nature Mr Rigaud being himself a painter and highly appreciating the merits of Leonardo da Vinci felt that he should derive pleasure from exhibiting his well known Treatise on Painting to the British public with superior advantage He therefore not only gave a new translation but formed a better arrangement of the materials The merits of Mr Rigaud s Translation having been duly appreciated by the public and the work having been long out of print another edition in a neater and more condensed form is now produced which the Publishers presume may prove a desirable acquisition to students and amateurs The principal novelty however of this edition is the new Life of the Author by the late J W Brown Esq which was first published in a separate volume in 1828 A long residence in Italy an intimate acquaintance with its language and literature together with a constant opportunity of studying the most finished specimens of Art induced that gentleman to undertake the biography of Leonardo da Vinci who so largely contributed to form a new sera in the History of the Fine Arts This distinguished Italian is not so well known in England as he deserves Among the various biographical sketches of this celebrated character that written by Giorgio Vasari is perhaps the most authentic as he had the advantage of contemporaneous information But this also is rather an account of his works than of himself containing little more than what is generally known and forming only one article in Vasari s Lives of celebrated Painters To most of the editions which have been published of Da Vinci s writings a short biographical notice is prefixed but they are chiefly copied verbatim from Vasari The Signor Carlo Ammoretti librarian of the Ambrosian Library at Milan has prefixed the best and most ample account of Leonardo da Vinci to the edition of his Trattato della Pittura Treaty of the paint published at Milan in 1804 which he has entitled Memorie storiche su la Vita gli Studj e le Opere di Leonardo da Vinci Autobiography on the life he studies and the Work of Leonardo from Vinci In addition to many sources of information Mr Brown had the privilege of constant admittance not only to the private library of his Imperial and Royal Highness the Grand Duke of Tuscany but also to his most rare and valuable collection of Manuscripts in the Palazzo Pitti Plaza Pitti where he was permitted to copy from the original documents and correspondence whatever he conceived useful to his subject In selecting from the mass of documents relative to the subject of the present work Mr Brown rejected whatever appeared unsupported by sufficient proof and he has given such historical anecdotes of that period as were necessary to the subject from their having materially influenced the private fortunes of Da Vinci Sept 5 1835 *Leonardo on Art and the Artist* Leonardo (da Vinci),Andre Chastel,2002-01-01 Here is a complete picture of the techniques and working philosophy of one of the greatest artistic geniuses of the Renaissance Assembled by a brilliant scholar from Leonardo s own writings Notebooks and The Treatise on Painting as well as his artistic production the book offers a carefully balanced view of the artist s intellectual growth Drawing on all the relevant writings and rectifying many errors made by previous scholars this work differs from earlier studies in its systematic grouping of the passages of Leonardo s writings concerning painting In organizing the materials the editor focuses on problems of interpretation the result is the direct opposite of a simple anthology offering instead a reconstruction of the underlying

meaning of Leonardo's words For each section noted French art scholar Andr Chastel has provided an informative introduction and notes and substantial bibliographic and reference materials for the book as a whole More than 125 painstakingly reproduced illustrations are found throughout the text further enhancing this rich and accessible resource sure to be welcomed by scholars lay readers and any admirer of the incomparable Leonardo Unabridged republication of The Genius of Leonardo da Vinci originally published by The Orion Press New York 1961 Notes Printed Editions of Leonardo's Writings Table of Manuscripts Table of Paintings Chronological Table List of Illustrations References to Entries Over 125 black and white illustrations A Treatise on Painting Leonardo Da Vinci, John Francis Rigaud, John Sidney

Hawkins, 2023-12-30 The excellence of the following Treatise is so well known to all in any tolerable degree conversant with the Art of Painting that it would be almost superfluous to say any thing respecting it were it not that it here appears under the form of a new translation of which some account may be expected Of the original Work which is in reality a selection from the voluminous manuscript collections of the Author both in Solio and Quarto of all such passages as related to Painting no edition appeared in print till 1651 Though its Author died so long before as the year 1519 and it is owing to the circumstance of a manuscript copy of these extracts in the original Italian having fallen into the hands of Raphael that in the former of these years it was published at Paris in a thin folio volume in that language accompanied with a set of cuts from the drawings of Niccolo Pouissin and Alberti the former having designed and defined the human figures the latter the geometrical and other representations The first translation of this Treatise into English appeared in the year 1721 It does not declare by whom it was made but though it professes to have been done from the original Italian it is evident upon a comparison that more use was made of the revised edition of the French translation Indifferent however as it is it had become so scarce and risen to a price so extravagant that to supply the demand it was found necessary in the year 1796 to reprint it as it stood with all its errors on its head no opportunity then offering of procuring a French translation This last impression however being now also disposed of and a new one again called for the present Translator was induced to step forward and undertake the office of French translating it on finding by comparing the former versions both in French and English with the original many passages which he thought might at once be more concisely and more faithfully rendered *Leonardo on Painting*

Re-Reading Leonardo Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting first published in Paris in 1651 and soon translated into all the major European languages Here for the first time is a study that examines the historical reception of this vastly influential text This collection charts the varied interpretations of Leonardo's ideas in French Italian Spanish English German Dutch Flemish Greek and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists one of the key sources drawn upon by art theorists and widely read by a diverse network of artists architects biographers natural philosophers translators astronomers publishers engineers theologians aristocrats lawyers politicians entrepreneurs and collectors The cross cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years The volume includes original essays by scholars studying a wide variety of national and institutional settings The coherence of the volume is established by the shared subject matter and interpretative aim to understand how Leonardo's ideas were used With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius the collection takes Leonardo studies to a new level of historical inquiry Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature One of the most important questions to emerge from this study is what enabled the same text to produce so many different styles of painting
