Emerging and Re-Emerging Organizational Features, Work Transitions and Occupational Risk Factors: The Good, the Bad, the Right. An Interdisciplinary Perspective Giulio Arcangeli, Gabriele Giorgi, Nicola Mucci, Jean-Luc Bernaud, Annamaria Di Fabio, 2019-03-07. The labor market is evolving very rapidly in recent years in Europe and worldwide. The fast and deep changes brought a brand new context of challenges and occupational risks to the attention of stakeholders. The current global financial crisis has increased the economic pressures on companies and they in turn have intensified the effects on employees, particularly in terms of new competition contexts and a lot of stress and mental health issues. Concurrently, social, political and environmental problems generate underemployment, overqualification, overeducation, low wages for skilled workers and unmet demand for education. Consequently, both high skilled and low skilled immigrant workers are increasing. In addition, workplaces are continually changing in step with the introduction of new technologies, materials and work processes together with the changes in the labor market, the new forms of employment and the new work organizations. These changes lead to new opportunities for employees and employers but also to new risks or re-actualization of old organizational risks. According to the EU OSHA, the key points that describe the evolution that is currently ongoing in the world of work are globalization, the technical innovation and the aging population. On one hand, some older potential risks are reappearing in organizations: intensive fear and worries, organizational anxiety, boredom, physical violence, alienation, segregation, loneliness and isolation. On the other hand, re-emerging perceived organizational features seem vital for organizations and more important today than ever. Central constructs in the study of

organizational behavior and organizational health such as perceived organizational support commitment in organizational context socialization processes change capacity of organizations perceived organizational justice ergonomics and motivation nowadays seem increasingly important and renewed *The Oxford Handbook of Lifelong Learning* ,2021-06-01 This Handbook provides a comprehensive and up to date examination of lifelong learning Across 38 chapters including twelve that are brand new to this edition the approach is interdisciplinary spanning human resources development adult learning educational perspective psychology career and vocational learning management and executive development cultural anthropology the humanities and gerontology This volume covers trends that contribute to the need for continuous learning considers psychological characteristics that relate to the drive to learn reviews existing theory and research on adult learning describes training methods and learning technologies for instructional design and explores current and future challenges to support continuous learning Psychology in Action Karen R.
