Zapata, Keith A. Weitz, 2015-11-09 Cities often have limited financial resources for sustainability planning including sustainable solutions for municipal solid waste management In this paper we investigate municipal solid waste management strategies designed to meet two common environmental goals reducing greenhouse gas emissions and achieving zero waste by maximizing materials recovery We analyzed strategies using data collected from a range of low to high income cities around the world We inputted these data into RTI s Municipal Solid Waste Decision Support Tool and used the tool to identify the waste management strategies for each city that best met these two environmental goals We compared results among the cities and strategies and then highlighted the limitations of designing sustainable programs based on a single goal Strategies for minimizing greenhouse gas emissions and for maximizing materials recovery can have significantly different environmental impacts in the same city ranging from net savings under one strategy to net emissions under another We were able to explain many of these differences by considering the regional differences in waste composition in particular the amount of recyclable commodity materials and the energy and emissions savings associated with displacing conventional fuels in waste to energy processes for the strategies that included these processes **Statistical Abstract of the United States**, 2010 *Statistical Abstract of the United States 2009 (Paperback)* , Presents over 1 400 tables that provide statistical data on the social economic and political organization of the United States and includes source notes for each chart guides to additional information and a comprehensive index Lean-Led Hospital Design Naida Grunden, Charles Hagood, 2012-03-16 Lean Led Hospital Design explains how hospitals can be built to increase patient safety and reduce wait times while eliminating waste lowering costs and easing some of healthcare s most persistent problems It supplies a simplified timeline of architectural planning from start to finish to guide readers through the various stages of the Lean design development philosophy including Lean architectural design and Lean work design It includes examples from several real healthcare facility design and construction projects as well as interviews with hospital leaders and architects The Globalization of Adoption Becca McBride, 2016-07-14 This book expands our understanding of a growing yet largely unstudied phenomenon the flow of children across borders through intercountry adoption What explains the spread of intercountry adoption through the international system over time McBride investigates the interconnected networks of states individuals and adoption agencies that have collaborated to develop the practice of intercountry adoption we see today This book tells the story of how adoption agencies mediate between individuals and states in two ways first by teaching states about intercountry adoption as a policy and second by helping states implement intercountry adoption as a practice McBride argues that this process of states learning about intercountry adoption from adoption agencies has facilitated the global development of the practice in the past seventy years *At Europe's Edge* Cetta Mainwaring, 2019-09-05 The Mediterranean

Sea is now the deadliest region in the world for migrants. Although the death toll has been rising for many years, the EU response remains fragmented and short sighted. Politicians frame these migration flows as an unprecedented crisis and emphasize migration control at the EU's external boundaries. In this context, *At Europe's Edge* investigates why the EU prioritizes the fortification of its external borders, why migrants nevertheless continue to cross the Mediterranean and to die at sea, and how EU member states on the southern periphery respond to their new role as migration gatekeepers. The book addresses these questions by examining the relationship between the EU and Malta, a small state with an outsized role in migration politics, as EU policies place it at the crosshairs of migration flows and controls. The chapters combine ethnographic methods with macro level analyses to weave together policymaker, practitioner, and migrant experiences and demonstrate how the Mediterranean is an important space for the contested construction of Europe. This book provides rich insight into the unexpected level of influence Malta exerts on EU migration governance, as well as the critical role migrants and their clandestine journeys play in animating EU and Maltese migration policies, driving international relations, and producing Malta's political power. By centring on the margins, the book pushes the boundaries of our knowledge of the global politics of migration, asylum, and border security.

Sustainable Consumption and Production, Volume I Ranjula Bali Swain, Susanne Sweet, 2021-03-19. Economic growth and increasing population impose long term risks to the environment and society. Approaches to address the impact of consumption and production on biodiversity loss, resource availability, climate change, and mounting waste problems on land and in seas have yet not proven to be successful. This calls for innovative approaches to address the complex environmental, social, and economic interrelationships that have to be addressed in transforming to sustainable development. *Sustainable Consumption and Production Volume I: Challenges and Development* aims to explore critical global challenges and addresses how consumers, producers, the private sector, international organizations, and governments can play an active role in innovating businesses to support a transition towards sustainable consumption and production. The book explores different approaches and innovations to address sustainable consumption and production. It details multiple social and economic contexts to the challenges and developments towards a sustainable consumption and production. The book is of interest to economists, students, businesses, and policymakers. Chapter 14 and chapter 15 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Case Studies in Global School Health Promotion Cheryl Vince Whitman, Carmen E. Aldinger, 2009-04-29. A growing body of research identifies strong links between children's health, social, and educational outcomes; it also notes the reciprocal benefits of access to quality education on individual and family health status. In response to these findings, the World Health Organization developed the concept of the Health Promoting School (HPS), a living catalyst for healthy lives and for positive changes that students can take home and into the community. *Case Studies in Global School Health Promotion* provides readers with a theoretical and research base needed to understand the methods used in
