Channel-conveyance capacity, channel change, and sediment transport in the lower Puyallup, White, and Carbon Rivers, western Washington Jonathan A. Czuba, Christiana R. Czuba, Christopher S. Magirl, Frank D. Voss, 2010-12-01

Draining the volcanic glaciated terrain of Mount Rainier Washington the Puyallup White and Carbon Rivers convey copious volumes of water and sediment down to Commencement Bay in Puget Sound Recent flooding in the lowland river system has renewed interest in understanding sediment transport and its effects on flow conveyance throughout the lower drainage basin Bathymetric and topographic data for 156 cross sections were surveyed in the lower Puyallup River system by the U S Geological Survey USGS and were compared with similar datasets collected in 1984 Regions of significant aggradation were measured along the Puyallup and White Rivers Between 1984 and 2009 aggradation totals as measured by changes in average channel elevation were as much as 7 5 6 5 and 2 feet on the Puyallup White and Carbon Rivers respectively These aggrading river sections correlated with decreasing slopes in riverbeds where the rivers exit relatively confined sections in the upper drainage and enter the relatively unconstricted valleys of the low gradient Puget Lowland Measured grain size distributions from each riverbed showed a progressive fining downstream Analysis of stage discharge relations at streamflow gaging stations along rivers draining Mount Rainier demonstrated the dynamic nature of channel morphology on river courses influenced by glaciated volcanic terrain The greatest rates of aggradation since the 1980s were in the Nisqually River near National 5 0 inches per year and the White River near Auburn 1 8 inches per year Less pronounced aggradation was measured on the Puyallup River and the White River just downstream of Mud Mountain Dam The largest measured rate of incision was measured in the Cowlitz River at Packwood 5 0 inches per year Channel conveyance capacity estimated using a one dimensional hydraulic model decreased in some river reaches since 1984 The reach exhibiting the largest decrease about 20 50 percent in channel conveyance capacity was the White River between R Street Bridge and the Lake Tapps return a reach affected by recent flooding Conveyance capacity also decreased in sections of the Puyallup River Conveyance capacity was mostly unchanged along other study reaches Bedload transport was simulated throughout the entire river network and consistent with other observations and analyses the hydraulic model showed that the upper Puyallup and White Rivers tended to accumulate sediment Accuracy of the bedload transport modeling however was limited due to a scarcity of sediment transport data sets from the Puyallup system mantling of sand over cobbles in the lower Puyallup and White Rivers and overall uncertainty in modeling sediment transport in gravel bedded rivers Consequently the output results from the model were treated as more qualitative in value useful in comparing geomorphic trends within different river reaches but not accurate in producing precise predictions of mass of sediment moved or deposited The hydraulic model and the bedload transport component were useful for analyzing proposed river management options if surveyed cross sections adequately represented the river management site and proposed

management options The hydraulic model showed that setback levees would provide greater flood protection than gravel bar scalping after the initial project construction and for some time thereafter although the model was not accurate enough to quantify the length of time of the flood protection The greatest hydraulic benefit from setback levees would be a substantial increase in the effective channel conveyance area By widening the distance between levees the new floodplain would accommodate larger increases in discharge with relatively small incremental increases in stage Model simulation results indicate that the hydraulic benefit from a setback levee also would be long lived and would effectively compensate for increased deposition within the setback reach from increased channel conveyance capacity In contrast the benefit from gravel bar scalping would be limited by the volume of material that could be removed and the underlying hydraulics in the river section that would be mostly unaffected by scalping Finally the study formulated an explanation of the flooding that affected Pacific Washington in January 2009 Reduction in channel conveyance capacity of about 25 percent at the White River near Auburn streamflow gaging station between November 2008 and January 2009 was caused by rapid accumulation of coarse grained sediment just downstream of the gage continuing an ongoing trend of aggradation that has been documented repeatedly

Collision Documentation Christopher D Armstrong, 2018-11-02 The last ten years have seen explosive growth in the technology available to the collision analyst changing the way reconstruction is practiced in fundamental ways The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data create 3D models and visualize and analyze crash vehicles and environments The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction Because of the technological changes occurring in the industry many SAE papers have been written to address the validation and use of new tools for collision reconstruction Collision Reconstruction Methodologies Volumes 1 12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field Topics featured in the series include Night Vision Study and Photogrammetry Vehicle Event Data Recorders Motorcycle Heavy Vehicle Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction appealing to crash analysts consultants and safety engineers alike Click here to purchase the entire set at a discount

