Velocette Brian Agnew,2023 An in depth engineering analysis of the twin cylinder motorcycles produced by Veloce Ltd the Roarer the Model O and the LE The book looks at the design features that are common to all three twins as well as the design influences of the LE Although development of the LE was flawed the honesty and ingenuity of the design is duly recognised **SERVICE AND MAINTENANCE MANUAL VELOCETTE MOTORCYCLES UP TO 1962 FERRERS.**

springs and oil damping In June of that same year the engine was upgraded to an aluminum barrel and head with wider fins to improve cooling For 1953 the MAC was updated with fully adjustable rear swinging arm suspension and a tube frame Production of the rigid frame MAC ended in 1952 swing arm production ended in 1960 Based on the factory part numbers there were approximately 20 service and parts manuals published during the 20 year production run of the rigid frame machines However the print quality of the later factory manuals was not the best as the same pages or sections from earlier publications were re printed multiple times as the newer manuals were published Unfortunately this created problems in print quality and print density in those later manuals resulting in both light and heavy print on the same page While we have done our best to correct as many of those imperfections as possible there are some occurrences that just could not be corrected Therefore we request your indulgence in tolerating any variations that still exist and accept that the intention in reproducing these manuals was to provide the reader with information that would assist in the renovation and maintenance of these classic Velocette motorcycles
