Transcendence Margaret S. Archer, Andrew Collier, Douglas V. Porpora, 2013-04-15 The book explores religious experience as a justifiable reason for religious belief demonstrating that the three pillars of Critical Realism ontological intransitivity epistemic relativity and judgemental rationality can be applied to religion

A Hospice in Change Martin Lipscomb, 2013-10-15 A Hospice in Change Applied Social Realist Theory reports upon a study into aspects of the ways in which structural and organisational developments professional cultures and bedside or patient focused clinical practice interact within a single UK institution While the findings of this study are time and context specific the events and social processes being described may nonetheless resonate closely with the experience of healthcare practitioners at other hospices both within and without the UK The work examines themes and ideas that hospice and palliative care practitioners as well as those involved or interested more broadly in end of life issues may find relevant It is argued that differential morphogenesis can be identified between structures social and cultural and agents individual and group at an independent healthcare charity in southern England A Hospice in Change connects theory and philosophy with concrete research practice to provide a worked example of Margaret Archer's realist social theory

Eurocentrism: a marxian critical realist critique Nick Hostettler, 2013-05-07 The political and social structures of modernity are dominated by really eurocentric forms and relations yet the theorisation of the eurocentricity of modernity remains barely developed At the same time modern political and social theory is fundamentally eurocentric yet the critique of eurocentrism remains marginal to marxian and critical realist theory Addressing the eurocentrism of both modernity and modern theory Eurocentrism A Marxian Critical Realist Critique discloses the deeply embedded constraints it imposes on historical and social reflexivity Building on the insights of post structuralism and post colonialism Eurocentrism shows how the powerful anti eurocentric tendencies of the marxian critique of civil society and the critical realist critique of philosophy have been misunderstood or ignored It develops the latent potential of these traditions to develop a systematically anti eurocentric approach to understanding and explaining modernity

Faithful Science Alistair J. McKitterick, 2022-03-17 This thesis studies the impact of teaching intelligent design to evangelical students Science is often presented as a reason why some find sharing their faith difficult in a secular culture teaching the science of intelligent design enables Christians to initiate conversations and overcome obstacles with those whose worldview is more Darwinian and materialist The professional doctoral research employs both action research and practical theology Lin Norton's pedagogical action research provides the structure for the qualitative research and thematic analysis showing that students find learning about intelligent design empowering for evangelism Richard Osmer's model of practical theology enables an interdisciplinary reflection on how intelligent design challenges Western secular culture Intelligent design is seen as the most integrative of all the different ways of relating science and theology Theologically teaching intelligent design is like teaching a modern parable to contemporary society and just like the Gospel parables some

respond with faith and some reject it Evangelical students find learning about it both liberating and empowering in their ability to share their faith more confidently with others especially in schools and youth groups *Explaining Global Poverty* Branwen Gruffydd Jones, 2007-01-24 Gruffydd Jones approach brings a book of real relevance for inequality in the modern world and gives an important platform from which to move forwards in the fight against poverty **The Politics of Method in the Human Sciences** George Steinmetz, 2005 Offers a comparative assessment of the variations of positivism alternative epistemologies in the contemporary human sciences Often declared obsolete positivism is alive well in a number of fields while in others its influence is significantly diminished **Handbook of Integrated Care** Volker Amelung, Viktoria Stein, Esther Suter, Nicholas Goodwin, Ran Balicer, Anna-Sophia Beese, 2025-11-03 This handbook shares profound insights into the main principles and concepts of integrated care It offers a multi disciplinary perspective with a focus on patient orientation efficiency and quality by applying widely recognized management approaches to the field of healthcare The handbook also highlights international best practices and shows how integrated care can work in various health systems In the majority of health systems around the world the delivery of healthcare and social care is characterised by fragmentation and complexity Consequently much of the recent international discussion in the fields of health policy and health management has focused on the topic of integrated care Integrated acknowledges the complexity of patients needs and aims to meet them by taking into account both health and social care aspects Changing and improving processes in a coordinated way is at the heart of this approach The third edition offers new chapters on people centredness complexity theories and evaluation methods additional management tools and a wealth of experiences from different countries and localities It is essential reading both for health policymakers seeking inspiration for legislation and for practitioners involved in the management of public health services who want to learn from good practice **Worship or Suicide** Oleg Dik, 2025-10-07 There is a growing unease about the perceived decay of Western civilization Intellectuals ruminate about a post liberal future and an atmosphere of dread permeates the public sphere One senses that the old is fading while the emerging order is not in sight *Worship or Suicide* offers both an account of how Western civilization came to flourish and an explanation as to why its decay was already present in its success Every civilization is rooted in foundational myths and rituals The removal of the Western roots from the Judeo Christian soil leads toward the withering of the social order Other gods move into the vacuum and transform the West into soft totalitarianism Thus the church both is responsible for social decay through its idolatry and also contains the potential for renewal Yet the solution does not lie in the instrumental use of religion Instead the church gives birth to a flourishing society paradoxically By excluding the immanent order and solely focusing upon the worship of the triune God the church unintentionally redeems society from its suicidal drive **Maurice Mandelbaum and American Critical Realism** Ian F. Verstegen, 2009-12-16 This is a unique and timely assessment of the work of American critical realist Maurice Mandelbaum and the relation of his thought to contemporary critical realism Particular attention is paid to how his

