World Small Scale Fisheries Contemporary Visions:

World Small-scale Fisheries Daniel Pauly, 2011 *World Small-scale Fisheries* Ratana Chuenpagdee, 2011 The importance of fisheries is not lost in the global policy arena What is often overlooked in the general discourse however is the significant difference between small and large scale fisheries Major rethinking about all aspects of small scale fisheries is required including their contribution to catches employment livelihood food security and conservation This book is a collection of essays about the diverse complex and dynamic contexts that characterize small scale fisheries around the world The essays highlight the strengths capacity motivation and contributions associated with this fishing sector They remind us that solutions and opportunities for the viability and sustainability of small scale fisheries can be found once the issues are understood from a holistic perspective and possible options including inventive governance arrangements are fully explored The authors are scientists and practitioners who work in small scale fisheries in various parts of the world many of whom participated at the first World Small Scale Fisheries Congress WSFC held in Bangkok in October 2010 and are members of the global research network for the future of small scale fisheries Too Big To Ignore The editor Ratana Chuenpagdee the initiator of the WSFC is Canada Research Chair in Natural Resource Sustainability and Community Development at Memorial University of Newfoundland Canada Book jacket **World Ocean Assessment** Alan Simcock, 2017-04-17 This United Nations report examines the current state of knowledge of the world's oceans for policymakers and provides a reference for marine science courses *The Future of Ocean Governance and Capacity Development* International Ocean Institute - Canada, 2018-09-11 The International Ocean Institute Canada has produced this collection of over 80 insightful essays on the future of ocean governance and capacity development The book honors the work of Elisabeth Mann Borgese 1918 2002 preeminent ocean advocate and founder of the IOI More than 90 leading experts explore future challenges and opportunities for ocean governance and capacity development Major themes include the law of the sea ocean sciences integrated coastal and ocean management fisheries and aquaculture communication and negotiations maritime safety and security ocean energy and maritime transportation The essay collection is aimed at professionals students and citizens alike covering themes that parallel those in the annual Training Program of IOI Canada A leading member of the International Ocean Institute's network of centers and focal points worldwide IOI Canada was founded by Elisabeth Mann Borgese in 1979

Routledge Handbook of Ocean Resources and Management Hance D. Smith, Juan Luis Suárez de Vivero, Tundi S. Agardy, 2015-10-16 This comprehensive handbook provides a global overview of ocean resources and management by focusing on critical issues relating to human development and the marine environment their interrelationships as expressed through the uses of the sea as a resource and the regional expression of these themes The underlying approach is geographical with prominence given to the biosphere political arrangements and regional patterns all considered to be especially crucial to the human understanding required for the use and management of the world's oceans Part one

addresses key themes in our knowledge of relationships between people and the sea on a global scale including economic and political issues and understanding and managing marine environments Part two provides a systematic review of the uses of the sea grouped into food ocean space materials and energy and the sea as an environmental resource Part three on the geography of the sea considers management strategies especially related to the state system and regional management developments in both core economic regions and the developing periphery Chapter 23 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9780203115398.ch23>

Transitioning to Sustainable Life below Water

Werner Eka, Anna-Katharina Hornidge, 2022-04-08 The ocean plays a central role in the life and development of human kind Besides space for navigation and trade roughly 10 billion tons of commodities are transported across the oceans each year the provision of biological and non living resources is the most important service of the marine ecosystems Yet these ecosystems are increasingly impeded by human activities and interventions Human and naturally induced changes in climate are buffered by the ocean but its capacity to compensate the increase of CO₂ in the atmosphere is at its limit The increase of global temperatures and the decrease of oxygen concentration and pH are severe stressors for aquatic species and thus for the whole ecosystem Urbanisation and population growth at the coast along with severe levels of pollution are stressing coastal environments and hampering or interrupting life cycles of species as well as the well established and naturally balanced internal interconnections within and between ecosystems Mining for oil and gas is interfering with fisheries competing for space with other sectors and increasing the risks for large scale pollution The result is a decline in ecosystem services and a negative feedback into the socio economic systems The recent reports by IPBES and IPCC underline the degrading conditions in which the ecosystems are situated today The IPBES report evaluates a number of direct and indirect drivers Population increase technical development malfunctioning of governance and spreading of conflicts affect direct drivers such as sea use change direct exploitation climate change pollution invasive species and others Following a series of summits and conventions that prompted the United Nations in recent decades Rio de Janeiro in 1992 Johannesburg in 2002 and Rio 20 in 2012 all of which were rather land based the Sustainable Development Goals 2015 set a new landmark in which the ocean too was finally acknowledged as significant to global development The Ocean Conference in New York in June 2017 led the international community to formulate clear goals for the development of the ocean The volume Transitioning to Sustainable Life below Water will address critical issues in ocean use and reflect against goals and targets of SDG 14 and other relevant SDGs Transitioning to Sustainable Life below Water is part of MDPI's new Open Access book series Transitioning to Sustainability With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs The book series is intended to reach beyond

