Toward A Common European Union Energy Policy Problems Progress And Prospects:

Toward a Common European Union Energy Policy V. Birchfield, J. Duffield, 2011-07-18 Since the mid 2000s the European Union has made unprecedented strides toward the creation of a common energy policy This book takes stock of these developments evaluating how much progress has actually been made and what remains to be done what factors explain these recent advances and their limitations *The Development of Energy Policy in the European Union* Ingmar Versolmann, 2025-04-03 This book uniquely details the longer term integration of energy policy in the EU from its inception to the contemporary Energy Union whilst also bringing it fully up to date regarding its place in current climate discussions the European Green Deal REPowerEU the European Climate Law and the struggle to achieve net zero Analysing the policy area from a perspective that explains current developments through economic processes path dependence and political decisions over time the book identifies the factors and mechanisms that enable and constrain actors and energy policy development It contributes to the broader debate about institutional design and European integration in the energy sector examining key legislation the motives of actors complying with institutional rules and the idiosyncratic factors that contribute to continuity and account for change This book will be of key interest to scholars students and practitioners policymakers interested in European energy policy and energy environmental governance and more broadly to European politics and theories of European integration international political economy public policy international organisations and global governance

Corporate Power and Regulation Sandra Eckert, 2019-05-24 A novel insightful and provocative foray into the abilities capacities and limits of corporate power on the one hand and public power and capacities on the other hand Eckert offers new and refined insights on core issues in the theories of public and private interest regulation David Levi Faur Hebrew University of Jerusalem Israel This impressive book

breaks important ground in the regulatory governance literature by bringing in a fresh corporate perspective Based on a set of fascinating case studies of European regulation Eckert compellingly unpacks key facets of corporate power A must read for regulation scholars who often neglect the targets of regulation Burkard Eberlein York University Canada This book offers systematic and empirically fascinating insights into the regulatory power of corporations which unfolds outside the traditional political arenas Its policy effects have important implications for the target groups of regulation the general public and the democratic political process as such The conceptualization and use of rich empirical sources make for a compelling read Adrienne H ritier European University Institute Italy This book takes a fresh look at corporate power in the regulatory process It examines how corporations seek to prevent shape make or revoke regulation The central argument is that in doing so corporations utilise distinct power resources as experts innovators and operators By re emphasising the proactive role of business the book complements our acquired knowledge of policymakers capacity to put pressure on or delegate power to private actors Empirically the book covers European consumer and environmental policies and conducts case studies on the chemical paper home appliance ICT and electricity industries A separate chapter is dedicated to the assumption that Brexit will lead to an unprecedented result of EU regulation being lifted and how this could put corporate power in regulation at risk This book provides a new perspective on the policy implications of corporate power to scholars students and practitioners alike

EU-Russia Energy Relations Lukáš Tichý, 2018-12-30 This book explores the timely topic of energy security and international relations between the European Union and the Russian Federation Pursuing a constructivist discursive approach it empirically analyses a corpus of energy discourses involving policymakers and representatives of the EU and the Russian Federation Exploring various discursive meanings assigned to the material and technical character of EU Russian energy relations the monograph underscores how the identities and interests of both parties are strongly affected by the norms and values which frame the individual energy discourses

Does Energy Cause Ethnic War? East Mediterranean and Caspian Sea Natural Gas and Regional Conflicts Marika Karagianni, Andreas Stergiou, 2019-10-09 The Caspian Sea and the Eastern Mediterranean are two regions with abundant energy resources Their gas routes to Europe intersect and actors exporters pipeline owners and operators transit states and downstream customers are connected to one another in a web of political and economic interdependencies More significantly these regions have been plagued by deep seated ethnic conflicts and disputes namely the two oldest registered in the United Nations the Cyprus and the Arab Israeli Conflicts the Nagorno Karabakh problem the Syria War and numerous tensions in the Eastern Mediterranean the Caspian Sea and the Balkan regions This book investigates what impact these energy resources have had on the respective conflicts and disputes as well as their influence on the power game between the EU and Russia

Energy Transitions in Central and Eastern Europe Tomas Maltby, Matúš Mišík, 2024-04-04 This book examines the mutual interplay of climate and energy policies in eleven Central and Eastern European countries in the context of the EU s energy transition Energy security has

long been prioritised in the region and has shaped not only national climate and energy policy but also EU level policy making and implementation Whilst the region shares economic institutional and historical energy supplier commonalities it is not homogenous and the book considers the significant differences between the preferences and policies of these member states Chapters also explore the effect of the EU on member states that have joined since 2004 and their influence on the EU's energy and climate policies and their role in highlighting the importance of the concepts of security and solidarity The book highlights the challenges to and drivers of energy transitions in the region and compares these with those in global energy transitions