Public Works Manual , 2002 **Photogrammetric Survey for the Recording and Documentation of Historic Buildings** Efstratios Stylianidis, 2020-08-16 This book provides state of the art information on photogrammetry for cultural heritage exploring the problems and presenting solutions that are applicable under real world conditions and in various disciplines Allowing readers to gain a basic understanding of cultural heritage documentation and practical image based modelling techniques it focuses on the use of photogrammetry to enhance the documentation of historic buildings in

order to reflect the international trends and meet demands of the preservation community Addressing heritage documentation from various perspectives the book will appeal students and researchers from engineering backgrounds as well as from the arts and humanities Crime Scene Documentation Robert Galvin,2020-12-10 When a criminal act or vehicle crash occurs most often a local law enforcement agency responds and is responsible for both investigating the scene and for documenting it It is critical that scene evidence is collected and recorded efficiently as the scene can quickly change The sooner evidence can be collected reviewed and analyzed the better an understanding investigators will have as to how and why the incident occurred Crime Scene Documentation Preserving the evidence and the growing role of 3D laser scanning demonstrates at length the value of laser scanning through the use of numerous case studies of investigators who have utilized various 3D technologies and laser scanning to document scenes Thorough and accurate scene documentation is an essential function at a science and proves particularly valuable in courtroom presentations to help jurors understand a crime or accident s likely chain of events The more advanced a scene documentation method is the better it can be utilized to capture details that will lead to optimal scene diagramming Currently 3D laser scanning is the most advanced method of scene documentation available capturing detailed and realistic digital scans capturing scenes in their entirety and yielding a permanent representation of the scene for study and analysis at any time even years after a crime scene has vanished The book explains current technology the latest advances and how to best utilize the technology Case examples come from various applications from tools to programs can help crash scene investigators understand how scanning can improve scene documentation provide better and more evidence details and build more credible diagrams that possibly may be used in court presentations to help support a case Key Features Describes 3Dscene recording methods in use and how well they work Outlines the variables and inherent challenges associated with documenting crime and crash scenes Illustrates the positive and dramatic impact of having a well documented scene particularly in the courtroom Explores how 3D laser scanning has vastly changed the way and extent to which crime and crash scenes can be captured accurately and completely and subsequently analyzed Explains how laser scanning is highly flexible and presents strategies to integrate it into other crime scene incident recording techniques and technologies Crime Scene Documentation details the many benefits of 3D laser scanning technology relative to its reliability and accuracy as well as the multiple case scenarios in which it can be used The book serves as an invaluable resource to crime scene technicians investigators and reconstructionists on the best ways to document a crime or crash scene **Manual of Geospatial Science and Technology** John D. Bossler,James B. Campbell,Robert B. McMaster,Chris Rizos,2010-03-05 Following in the tradition of its popular predecessor the Manual of Geospatial Science and Technology Second Edition continues to be the authoritative volume that covers all aspects of the field both basic and applied and includes a focus on initiating planning and managing GIS projects This comprehensive resource which contains contributio *Advanced Surveying* Satheesh Gopi,Gopi,2007 Construction Technology for

Builders Glenn Costin, 2020-06-26 Construction Technology for Builders 1e addresses requirements of the Certificate IV in Building and Construction Building The text addresses 14 competency units with learning activities and work sheets for downloading The chapters are aligned to specific competency units and the material in this text requires and emphasises that the reader engage with Standards and Codes such as the NCC Communication is a critical component of the building and construction process and the preparation of sketches and drawings is a vital part of that communication skill set the text has a dedicated chapter on preparing building sketches and drawings There are two chapters on structures the first introducing the concepts underlying structural principles and underpins the following chapter that applies this knowledge to the various elements of a building Additional learning material such as plans and specifications is provided in the Appendices to assist with the understanding of examples and exercises in the text

