschaft course Dialogue Studies language English abstract In this paper the major aspects of and essential developments in translation theory including the ever recurring question of what constitutes a good translation will be explored and the particularity of legal translation will be discussed In the translation of national law terms many facets have to be kept in mind For example the mastering of the different languages poses problems as does the relation of legal texts to different and specific legal systems and cultures The focus will then switch to legal language in particular The opposition between word meaning of everyday language and the word meaning of languages for specific purposes will be clarified Then particular difficulties in legal language and translation with consideration of the different legal systems where these translations are used will be illustrated with respect to the nature of legal discourse its dependence on the legal system and the presentation of possible ambiguities and their interpretation The problem of a common legislation in the European Union is one of finding a legal terminology that is not influenced by its cultural environment an entirely impossible enterprise
