To Advance Knowledge The Growth Of American Research Universities 1900 1940:

To Advance Knowledge Roger L. Geiger, 2004 American research universities are part of the foundation for the supremacy of American science Although they emerged as universities in the late nineteenth century the incorporation of research as a distinct part of their mission largely occurred after 1900 *To Advance Knowledge* relates how these institutions by 1940 advanced from provincial outposts in the world of knowledge to leaders in critical areas of science This study is the first to systematically examine the preconditions for the development of a university research role These include the formation of academic disciplines communities that sponsored associations and journals which defined and advanced fields of knowledge Only a few universities were able to engage in these activities Indeed universities before World War I struggled to find the means to support their own research through endowments research funds and faculty time *To Advance Knowledge* shows how these institutions developed the size and wealth to harbor a learned faculty The book illustrates how arrangements for research changed markedly in the 1920s when the great foundations established from the Rockefeller and Carnegie fortunes embraced the advancement of knowledge as a goal Universities emerged in this decade as the best suited vessels to carry this mission Foundation resources made possible the development of an American social science In the natural sciences this patronage allowed the United States to gain parity with Europe on scientific frontiers of which the most important was undoubtedly nuclear physics The research role of universities cannot be isolated from the institutions themselves *To Advance Knowledge* focuses on sixteen universities that were significantly engaged with research during this era It analyzes all facets of these institutions collegiate life sources of funding treatment of faculty since all were relevant to shaping the research role Roger L Geiger is Distinguished Professor of Higher Education at the Pennsylvania State University He has edited the *History of Higher Education Annual* since 1993 was a section editor for the *Encyclopedia of Higher Education* and is the author of *The American College in the Nineteenth Century* and *Private Sectors in Higher Education*

Reconfiguring Knowledge Production Richard Whitley, Jochen Gläser, Lars Engwall, 2010-07-22 The governance of the public sciences has profoundly changed since the Second World War especially with regard to funding structures the autonomy and accountability of public research organizations and universities and the extent to which research is steered towards societal usefulness Going beyond previous analyses of these changes in science studies science policy and higher education studies this book presents and applies a novel approach that provides an integrated assessment of changes in public science systems and their impact on scientific innovation Its basic assumptions are i that all changes in public science systems PSS affect authority relations the interests and action capabilities of authoritative agencies in science and ii that the authority relations concerning the selection of goals and approaches in research as well as the integration of research results are the channel through which changes in PSS affect the production of scientific knowledge and particularly scientific innovation This focus on authority relations as the key interface integrating changes in governance and translating them into

changes in the production of scientific knowledge is an important innovation because the effects of governance at the performance level of the science system have been largely neglected by other approaches. By demonstrating that changes in authority relations are field specific and have field specific effects on knowledge production and that these field specific authority relations do indeed affect the conditions for intellectual innovation, the perspective explored in this book challenges science policy studies to bring work back in to the study of the organisation and governance of the sciences.

Education and Social Change John L. Rury, 2019-08-05 This brief interpretive history of American schooling focuses on the evolving relationship between education and social change. Like its predecessors, this new edition investigates the impact of social forces such as industrialization, urbanization, immigration, and cultural conflict on the development of schools and other educational institutions. It also examines the various ways that schools have contributed to social change, particularly in enhancing the status and accomplishments of certain social groups and not others. Detailed accounts of the experiences of women and minority groups in American history consider how their lives have been affected by education at key points in the past. Updates to this edition: A revised final chapter updated to include recent changes in educational politics, finance, policy, and a shifting federal policy context. Enhanced coverage and new conceptual frames for understanding the experiences of women and people of color in the midst of social change. Edited throughout to update information and sources regarding the history of American education and related processes of social transformation in the nation's past.

The New Institutionalism in Strategic Management P. Ingram, B. Silverman, 2002-08-23 In this exciting volume, a diverse and accomplished group of scholars work to integrate theories of institutions with strategic management. The research they present examines a wide range of industrial contexts ranging from American retailing at the end of the nineteenth century to German tax law at the beginning of the twenty-first.

