Nerds David Anderegg, 2011-03-03 A lively thought provoking book that zeros in on the timely issue of how anti intellectualism is

bad for our children and even worse for America Why are our children so terrified to be called nerds And what is the cost of this rising tide of anti intellectualism to both our children and our nation In Nerds family psychotherapist and psychology professor David Anderegg examines why science and engineering have become socially poisonous disciplines why adults wink at the derision of nerdy kids and what we can do to prepare our children to succeed in an increasingly high tech world Nerds takes a measured look at how we think about and why we should rethink nerds examining such topics as our anxiety about intense interest in things mechanical or technological the pathologizing of nerdy behavior with diagnoses such as Asperger syndrome the cycle of anti nerd prejudice that took place after the Columbine incident why nerds are almost exclusively an American phenomenon the archetypal struggles of nerds and jocks in American popular culture and history the conformity of adolescents and why adolescent stereotypes linger into adulthood long after we should know better and nerd cultural markers particularly science fiction Using education research psychological theory and interviews with nerdy and non nerdy kids alike Anderegg argues that we stand in dire need of turning around the big dumb ship of American society to prepare rising generations to compete in the global marketplace Watch a QuickTime trailer for this book

In AI We Trust Helga Nowotny,2021-08-19 One of the most persistent concerns about the future is whether it will be dominated by the predictive

algorithms of AI and if so what this will mean for our behaviour for our institutions and for what it means to be human AI changes our experience of time and the future and challenges our identities yet we are blinded by its efficiency and fail to understand how it affects us At the heart of our trust in AI lies a paradox we leverage AI to increase our control over the future and uncertainty while at the same time the performativity of AI the power it has to make us act in the ways it predicts reduces our agency over the future This happens when we forget that that we humans have created the digital technologies to which we attribute agency These developments also challenge the narrative of progress which played such a central role in modernity and is based on the hubris of total control We are now moving into an era where this control is limited as AI monitors our actions posing the threat of surveillance but also offering the opportunity to reappropriate control and transform it into care As we try to adjust to a world in which algorithms robots and avatars play an ever increasing role we need to understand better the limitations of AI and how their predictions affect our agency while at the same time having the courage to embrace the uncertainty of the future
