American Fascism and the New Deal Nelson A. Pichardo Almanzar, Brian W. Kulik, 2013-08-28 American Fascism and the New Deal demonstrate how fascist ideas gained popularity in the Associated Farmers of California during the 1930s and 40s It shows that the politics of the intervening decades created economic and political policies that planted the seeds for these fascist ideas by forming alliances between the corporate private realm and the state public realm These same alliances made FDR and subsequent political figures rethink the direction they wanted to take American democracy Through a careful analysis of the Associated Farmers of California Nelson A Pichardo Almanzar and Brian Kulik show how the AFC formed positions in direct alliance with fascist ideas but also why these ideas resonate with so many people even to this day The analysis presented in American Fascism and the New Deal will be of particular interest to sociologists especially social movement theorists Chicana o studies scholars political scientists business ethicists and historians [Encyclopedia Of The Global Economy A Guide For Students And Researchers](#) David E. The Genesis of Israel and Egypt Emmet Sweeney, 2023-10-01 The Genesis of Israel and Egypt examines the earliest phase of historical consciousness in the ancient Near East looking in particular at the mysterious origins of Egypt's civilization and its links with Mesopotamia and the early Hebrews The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world's great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt's history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel

and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser s dream Imhotep is shown to be the same person as Joseph son of Jacob **Friedrich Hayek** Alan Ebenstein, Alan O. Ebenstein, 2003-04-15 In the first full biography of Friedrich Hayek 1899 1992 Alan Ebenstein chronicles the life works and legacy of the visionary thinker from his early years in fin de si cle Vienna to his remarkable career as a Nobel Prize winning economist political philosopher and leading public intellectual Ebenstein gives a balanced integrated account of Hayek s diverse body of work from his first encounter with free market ideas to his magisterial writings in later life on the legal political ethical and economic requirements of a free society *International Relations Theory and Philosophical Political Insights Into Conflict Management* Pietrzak, Piotr, 2025-02-21 Conflict management in the context of international relations is critical for maintaining global peace and stability By understanding the underlying causes of conflicts between nations and developing effective diplomatic strategies countries can prevent disputes from escalating into violence or war This also aids in creating frameworks for negotiation mediation and peacebuilding helping to resolve tensions in a constructive and sustainable manner *International Relations Theory and Philosophical Political Insights Into Conflict Management* supplements existing international relations theory with more interdisciplinary tools that bridge the division between the main conceptual methodological and analytical differences among rival paradigms approaches theories traditions and schools of thought It utilizes existing tools and methods in more effective ways to address modern conflicts of regional and global importance Covering topics such as conflict management international relations and warfare this book is an excellent resource for scholars researchers policymakers diplomats peacebuilding organizations security professionals business leaders educators academicians and graduate and postgraduate students **Power Shift** Richard Falk, 2016-07-15 This book depicts the challenges associated with the emergence of a new global order in which patterns of conflict and the role of traditional military power are in the process of radical flux Our ideas about global order have yet to catch up with these new behavioral trends including the rise of non state transnational political actors in the context of neoliberal globalization In this historical setting the modern territorial sovereign state is confronted by multiple challenges ranging from climate change to mass migration to transnational political extremism The existing global order seems currently overwhelmed by these challenges resulting in widespread stress and chaos that is transforming global security in ways that endanger democratic governance The future will be determined by whether the peoples of the world make their weight felt in support of sustainable global justice and overcome the impact of oppressive and exploitative patterns of corporate and state

behavior It is this problematic set of circumstances that Power Shift addresses *Encyclopedia of the Global Economy: List of entries* David Edward O'Connor, 2006 Examines the concepts people and organizations related to economic globalization from the sixteenth century to the present and features over 150 alphabetically arranged entries and primary documents on topics including international trade outsourcing and child labor
