Steven Hodge, 2015-06-11 This book sets out to explore the challenge to education contained in Heidegger's work. His direct remarks about education are examined and placed in the broader context of his philosophy to create an account of Heidegger's challenge. Martin Heidegger is an undisputed giant of 20th Century thought. During his long academic career he made decisive contributions to philosophy influencing a host of thinkers in the process including Arendt, Gadamer, Sartre, Merleau-Ponty, Derrida and Foucault. Heidegger inquired into the deepest levels of human being and its social, natural and technological contexts. Although he did not develop a systematic philosophy of education, his philosophical insights and occasional remarks about education make him an interesting and troubling figure for education. Heidegger is of interest to education for his contributions to our understanding of human being and its environment. Heidegger's insights are troubling too for many of the assumptions of education. His critiques of humanism and the modern instrumental mindset in particular have significant implications. The work of scholars who have expanded on Heidegger's remarks and those who have been influenced by his philosophy is also surveyed to fill out the examination. A vision of education emerges in which teachers and learners awaken to the deadening influences around them and become attuned to the openness of being.

Teaching in Nursing E-Book Diane M. Billings, Judith A. Halstead, 2019-05-03 The perfect all in one guide for future nurse educators. The award winning *Teaching in Nursing: A Guide for Faculty* 6th Edition prepares you for the day to day challenges of teaching future nurses for practice in today's rapidly evolving healthcare system. This comprehensive resource is the only one of its kind to cover all four components of nursing education: teaching and learning, curriculum evaluation and technology empowered learning. You'll benefit from the expert guidance on such key issues as curriculum and test development, diverse learning styles, the redesign of healthcare systems and advances in technology and information. Plus the 6th edition includes a unique new chapter on Global Health and Curricular Experiences along with updated information on technology empowered learning, the flipped classroom, interprofessional education, interprofessional collaborative practice and much more. Comprehensively addresses all four components of nursing education including teaching and learning, curriculum evaluation and technology empowered learning. Coverage of concept based curricula includes strategies on how to approach and implement concept based instruction. Pedagogical aids include Evidence Based Teaching boxes covering such issues as how to do evidence based teaching, applications of evidence based teaching, implications for faculty development, administration and the institution and how to use the open ended application questions at the end of each chapter for faculty guided discussion. Strategies to promote critical thinking and active learning are incorporated throughout the text highlighting various evaluation techniques, lesson planning insights and tips for developing examinations. Guidance on teaching in diverse settings addresses such topics as the models of clinical teaching, teaching in interdisciplinary settings, how to evaluate students in the clinical setting and how to adapt teaching for community based practice. Strong emphasis on teaching clinical judgment, new models of clinical education and responding to needs for creating inclusive, multicultural teaching learning.