Recording, Documentation and Information Management for the Conservation of Heritage Places Robin Letellier, Rand Eppich, 2015-12-22 This two volume guide provides a comprehensive overview of the fundamental principles and guidelines for documenting cultural heritage places It seeks to aid heritage managers and decision makers in understanding their roles and responsibilities in this essential activity Volume 1 Guiding Principles explains why heritage managers must make sure that heritage information fully integrated into all research investigation and conservation activities Through the discussion of basic principles benefits and new approaches it assists those in charge of preserving immovable cultural heritage by bringing current heritage information practices to a new level By recording we create a reference for evaluating change and add to the understanding of a site By documenting we guarantee that information is systematically collected and preserved for future use By managing the information we make it available and provide a basis for sharing our knowledge and understanding Volume 2 presents illustrated examples from around the world Good documentation of a site allows for better understanding of the site's value Recognizing value and significance is often the first step toward a site's eventual conservation The information obtained through the documentation process allows conservation professionals to record current conditions consider appropriate conservation options plan interventions apply treatments and finally measure the results of their efforts Documentation can be a tool in resolving a conservation issue This volume presents several illustration examples from around the world in various stages of conservation

Surveying: Theory and Practice James M Anderson, Edward M Mikhail, 1998 Drawing accurate topographical plans is a major part of field archaeology and standards need to be right up to the level of civil engineers This is the standard text for all professionals updated to incorporate the latest advances in legislation and technology especially the growth of Global Positioning System GPS precision

Surveying for Engineers John Uren, Bill Price, 2018-03-13 The fifth edition of this classic textbook sets out the essential techniques needed for a solid grounding in the surveying The popular and trusted textbook covers the traditional topics such as levelling measurement of angles measuring distances and how to carry out traversing and compute coordinates as well as the latest technological advances It is packed with clear illustrations exercises

and worked examples making it both a comprehensive study aid for students and a reliable reference tool for practitioners This text is aimed at students studying surveying as either part of a civil engineering building or construction course or as a separate discipline It is also useful for students who undertake surveying as an elective subject and is a useful resource for practising surveyors New to this Edition The latest developments in Global Navigation Satellite Systems GNSS particularly the introduction of network RTK and OS Net and their applications Recent developments in survey instruments methods and digital technologies including image processing with total stations and laser planners developments in data processing and integration and updates on Ordnance Survey mapping products Advances in Photogrammetry, Remote Sensing and

on Implementing Digital Reality and Interactive Technologies to Achieve Society 5.0 Ugliotti, Francesca Maria,Osello, Anna,2022-06-30 Research on digital reality has been extensive in recent years covering a wide range of topics and leading to new ways to approach and deal with complex situations Within the Society 5.0 paradigm people and machines establish a positive relationship to find solutions for social aspects and problems This perspective establishes a strong interconnection between physical and virtual space making the user an active player for better life and society In these terms digital systems and virtual and augmented reality technologies enable multi dimensional scenarios and additional levels of interdisciplinary collaboration to create a highly inclusive communication network and social framework The Handbook of Research on Implementing Digital Reality and Interactive Technologies to Achieve Society 5.0 provides an overview of methods processes and tools adopted to achieve super smart society needs by exploiting digital reality and interactive technologies It includes case studies that illustrate applications that place people's quality of life at the center of the digitalization process accessing and managing different information and data domains Covering topics such as cultural heritage interactive learning and virtual participation this major reference work is a comprehensive resource for business executives and managers IT managers government officials community leaders arts and performance organizers healthcare administrators and professionals faculty and administrators of both K-12 and higher education students of higher education researchers and academicians ACSM Bulletin,2000 *Field Methods in Archaeology* Thomas R Hester,Harry J Shafer,Kenneth L Feder,2016-09-16 *Field Methods in Archaeology* has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary Robert Heizer Left Coast has arranged to put the most recent Seventh Edition back into print after a brief hiatus making this classic textbook again available to the next generation of archaeology students This comprehensive guide provides an authoritative overview

of the variety of methods used in field archaeology from research design to survey and excavation strategies to conservation of artifacts and record keeping Authored by three leading archaeologists with specialized contributions by several other experts this volume deals with current issues such as cultural resource management relations with indigenous peoples and database management as well as standard methods of archaeological data collection and analysis *Boats of Currituck: An Analysis of Six Watercraft from the Whalehead Trust Preservation Trust Collection* Nathan Richards, David J. Stewart, 2016-11

