Treering Research In The Netherlands:

Tree-ring Dating and Archaeology M.G.L. Baillie, 2014-10-24 The analysis of tree ring patterns or dendrochronology is a very exact science and an important dating technique The basis of the method is misleadingly simple that overlap of successive older ring patterns can generate a master chronology and samples of unknown age can then be checked against this This book published originally in 1982 traces the development of a specific project from its inception to the successful completion of some of the longest chronologies in Europe In doing so it looks at some of the problems associated with the subject and at the levels of precision possible After outlining the techniques associated with the measurement and processing of tree ring patterns the author traces an attempt to construct such an independent chronology in a new area The book breaks naturally into sections conditioned by the availability of timbers and these can be listed as modern late medieval medieval early medieval and prehistoric As far as possible the results are presented in the order in which things happened thus preserving the sense of a developing subject

Tree-ring Research in the Netherlands D. Eckstein, Johannes Ayolt Brongers, J. Bauch, 1975 *Fundamentals of Tree Ring Research* James H. Speer, 2010 This comprehensive text addresses all of the subjects that a reader who is new to the field will need to know and will be a welcome reference for practitioners at all levels It includes a history of the discipline biological and ecological background principles of the field basic scientific information on the structure and growth of trees the complete range of dendrochronology methods and a full description of each of the relevant subdisciplines

Dutch East India Company Shipbuilding Wendy van Duivenvoorde, 2015-03-30 Eight months into its maiden voyage to the Indies the Dutch East India Company's Batavia sank on June 4 1629 on Morning Reef in the Houtman Abrolhos off the western coast of Australia Wendy van Duivenvoorde's five year study was aimed at reconstructing the hull of Batavia the only excavated remains of an early seventeenth century Indiaman to have been raised and conserved in a way that permits detailed examination using data retrieved from the archaeological remains interpreted in the light of company archives ship journals and Dutch texts on shipbuilding of this period Over two hundred tables charts drawings and photographs are included