Fuels Paradise John S. Duffield, 2015-06-15 Is the quest for true energy security a fool's errand In recent years the efforts of nations to promote energy security have been hotly debated *Fuels Paradise* examines how five major developed democracies Britain France Germany Japan and the United States have sought to enhance their energy security since the oil shocks of the 1970s and in response to the more diverse set of challenges of the early twenty first century Drawing on a vast range of primary and secondary sources John S Duffield explains the actions taken and not taken by these countries to address their energy security concerns Throughout the book Duffield argues that state strength and policy legacies are essential for understanding national responses to energy insecurity In addition to identifying feasible energy policies and the constraints faced by policy makers he evaluates the prospects for international cooperation to promote energy security and considers the implications of recent advances in the production and distribution of energy particularly the fracking revolution An ambitious cross national and longitudinal study grounded in promising theories of national behavior *Fuels Paradise* will contribute substantially to broader debates about the determinants of state action and public policy

Essential EU Climate Law Edwin Woerdman, Martha Roggenkamp, Marijn Holwerda, 2015-08-28 EU climate law is one of the most dynamic and fastest growing areas of EU law This exciting new textbook provides a comprehensive account of essential EU climate mitigation law In addition the contents cover a number of important and topical issues

Sustainable Development and Governance in Europe Pamela M. Barnes, Thomas C. Hoerber, 2013-06-26 This book analyses the evolution of the sustainability discourse in the European Union exploring the conditions necessary for sustainable development to move from a conceptual model into a model for action for strategic decision makers at all levels of governance This book questions the extent to which the discourse on sustainability has become embedded into governance structures in Europe It focuses on the importance of the nature of the language of the political discourse on sustainability and how ideas are communicated amongst the actors and stakeholders in the policy making process as well as assessing the conceptual political institutional and operational barriers apparent across the European geographic region Drawing case studies from numerous policy areas including climate change EU emissions trading scheme renewable energy nuclear energy the European integrated energy market transport mobility and environmental protection expert contributors unveil a narrowing of the discourse on sustainability that has taken place in Europe However a considerable discontinuity remains between the economic and

environmental objectives of sustainable development and the authors argue that it is essential that conditions for a dynamic discourse open to multiple participants are developed Sustainable Development and Governance in Europe will be of strong interest to students and scholars of comparative politics governance sustainable development and environmental politics and studies

Transatlantic Energy Relations John R. Deni, Karen Smith Stegen, 2016-04-08 Recent upheaval in the global energy system dramatic increases in demand led largely by developing countries significant decreases in supply as a result of local or regional conflicts and the growing nexus between the burning of hydrocarbons and climate change has unsettled long held notions of energy security For many years transatlantic cooperation helped undergird the system s stability but Europe and North America have drifted apart in several key ways potentially undermining the search for energy sufficiency surety and sustainability Will the transatlantic partners continue on separate paths in the face of dramatic change in the global energy system or does the breadth and depth of the challenges they confront compel them to work more closely together In this edited volume experts from across Europe and North America including advisors to the executive and legislative branches of both the EU and the United States to senior military commanders and to major international organizations and companies examine the most salient facets of the transatlantic energy relationship and discern whether that relationship is characterized by growing convergence or divergence This book was based on a special issue of the Journal of Transatlantic Studies

EU Leadership in Energy and Environmental Governance Jakub M. Godzimirski, 2016-02-25 This edited collection focuses on the impact of the changing global distribution of power on the EU s energy policy and ability to project its approach to energy related issues abroad It maps the EU s changing position on global energy the impact of various factors on its energy policy and its relations with Russia China the USA and Brazil

Euratom at the Crossroads Anna Södersten, 2018-03-30 This book addresses the contentious debate surrounding the future of the European Atomic Energy Community Treaty Euratom one of the European Union s founding treaties Arguing that it has remained at a crossroads since its adoption in 1957 Anna S dersten explores the issue of whether the treaty should be kept separate from the EU or be brought within its framework

The Routledge Handbook of European Public Policy Nikolaos Zahariadis, Laurie Buonanno, 2017-11-24 The Routledge Handbook of European Public Policy provides an in depth and systematic understanding of EU policies It covers theoretical approaches on the policy process and the various stages of public policy formulation and decision making and discusses key questions of contemporary European governance The handbook introduces major concepts trends and methodologies in a variety of comparative settings thereby providing the first systematic effort to include theoretical and substantive analyses of European public policies in a single volume The handbook is divided into four sections Concepts and approaches in EU policymaking Substantive policies of the EU including economic and social fiscal and monetary areas of freedom security and justice and external policies Elements of the policy cycle Themes ranging from crisis and resistance to controversies in education This handbook will be an essential reference

for students and scholars of the European Union public policy social policy and more broadly for European and comparative politics

