

Ignition Coil Replacement

Separate coils are used for leading and trailing ignitions. The coils are not interchangeable.

1. Disconnect the coil wires. See Figure 28 (1971-73) or Figure 29 (1974).
2. Remove the coil bracket securing bolt. Lift off the outer bracket half and remove the coil(s).
3. Install in the reverse order.

DISTRIBUTORS

The 1971-73 engine uses 2 distributors, leading and trailing. Timing of the leading distributor and function of the trailing distributor are regulated by the ignition control system, discussed later in this chapter.

The 1974 engine uses one distributor, with leading and trailing points. The trailing ignition is turned on and off by the ignition control system.

Distributor Removal

1. Turn the engine by hand until the leading timing mark aligns with the pointer on the engine front cover. This is necessary for correct distributor installation.
2. Remove the distributor cap and disconnect the primary (thin) lead(s). Both 1971 distributors and 1972-73 trailing distributors use a single primary lead. The 1972-73 leading distributors and 1974 distributors use 2 primary leads.
3. Disconnect the vacuum line (1971-73 leading distributors and all 1974 distributors).
4. Make match marks on the rotor tip, distributor body, and distributor socket with a felt pen. This will ensure correct timing when the distributor is installed.

5. Remove the distributor hold-down nut (Figure 31A) and lift distributor out of the engine.

6. On 1971-73 cars, the distributor sockets (39, Figure 28) can be removed if necessary. Undo 2 nuts and lift the socket out of the engine.

Distributor Installation

1. Be sure the leading timing mark lines up with the pointer on the engine front cover.
2. If distributor sockets were removed (1971-73 cars), position them as shown in Figure 31B. After installation, the slot in leading distributor drive shaft should be 34° clockwise from the engine's front-rear direction. The trailing drive shaft's slot should be 17° clockwise from the front-rear direction. When the slots are correctly positioned, tighten the socket hold-down nuts.

3. On 1971-73 cars, install the distributor(s), lining up the match marks on rotor tip, distributor body, and socket. On 1974 cars, line up the dimple in the distributor gear with the notch at
