NATO's Lessons in Crisis Heidi Hardt,2018 In crisis management operations strategic errors can cost lives Some international organizations IOs learn from these failures whereas others tend to repeat them Given that they have high rates of turnover how is it possible that any IO retains knowledge about the past This book introduces an argument for how and why IOs develop institutional memory from their efforts to manage crises Findings indicate that the design of an IO s learning infrastructure e g lessons learned offices and databases can inadvertently disincentivize IO elites from using it to share knowledge about strategic errors Elites high level officials in IOs perceive reporting to be a risky endeavour In response they develop institutional memory by creating and using informal processes including transnational interpersonal networks private documentation and conversations during crisis management exercises The result is an institutional memory that is highly dependent on only a handful of individuals The book draws on the author s interviews and a survey experiment with 120 NATO elites across four countries Cases of NATO crisis management in Afghanistan Libya and Ukraine further illustrate the development of institutional memory Findings challenge existing research on organizational learning by suggesting that formal learning processes alone are insufficient for ensuring that learning happens The book also offers recommendations to policymakers for strengthening the learning capacity of IOs

NATO, Gender and the Military Katharine Wright,Matthew Hurley,Jesus Ignacio Gil Ruiz,2019-04-18 This book examines NATO s engagement with gender issues through its military structures Drawing on newly declassified NATO documents this volume provides the first

comprehensive account of NATO's long established engagement with gender issues. These documents bring to the fore the stories of the NATO women and gendemen who have organised within NATO across the decades to advocate on gender issues and highlights the continued challenges to pursuing transformative agendas within resistant institutions. The book argues that NATO is an institution of international hegemonic masculinity with gender norms and values learned by member and partner states through socialisation and the engagement of a masculinist protection logic. It therefore provides an important context for NATO's recent implementation of the Women Peace and Security agenda encapsulated in UN Security Council Resolution 1325 and the seven follow up resolutions. The volume interrogates how Women Peace and Security has mapped on to NATO's pre-existing concerns as a global security actor providing impetus for further critical knowledge building of NATO which centres on gender. This book will be of interest to students and scholars of NATO Critical Military Studies Gender Studies Critical Security Studies and IR in general.

The External Action of the European Union Sieglinde Gstöhl, Simon Schunz, 2021-03-26 This groundbreaking new textbook offers extensive coverage of EU External Action studies from its major concepts to the key theories in the field. Over the past decades the European Union has progressively developed into a significant global actor in an increasing number of policy fields. This long awaited volume looks into different ways of conceptualizing the EU as a global actor the processes and impact of EU external action explanations offered by IR and integration theories the discursive normative practice and gender turns and the decentring agenda for EU external action. The book offers a reader friendly guidance on these various ways in which to study the EU as a global actor each chapter introduces one concept approach or theory and illustrates its application by a case study of EU external action. In drawing the different perspectives together the book underscores that EU External Action Studies is becoming an academic speciality in its own right. Written by leading experts the volume will make essential reading for students scholars and practitioners of EU external action. EU External Action Studies nowadays attract attention from scholars and students in International Relations IR Foreign Policy Analysis and interdisciplinary EU Studies as well as from practitioners.

In particular the book analyses the interplay between international law EU law and national law in the case law of the Court of Justice of the EU the European Court of Human Rights and national jurisdictions in Europe. It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law both in terms of doctrines such as treaty making and customary law the exercise of extraterritorial jurisdiction state responsibility and the settlement of disputes as well as particular sub fields of international

law such as human rights law and international economic law In addition the book covers other important areas such as the use of force and collective security the law of armed conflict and global and regional international organisations It provides European perspectives on all these issues and will be of great value to students scholars and practitioners **US Foreign**

Policy in a Challenging World Marco Clementi, Matteo Dian, Barbara Pisciotta, 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems The book comprises four parts the first of which addresses global issues such as nonproliferation trade and freedom of the seas US policies in these areas are carefully analyzed considering whether and how they have been differently implemented at the regional level The remaining parts of the book focus on the US posture toward specific regions Europe the Middle East and East Asia The policies adopted by the US to confront the most relevant challenges in each region are identified and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests It will be of much interest to scholars to practitioners to postgraduate PhD students of international relations theory and American foreign policy and to all with an interest in the ability of the US to produce international order **Routledge Handbook of Asian Regionalism** Mark

Beeson, Richard Stubbs, 2012-03-15 The Routledge Handbook of Asian Regionalism is a definitive introduction to and analysis of the development of regionalism in Asia including coverage of East Asia Southeast Asia and South Asia The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world Significantly this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region economic issues political issues strategic issues regional organizations As such the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events This book will be an indispensable resource for students and scholars of Asian politics international relations and regionalism Military Crisis Management Operations by NATO and the EU

Claudia Fahron-Hussey, 2018-09-06 This book analyzes both NATO's and the EU's military crisis management operations and provides an explanation for the fact that it is sometimes NATO sometimes the EU and sometimes both international organizations that intervene militarily in a conflict In detailed case studies on Libya Chad Central African Republic and the Horn of Africa Claudia Fahron Hussey shows that the capabilities and preferences of the organizations matter most and the organizations bureaucratic actors influence the decision making process of the member states EU-NATO Relations Simon J. Smith, Carmen Gebhard, Nina Graeger, 2020-04-28 For almost fifteen years both the EU and North Atlantic Treaty Organization NATO have claimed to partake in a relationship that is purported to be a Strategic Partnership albeit one that is

troubled by lasting political blockages The constraints that affect the formal relationship between the two organizations are well covered terrain in the academic literature including by most of the contributors to this volume however the popular argument that the EU and NATO simply do not cooperate in any substantive way warrants deeper investigation both theoretically and thematically Thus EU NATO relations might not at first seem like an under researched area but much of the existing literature on the issue re engages oversimplified and formulaic statements about the nature quality and practice of interactions between the EU and NATO This volume aims to develop the EU NATO research agenda by pursuing three key objectives 1 reduce the lacuna of theoretically informed analyses of the relationship 2 add empirically and analytically rigorous case studies to the relevant body of literature and 3 point to possible developments and solutions in the Strategic Partnership The chapters in this book were originally published as a special issue in European Security The Militarization of the European Union Kees van der Pijl, 2021-01-19 From the establishment of NATO in 1949 Western Europe has been under Anglo American tutelage in military and security matters Several countries most notably France and since reunification Germany have experienced this as a hindrance to the pursuit of their particular interests Since 2008 the European Commission has actively joined the quest for strategic autonomy within NATO The elections of Donald Trump and Emmanuel Macron in 2016 17 further widened the Atlantic rift while the COVID 19 crisis with its colossal economic costs has in turn exacerbated the already worsening geopolitical tensions with states like Russia and China With chapters on the politics and economics of European defence on France Germany and Russia the EU s energy provision the militarization of migration control and the restructuring of the transatlantic bond this volume offers an up to date critical assessment of the militarization of European integration written by established scholars in the fields of international relations and security studies