theories relate to those of Roy Bhaskar This is essential reading for any student with an interest in critical realism or the history of philosophy

Disability, Intersectional Agency, and Latinx Identity Alexis Padilla, 2021-07-28 This interdisciplinary volume links disability and agency by exploring LatDisCrit's theory and activist emancipatory practice It uses the author's experiential and analytical views as a blind brown Latinx engaged scholar and activist from the global south living and struggling in the highly racialized global north context of the United States LatDisCrit integrates critically LatCrit and DisCrit which look at the interplay of race ethnicity diasporic cultures historical sociopolitics and disability within multiple Latinx identities in mostly global north contexts while incorporating global south epistemologies Using intersectional analysis of key concepts through critical counterstories following critical race theory methodological traditions and engaging possible decoloniality treatments of material precarity and agency this book emphasizes intersectionality's complex underpinnings within and beyond Latinidades Through a careful interplay of disability identity and disability rights empowerment the volume opens avenues for intersectional solidarity and spaces for radical transformational learning This book will be of interest to all scholars and students working in disability studies intersectional disability justice activists critical Latinx Chicanx studies critical geographies intersectional political philosophy and political and public sociology

Church, Immigration & Pluralism Oleg Dik, 2023-02-16 This book wrestles with the question of how the church can thrive in such a diverse urban environment as Berlin and contribute to the flourishing of a pluralistic society The study includes embedded experience on the streets and crosses the disciplinary divides of Sociology Theology The main claim of the book is that the church is only able to thrive when it is willing to descend into the messy urban reality and encounter the stranger However the church can only do so by glimpsing God's glory in worship Living pluralism emerges from the grassroots The church can only become a gift to society paradoxically By not setting itself at the center but rather by gathering around the triune God and abandoning its desire for power and relevance the church will unintentionally provide a fertile soil within which resilient pluralism will grow Oleg Dik is professor for urban Theology Sociology at the Evangelische Hochschule TABOR Marburg TSB Theologisches Studienzentrum Berlin and lectures occasionally at Humboldt University Berlin in Sociology of Religion

A Critical Realist Perspective of Education Brad Shipway, 2010-07-20 This book clearly and comprehensively explores the capability of critical realism to throw new light on educational theory It firstly investigates the convergence and divergence between two forms of critical realism which have not previously been cross examined This task allows the book to outline the key characteristics that are necessary for a theological position to claim the term critical realist The remainder of the text deals with the implications of critical realism for the enterprise of education This enterprise is taken to include the thoughts and actions of students classroom teachers principals educational administrators policy makers teacher educators and philosophers of education This final part of the book widens the scope of evaluating education from a critical realist perspective It utilises the convergent ideas of Collier Walker and Corson on power as a platform to propose a

critical realist perspective on education With attention paid to the fundamentals of critical realism and education theory A Critical Realist Perspective of Education is an ideal text for undergraduates as well as postgraduates and professionals with an interest in broadening their understanding of education theory *Contradictions of Archaeological Theory* Sandra Wallace,2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an under labourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re discover their approach to archaeological theory **Critical Realism and Spirituality** Mervyn Hartwig,Jamie Morgan,2013-03-01 Critical Realism and Spirituality contextualizes delineates explores and critiques the turn to spirituality and religion in critical realism which has been under way since the mid 1990s as well as telling its story It provides incisive discussion and analysis of the following broad questions How does critical realism allow and facilitate the resolution of problems in the area of comparative religion Can it help you to justify your own faith or belief What are the implications of the new philosophy of meta Reality for traditional religious studies and how we organize and conduct our lives A range of distinguished critical realists theological critical realists and scholars working with related approaches Roland Benedikter Roy Bhaskar Terry Eagleton Mervyn Hartwig Alister McGrath Markus Molz Jamie Morgan Andrew Wright and others bring their talents to bear on this task While their personal beliefs span the whole spectrum from theism to atheism they are united by the desire to open up a space for dialogue of one kind or another intra faith inter faith and or extra faith promoting mutual understanding respect and the unity and capability for collective emancipatory action on a global scale that humanity is so sorely in need of This book is therefore essential reading for students and academics alike in Religious Studies Theology and Philosophy **The Political Economy of European Social Democracy** David J. Bailey,2009-05-19 Presenting case studies from the UK France Sweden Spain Italy and the transnational Party of European Socialists this text provides a theoretically innovative explanation for the new social democratic turn to Europe It will be of interest to postgraduate students and academics studying researching social democratic parties **Integrating Knowledge Through Interdisciplinary Research** Dominic Holland,2013-08-22 In this important new text Holland seeks to explain by means of social scientific and philosophical inquiry the difficulties that researchers often experience when attempting to integrate knowledge from different academic disciplines either individually or as part of a team of subject

