Exploring the Interface Susan Mary Jackson, 2011 **Transvisuality** Tore Kristensen, Anders Michelsen, Frauke Wiegand, 2013 In contemporary society the visual becomes a traversing denominator passing through the most diverse articulations from new media branding drone vision and robot culture to cityscapes design and art The transvisuality project in three volumes promotes the turn away from the predominance of a focus on representations in studies of visual culture Volume 2 introduces visual organisation in the making as an effect of manifold traversing articulations and interconnected practices how is the stuff of visuality an image like a photograph an incident on TV a cinematic oeuvre intertwined in a range of cultural practices transformed and transgressed by them in transvisuality The aim of the book is to map how visual organizations are traversing culture as articulatory practices in situ The resulting case studies take their departure in

different materialities and agencies of empirical embedded visibility from canvas to drone camera and illustrate how transvisibility evolves in and around publics and communities on the one hand and through bodies and media on the other

0The visual articulations analysed in this volume span from cellphone videos to forensic images from biomedicine to robots from bunker ruins to Kalighat pat paintings from a Palestinian wedding dress to video footage of unknown strangers in a metro from the Gorgon Stare to movies becoming art installations While the first volume addresses the boundaries of the notion of visibility and creative openings that visual culture studies offer the third volume maps visibility in contexts of design creativity and brand management Back cover
