## **World Architecture A Cross Cultural History:**

**World Architecture** Richard Ingersoll, 2019 World Architecture provides the most comprehensive and contemporary survey of the field Each chapter is organized chronologically and focuses on three unique architectural cultures simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history cultural significance beauty and diversity of architecture from around the world World Architecture and Society Peter Louis Bonfitto, 2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present **Spatial Theories for the Americas** Fernando Luiz Lara, 2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of Spatial Theories for the Americas offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction **Designing Emerging Markets** Giaime Botti, 2023-05-22 This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on

quantitative data Focusing on the golden age of globalisation 1990 2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe North America and the Asia Pacific in a broad sample of emerging markets Mainland China South East Asia India the Persian Gulf Sub Saharan Africa Russia and Kazakhstan and Latin America In the book different thematic geographies are presented to explore the global scope of the contemporary profession examine significant projects and the structural conditions behind them and reveal the debates that such works generated Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations Richly illustrated this book is further enhanced by an ample set of maps graphs and tables to visualise data better