specialists It is argued that the difficulty of integrating knowledge from different academic disciplines is the result of firstly an inadequate justification of the nature of scientific integration and differentiation and secondly the dominance of disciplinary specialization in scientific inquiry By focusing on both the theoretical justification for and the practical feasibility of integrating knowledge through interdisciplinary research this book asks what properties of reality make the integration of knowledge from different academic disciplines possible and to what extent it is feasible to integrate knowledge through interdisciplinary research within a traditional disciplinary context Accordingly the text is both philosophical and social scientific in content philosophical in the sense that it presents a theory of causal determination which will help researchers to understand how reality is both differentiated and interconnected social scientific in the sense that it presents the results of three case studies of collaborative interdisciplinary research projects The book is heavily informed by the philosophy of critical realism The philosophical argument about the possibility of integration and specialization in science draws explicitly on some of the key concepts of critical realism particularly those comprising the theory of integrative pluralism while critical realist assumptions underpin the social scientific argument about the causal influence of the social system of knowledge production By exploring researchers conceptions of knowledge and of reality on the one hand and their decisions about what sort of knowledge to produce on the other Holland shows how the difficulty of scientific integration is both a problem of knowledge and a problem of knowledge production This book is essential reading for students and academics interested in the emerging topic of knowledge integration and interdisciplinarity

Christianity and Critical Realism Andrew Wright,2013-05-07 One of the key achievements of critical realism has been to expose the modernist myth of universal reason which holds that authentic knowledge claims must be objectively pure uncontaminated by the subjectivity of local place specific time and particular culture Wright aims to address the lack of any substantial and sustained engagement between critical realism and theological critical realism with particular regard to a the distinctive ontological claims of Christianity b their epistemic warrant and intellectual legitimacy and c scrutiny of the primary source of the ontological claims of Christianity namely the historical figure of Jesus of Nazareth As such it functions as a prolegomena to a much needed wider debate guided by the under labouring services of critical realism between Christianity and various other religious and secular worldviews This important new text will help stimulate a debate that has yet to get out of first gear This book will appeal to academics graduate and post graduate students especially but also Christian clergy ministers and informed laity and members of the general public concerned with the nature of religion and its place in contemporary society

Ernan McMullin and Critical Realism in the Science-Theology Dialogue Paul L. Allen,2016-05-13 Scientists philosophers and theologians have wrestled repeatedly with the question of whether knowledge is similar or different in their various understandings of the world and God Although agreement is still elusive the epistemology of critical realism associated with Ian Barbour John Polkinghorne and Arthur Peacocke remains widely credible

Relying on the lifetime work of philosopher Ernan McMullin this book expands our understanding of critical realism beyond a permanent stand off between the subjective and objective whether in science or theology Critical realism illuminates the subject and the objectively known simultaneously Responding to criticisms made against it this book defends critical realism in science and theology with a specific role to play in our understanding of God **From East To West** Roy Bhaskar,2015-10-02 In this radical book Roy Bhaskar expands his philosophy of critical realism with an audacious re synthesis of many aspects of Western and Eastern thought Arguing that the existence of God provides the fundamental structure of the world he renders plausible ideas of reincarnation karma and moksha or liberation Originally published in the year of the millennium From East to West continues to be a groundbreaking and fundamental work within the critical realist tradition Stimulating debate in ontology epistemology ethics political philosophy and the philosophy of religion this book has been influential as a major new development in critical realism This second edition contains a new introduction from Mervyn Hartwig who is the founding editor of the Journal of Critical Realism and editor and principal author of the Dictionary of Critical Realism
