How to Live a Low-carbon Life Chris Goodall,2010 First Published in 2010 Routledge is an imprint of Taylor Francis an informa company *Plug-in Vehicles, Plugged in Policy?* Great Britain: Parliament: House of Commons: Transport Committee,2012-09-20 Consumer demand for plug in vehicles remains very low and the Government grant to encourage demand may not be proving effective The Government must do more to show that its plug in vehicle strategy is a good use of public money Carbon emissions from transport must be reduced if the UK is to meet its climate change targets but public money must be targeted on effective policies So far Department for Transport expenditure on plug in cars some 11 million has benefited just a handful of motorists There is a risk that the Government is basically subsidising second cars for affluent households It is also unclear whether the provision of public charging infrastructure encourages demand for plug in cars Indeed the Government does not even have a register of all the chargepoints installed at public expense

Octave and MATLAB for Engineering Applications Andreas Stahel,2022-05-28 For many engineering tasks extensive computations or visualizations are required The well established Matlab and Octave a very similar open source software are excellent tools for modeling computing and visualization This book will help the reader to acquire basic knowledge and elementary programming skills with Octave Matlab Basic data and programming structures are presented and for the most often used commands illustrative code samples are provided The selection of the presented commands is guided by the typical needs of engineers With these skills many and more difficult problems can be solved successfully It is

shown how basic statistical questions can be answered and how results are visualized using appropriate types of graphical representation A selection of typical independent engineering problems is presented together with algorithms to solve these problems Special attention is given to the methods of linear and nonlinear regression The high level tool Matlab Octave is used to develop computational code for micro controllers The codes and data files for the book are available on Github and on Springer Link The Target Groups Students in electrical and mechanical engineering and engineering fields in general Working engineers