Knowledge Worlds Reinhold Martin, 2021-03-16 What do the technical practices, procedures, and systems that have shaped institutions of higher learning in the United States from the Ivy League and women's colleges to historically black colleges and land grant universities teach us about the production and distribution of knowledge? Addressing media theory, architectural history, and the history of academia, *Knowledge Worlds* reconceives the university as a media complex comprising a network of infrastructures and operations through which knowledge is made, conveyed, and withheld. Reinhold Martin argues that the material infrastructures of the modern university—the architecture of academic buildings, the configuration of seminar tables, the organization of campus plans—reveal the ways in which knowledge is created and reproduced in different kinds of institutions. He reconstructs changes in aesthetic strategies, pedagogical techniques, and political economy to show how the boundaries that govern higher education have shifted over the past two centuries. From colleges chartered as rights-bearing corporations to research universities conceived as knowledge factories, educating some has always depended upon excluding others. *Knowledge Worlds* shows how the division of intellectual labor was redrawn as new students entered, expertise circulated, science repurposed old myths, and

humanists cultivated new forms of social and intellectual capital Combining histories of architecture technology knowledge and institutions into a critical media history Martin traces the uneven movement in the academy from liberal to neoliberal reason The College "Y" D. Setran,2007-01-22 Please note this is a Palgrave to Order title PTO Stock of this book requires shipment from an overseas supplier It will be delivered to you within 12 weeks In this groundbreaking history of the YMCA David Setran details its critical role on American campuses exploring how this popular organization worked to strengthen the Protestant piety of American collegians through Bible study service and prayer as well as how the organization changed after World War I alienating itself from churches university administrators and even the students themselves **Precipice or Crossroads?** Daniel Mark Fogel,Elizabeth Malson-Huddle,2012-06-29 President Lincoln signed the Morrill Land grant Act in 1862 launching a nationwide project in public higher education that would build democracy prosperity and competitiveness to levels undreamed of 150 years ago As student costs skyrocket driven by steep drops in public funding the viability of that project like the nation itself is under threat In Precipice or Crossroads top experts in higher education address a broad range of issues central to the question of whether the quality of these institutions and of American life and democracy can be sustained **Software Engineering and Knowledge Engineering: Theory and Practice** Wei Zhang,2012-06-30 2012 International Conference on Software Engineering Knowledge Engineering and Information Engineering SEKEIE 2012 will be held in Macau April 1 2 2012 This conference will bring researchers and experts from the three areas of Software Engineering Knowledge Engineering and Information Engineering together to share their latest research results and ideas This volume book covered significant recent developments in the Software Engineering Knowledge Engineering and Information Engineering field both theoretical and applied We are glad this conference attracts your attentions and thank your support to our conference We will absorb remarkable suggestion and make our conference more successful and perfect

American Higher Education in the Twenty-First Century Michael N. Bastedo,Philip G. Altbach,Patricia J. Gumport,2016-03-30 An indispensable reference that everyone concerned with the future of American colleges and universities should acquire First published in 1999 American Higher Education in the Twenty First Century offered a comprehensive introduction to the central issues facing American colleges and universities This thoroughly revised edition brings the classic volume up to date The contributors have rewritten every chapter to address major changes in higher education including the rise of organized social movements the problem of income inequality and stratification and the growth of for profit and distance education Three new chapters cover information technology community colleges and teaching and learning This edition seeks to capture several crucial dynamics in the nexus of higher education and society Placing higher education within its social and political contexts the contributors discuss finance federal and state governance faculty students curriculum and academic leadership They also grapple with growing concerns about the future of the academy and reflect more deeply on the racial ethnic and socioeconomic diversity within higher education No other book

covers such wide ranging issues under the broader theme of higher education's relationship to society. Highly acclaimed and incorporating cutting edge research, *American Higher Education in the Twenty First Century* is now more useful and engaging than ever. Contributors: Michael N. Creating the Cold War University Rebecca S. Lowen, 1997-07-01. The cold war university is the academic component of the military industrial academic complex and its archetype, according to Rebecca Lowen, is Stanford University. Her book challenges the conventional wisdom that the post World War II multiversity was created by military patrons on the one hand and academic scientists on the other, and points instead to the crucial role played by university administrators in making their universities dependent upon military foundation and industrial patronage. Contesting the view that the federal grant university originated with the outpouring of federal support for science after the war, Lowen shows how the Depression had put financial pressure on universities and pushed administrators to seek new modes of funding. She also details the ways that Stanford administrators transformed their institution to attract patronage. With the end of the cold war and the tightening of federal budgets, universities again face pressures not unlike those of the 1930s. Lowen's analysis of how the university became dependent on the State is essential reading for anyone concerned about the future of higher education in the post cold war era.
