S. Crumley II, 2009-07-30 The second edition of Jack Crumley's *An Introduction to Epistemology* strikes a balance between the many issues that engage contemporary epistemologists and the contributions of the major historical figures. He shows not only how philosophers such as Descartes, Hume, Locke, Berkeley, and Kant foreground the contemporary debates but also why they deserve consideration on their own terms. A substantial revision of the first edition, the second edition is even more accessible to students. The new edition includes recent work on contextualism, evidentialism, externalism, and internalism, and perceptual realism, as well as the chapter on coherence theory, which is substantially revised, reflecting recent developments in that area. New to this second edition is a chapter on feminist epistemology, which includes discussions of major positions and themes such as feminist empiricism, feminist standpoint epistemology, postmodern epistemology, and feminist critiques of objectivity. It presents the important contributions of philosophers such as Sandra Harding, Helen Longino, Genevieve Lloyd, and others. Each chapter ends with a list of study questions and readings for further study.

Challenging Global Finance

Elizabeth Friesen, 2012-01-25 Friesen demonstrates how transnational CSOs and NGOs can influence the context in which international political decisions are made. She shows how, by reframing the issues, the transnational campaign for the cancellation of third world debt altered the dominant discourse, shifted the agenda, and thereby shaped political outcomes.

The Healing Energy of Shared Consciousness Mantak Chia, 2011-02-23 How to connect with universal energy for inner peace, happiness, and individual and global healing. How to transform the energy around us into positive, loving energy. How to perform the World Link meditation to unite with global consciousness. How to fuse the observing mind, the conscious mind, and the mind of awareness. Western science now recognizes the three minds associated with the three tan tiens of Taoism: the observing mind centered in the brain, the conscious mind centered in the heart, and the mind of awareness centered in the lower abdomen. By unifying the three minds, what in Chinese is called Yi, we can transform the energy around us into positive, loving energy and be empowered to manifest our goals and dreams. This can lead to a more balanced, less negative way of life and offers a way to gain inner peace, wholeness, and happiness, as well as the ability to heal yourself and others. In *The Healing Energy of Shared Consciousness*, Master Mantak Chia shows how to fuse the three minds and form the Protective Sacred Circle of Fire, which creates a seal around us, allowing in only good energy and intentions. He explains step by step how to perform the World Link meditation to connect with global and universal energy for inner peace, happiness, and healing. Accessible even for those who have never worked with the Universal Healing Tao, this practice offers a way to unite people all over the world in a form of shared consciousness that amplifies collective loving energy to benefit the world.