disciplinary even academic boundaries The chapters listed below are pre publication chapters and the final page numbers will be assigned once the book is published as a whole For citation purposes cite each article independently as indicated below Author 1 and Author 2 2021 Chapter Title in Transistioning to Sustainable Life below Water Edited by Werner Ekau and Anna Katharina Hornidge *Coasts for People* Fikret Berkes,2015-02-11 Issues of sustainability and increased competition over coastal resources are changing practices of resource management Societal concerns about environmental degradation and loss of coastal resources have steadily increased while other issues like food security biodiversity and climate change have emerged A full set of social ecological and economic objectives to address these issues are recognized but there is no agreement on how to implement them This interdisciplinary and big picture book through a series of vivid case studies from environments throughout the world suggests how to achieve these new resource management principles in practical accessible ways *The United Nations' Declaration on Peasants' Rights* Mariagrazia Alabrese,Adriana Bessa,Margherita Brunori,Pier Filippo Giuggioli,2022-01-23 This is the first book to address and review the United Nations Declaration on the Rights of Peasants and Other People Working in Rural Areas UNDROP which was adopted by the United Nations General Assembly in December 2018 Food security and sustainable agri food systems responsible governance of natural resources and human rights are among the key themes of the new millennium The Declaration is the first internationally negotiated instrument bridging these issues calling for a radical paradigm change in the agricultural sector while giving voice to peasants and rural workers recognised as the drivers of more equitable and resilient food systems The book unfolds the impact of the Declaration in the wider realm of law and policy making especially concerning the new human rights standards related to access and control of natural resources and the governance of food systems The chapters in the book touch on a broad array of topics including women s rights the role of and impact on indigenous peoples food sovereignty climate change land tenure and agrobiodiversity Voices from outstanding scholars and practitioners are gathered together to inform and trigger a further debate on the negotiation process the innovative and potentially disruptive contents the relations with other fields of law and the practical scope of the Declaration The volume concludes with a collection of case studies that provide concrete examples to help us understand the potential impacts of the Declaration at regional national and local levels This book is the first comprehensive tool to navigate the Declaration and is designed for students researchers and practitioners in the fields of food and agriculture law peasant agrarian and rural studies human rights and environmental law and international development and cooperation Chapter 6 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *The Blue Compendium* Jane Lubchenco,Peter M. Haugan,2023-05-24 Home to over 80 percent of all life on Earth the ocean is the world s largest carbon sink and a key source of food and economic security for billions of people The relevance of the ocean for humanity s future is undisputed However

the ocean's great potential to drive economic growth and equitable job creation sustain healthy ecosystems and mitigate climate change is not yet fully recognised Lack of awareness of this potential as well as management and governance challenges pose impediments Until these impediments are removed ocean ecosystems will continue to be degraded and opportunities for people lost A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed This open access collection of papers and reports identifies a path that is inspired by science energised by engaged people and emboldened by visionary leaders These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy Ocean Panel which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean issues Altogether The Blue Compendium offers innovative ocean solutions in technology policy governance and finance realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business finance and civil society

Strengthening Organizations and Collective Action in Fisheries Daniela Coswig Kalikoski, Nicole Franz, 2014 This document provides a summary of the Workshop held in Rome 18-20 March 2013 The workshop anticipated the implementation of the SSF Guidelines by looking at the diversity of existing organizations and collective action in SSFs analyzing their strengths and weaknesses and proposing elements for a capacity development strategy to reduce poverty while promoting responsible fisheries The document contains a summary of the plenary presentations and discussions the working group outcomes and is complemented by the full text of two background papers

□□□□□□□□, 2017 *Increasing the Contribution of Small-scale Fisheries to Poverty Alleviation and Food Security* Christophe Béné, Graeme Macfadyen, Edward Hugh Allison, Food and Agriculture Organization of the United Nations, 2007 The third and main section of the document discusses ways of increasing the contribution of small scale fisheries to poverty alleviation and food security through nine main entry points First the paper revisits conventional fisheries policies and legislation and makes suggestions on how those can be made more pro poor Next the paper emphasizes the importance of capacity building and

highlights how cross sectoral interventions can greatly improve the livelihoods of fish dependent communities The paper then proposes a series of broad pro poor or pro small scale fisheries principles before discussing in greater detail three of the main management instruments adopted in fisheries i property right approaches ii co management and iii protected areas The next two sub sections discuss markets and how to make them work for the poor and the important issue of pro poor financing systems and subsidies

Golden Gate University Law Review Golden Gate University. School of Law,2004 State and Community in Fisheries Management E. Paul Durrenberger,Thomas D. King,2000-05-30 Those who are involved with fishing and fisheries resource management including fishermen their communities production processing distribution and marketing industries and various government and non governmental organizations confront the contradictions arising from the appropriation allocation and distribution of fisheries and marine resources in a variety of ways The authors call into question the assumptions of policy prescriptions to common resource problems by examining the experiences of people and societies confronted with and adapting to these resource appropriation allocation and distribution problems They suggest that tragedies of resource depletion and institutional failure to deal with them are not characteristic of human nature but rather are by products of particular cultural practices institutions and assumptions The detailed empirical ethnographic study of these relationships holds great potential for informing those who are making future policy decisions as well as contributing to the theories of human behavior and cooperation to solve such problems
