Card 2 of 2 – (Advanced Features)

Cross-Band Repeater Mode

- ① When used as a cross-band repeater, signals are received on one band and retransmitted on the other band. You can receive on VFO-A (set for UHF) and transmitting on VFO-B (set for UHF) or the other way around. You cannot receive and transmit on the same frequency band.

Cross-Band Rules and Regulations

- ① Special rules govern repeater operation. You should research the requirements. The following highlights some of the issues.

- ① Operate Frequency: Pick a clear frequency. If you are unsure, check with your local radio club or other repeaters. You may need in contact your area's Frequency Coordinator.

- ① Station Control: A Control Station must be able to shut down the repeater in case of a problem.

- ① Station ID: Any unattended station must ID on its transmit frequencies, typically the call sign of the owner / control operator. Additionally, when talking on the repeater you should verbally ID as using a cross-band or remote base repeater.

Enabling Cross-band Repeater Mode

1. In dual VFO mode, set one VFO to a suitable VHF frequency and set the other band to a UHF frequency. Set both bands for simplex operation.

2. To prevent inadvertent retransmission of stray signals, set both VFOs (receivers) to transmit squelch OFF, either a repeater or simplex mode. Set the transmit squelch to ON.

- ① Set receiver squelch level and the transmit power level to suit your needs.
- ① You may want to save the programming to two memory channels for easy recall.

4. Access **Menu 37 RPT-SET** and select X-TWRPT for two way cross-band operation, the normal mode for amateur cross-band operation.

5. If you wish to listen to received signals, access **Menu 38 RPT-SPK** and select ON.

- ① If you wish to transmit, set the transmit power level to suit your needs.

- ① Access **Menu 26 CH-SET** and select ON.
- ① Press [MENU] → [U] [POWER] to save the channel name and tone / code.

- 7. To place the transceiver into cross-band mode press [RPT] 2 seconds. Repeat to exit.

- ① While in cross-band mode the **CB** icon is displayed at the top of the screen.

- 8. Once everything is set, you may want to lock the controls by pressing [F LOCK] 2 seconds.

Cross-band Repeater Hold Time

- ① The *Hold* time determines if signal retransmission is canceled immediately when the received signal drops, or continues transmitting for a user selectable period of time (100 ms to 5 seconds), which can be useful in preventing "ping-ponging" when linked to another repeater.

- ① Access **Menu 39 RPT-HOLD** and select the hold time you want using the programming controls.

- ① Press [MENU] → [U] [POWER] to save the hold time.

Battery Saver Operations

- ① Battery saver reduces power consumption by only periodically "waking up" the receiver to check to see if a signal is being received. This may result in missing the first second or so of a transmission. Default is ON.

- ① Access **Menu 36 BATT-SAVE** and select ON.
- ① Press [MENU] → [U] [POWER] to save the battery saver setting.

Enabling VOX Operation

- ① Access **Menu 7 VOX** and set a sensitivity level of 1-9.

- ① Effective VOX operation may require the use of an optional headset.

Busy Channel Lockout

- ① Busy channel lockout can be enabled to prevent doubling with a signal that is already present before pressing PTT.

1. Access **Menu 13 BC** and set it ON to enable.