Decarbonization in the European Union Sebastian Oberthür, Claire Dupont, 2015-06-25 The authors examine how far internal policies in the European Union move towards the objective of reducing greenhouse gas emissions in the EU by 80-95 per cent by 2050 and how or whether the EU's 2050 objective to decarbonise could affect the EU's relations with a number of external energy partners

Free Movement and the Energy Sector in the European Union Sirja-Leena Penttinen, 2020-04-27 This book analyses the case law of the European Court of Justice on free movement in the energy sector Sirja Leena Penttinen provides a comprehensive review of the interpretation and application of the free movement provisions in the energy sector by the European Court of Justice ECJ which allow for cross border energy trade free movement of goods and energy investments free movement of capital Through detailed analysis of ECJ case law Penttinen tracks the development of the legislative framework at EU level in response to the growth of the energy sector as well as exposing the various political and economic nuances at play In addition she sheds light on the dynamic relationship between the EU Member States and their regulatory autonomy the EU legislator the Commission and the Court in the establishment of the EU internal energy market Taking a coherent systematic approach this volume will be of great interest to scholars of EU law and energy policy as well as policymakers and professionals working in this sector

The European Parliament in Times of EU Crisis Olivier Costa, 2018-11-24 This book assesses the many changes that have occurred within the European Parliament and in its external relations since the Lisbon treaty 2009 and the last European elections 2014 It is undoubtedly the institution that has evolved the most since the 1950s Despite the many crises experienced by European integration in the last years the Parliament is still undergoing important changes in its formal competences its influence on policy making its relations with other EU institutions its internal organisation and its internal political dynamics Every contribution deals with the most recent aspects of these evolutions and addresses overlooked topics providing an overview of the current state of play which challenges the mainstream intergovernmental approach of the EU This project results from research conducted at the Department of European Political and Governance Studies of the College of Europe Individual research of several policy analysts of the European Parliamentary Research Service EPRS have contributed to this endeavour

Conceptualizing Germany's Energy Transition Ludger Gailing, Timothy Moss, 2016-05-06 This is the first book to explore ways of conceptualizing Germany's ongoing energy transition Although widely acclaimed in policy and research circles worldwide the Energiewende is poorly understood in terms of social science scholarship There is an urgent need to delve beyond descriptive accounts of policy implementation and contestation in order to unpack the deeper issues at play in what has been termed a grand societal transformation The authors approach this in three ways First they select and characterize conceptual approaches suited to interpreting the reordering of institutional arrangements socio-material configurations power relations and spatial structures of energy systems in Germany and beyond Second they assess the value of these concepts in

describing and explaining energy transitions pinpointing their relative strengths and weaknesses and exploring areas of complementarity and incompatibility Third they illustrate how these concepts can be applied individually and in combination to enrich empirical research of Germany's energy transition

Handbook of Energy Governance in Europe Michèle Knodt, Jörg Kemmerzell, 2022-09-21 This Handbook provides the most comprehensive account of energy governance in Europe examining both energy governance at the European level and the development of energy policy in 30 European countries Authored by leading scholars the first part of the book offers a broad overview of the topics of energy research including theories of energy transitions strategies and norms of energy policy governance instruments in the field and challenges of energy governance In the second part it examines the internal and external dimensions of energy governance in the European Union The third part presents in depth country studies which investigate national trajectories of energy policy including an analysis of the policy instruments and coordination mechanisms for energy transitions It closes with a comparative analysis of national energy governance This book is a definitive resource for scholars in energy and climate research as well as decision makers in national governments and EU institutions

The Evolution of Carbon Markets Jørgen Wettstad, Lars Gulbrandsen, 2017-12-14 Carbon markets are developing and expanding around the world but how and to what extent is their design shaped by learning and interaction between them How do these markets function and what is the role of design Carrying out a ground breaking analysis of their design and diffusion this book covers all the major carbon market systems and processes around the world the EU RGGI California Tokyo New Zealand Australia China South Korea and Kazakhstan It offers a systematic in depth discussion and comparison of the key design features in these systems with expert contributors exploring how and to what extent these features have been shaped by central policy diffusion mechanisms and domestic politics By focussing on the specific design features of the instruments used this volume makes important contributions to diffusion theory highlighting how ETS diffusion processes more often have resulted in design divergence than convergence and discussing the implications of this finding for the vision of linked systems in the post Paris era It will be of significant interest to a broad audience interested in the emergence evolution functioning and interaction of carbon markets