In the fall of 2013 and the summer of 2014 graduate students from East Carolina University's Program in Maritime Studies in collaboration with the UNC Coastal Studies Institute carried out a project recording six watercraft from a collection of historical small watercraft collected and maintained by the Whalehead Preservation Trust in Currituck County North Carolina This volume contains six chapters that serve as the technical reports concerning these six vessels Each chapter reports the process of recording the boats and their histories and also engages in interpretation and analysis of the form function and methods of construction This publication intends to communicate the results of maritime focused historic preservation activities concerning a small part of Currituck County's legacy of boat building **Curatorial Practices for Botanical Gardens** Timothy C. Hohn, 2022-02-15 This breakthrough handbook for botanical garden and arboretum curators and curators in training has now been expanded and updated fifteen years after the last edition was published The new edition includes up to date information and methods for the preservation and conservation of plants and their use in both ex situ and in situ conservation programs habitat restorations and conservation research There are expanded and updated sections on plant acquisitions and field collecting that conform to the Convention on Biological Diversity protocols New technologies for documenting plant collections are described including reviews of the most common software programs to streamline this process Recommendations for plant preservation caring for collections have been updated with expanded information on basic horticulture practice sustainable techniques special applications for conservation collections and examples of preservation plans There is an entirely new section on collections research and applications with several chapters on the latest conservation practices technologies and programs involving collections All of the basic and essential information for collections management contained within the first edition including specific recommendations and examples has been expanded and updated with recommendations on new technologies and procedures to assist and guide curators in their critical role as plant collection developers managers and programmers What is an important resource for public garden professionals and students has now become even more essential **Construction 4.0** Marco Casini, 2021-11-24

Developments in data acquisition technologies digital information and analysis automated construction processes and advanced materials and products have finally started to move the construction industry traditionally reluctant to innovation and slow in adopting new technologies toward a new era Massive changes are occurring because of the possibilities created by Building information modeling Extended reality Internet of Things Artificial intelligence and Machine Learning Big data

Nanotechnology 3D printing and other advanced technologies which are strongly interconnected and are driving the capabilities for much more efficient construction at scale Construction 4.0 Advanced Technology Tools and Materials for the Digital Transformation of the Construction Industry provides readers with a state of the art review of the ongoing digital transformation of the sector within the new 4.0 framework presenting a thorough investigation of the emerging trends technologies and strategies in the fields of smart building design construction and operation and providing a comprehensive guideline on how to exploit the new possibilities offered by the digital revolution It will be an essential reference resource for academic researchers material scientists and civil engineers undergraduate and graduate students and other professionals working in the field of smart ecoefficient construction and cutting edge technologies applied to construction Provides an overview of the Construction 4.0 framework to address the global challenges of the buildingsector in the 21st century and an in depth analysis of the most advanced digital technologies and systems forthe operation and maintenance of infrastructure real estate and other built assets Covers major innovations across the value chain including building design fabrication construction operationand maintenance and end of life Illustrates the most advanced digital tools and methods to support the building design activity includinggenerative design virtual reality and digital fabrication Presents a thorough review of the most advanced construction materials building methods and techniquesfor a new connected and automated construction model Explores the digital transformation for smart energy buildings and their integration with emerging smartgrids and smart cities Reflects upon major findings and identifies emerging market opportunities for the whole AECO sector

Topographic Laser Ranging and Scanning Jie Shan, Charles K. Toth, 2018-02-19 Topographic Laser Ranging and Scanning Second Edition provides a comprehensive discussion of topographic LiDAR principles systems data acquisition and data processing techniques This edition presents an introduction and summary of various LiDAR systems and their principles and addresses the operational principles of the different components and ranging methods of LiDAR systems It discusses the subsequent geometric processing of LiDAR data with particular attention to quality accuracy and meeting standards and addresses the theories and practices of information extraction from LiDAR data including terrain surface generation forest inventory orthoimage generation building reconstruction and road extraction Written by leaders in the field this comprehensive compilation is a must have reference book for senior undergraduate and graduate students majoring or working in diverse disciplines such as geomatics geodesy natural resources urban planning computer vision and computer graphics It is also vital resource for researchers who are interested in developing new methods and need in depth knowledge of laser scanning and data processing and other professionals may gain the same from the broad topics addressed in this book New in the Second Edition A comprehensive array of new laser ranging and scanning technologies Developments in LiDAR data format and processing techniques Regrouping of surface modeling representations and reconstruction Enhanced discussions on the principles and fundamentals beyond small footprint pulsed laser systems and new application examples

Many new examples and illustrations
