Yearbook of European Environmental Law Han Somsen, T. F. M. Etty, L. Krämer, J. Scott, 2004 The Yearbook of European Environmental Law brings together topical analyses of contemporary European environmental Law Leading European and American academics provide in depth scholarly articles covering a wide range of challenging issues The Yearbook contains an easily accessible Annual Survey providing legal practitioners academics and policy makers with detailed and indispensable information on current and future European environmental law Established reporters clearly and critically examine national responses to this increasingly complex body of European law In addition the Yearbook features summaries and full texts of preparatory commission documents green books and other discussion papers as well as a selection of reviews of books

Yearbook of European Environmental Law, 2006 **The Habitats Directive in its EU Environmental Law Context** Charles-Hubert Born, An Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures

of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation *Transparency in Global Environmental Governance* Aarti Gupta,2014-07-11

Transparency is increasingly seen as part of the solution to a complex array of economic political and ethical problems in an interconnected world It is often assumed to result in more accountable and effective governance The transparency turn in global environmental governance in particular is evident in a wide range of international agreements voluntary disclosure initiatives and public private partnerships This is the first book to scrutinise this transparency turn critically and to investigate whether it is a broadly transformative force or plays a more limited instrumental role **The Transition to Sustainability** Timothy O'Riordan,2013-11-05

The Transition to Sustainability details how all nations are repositioning their economies their societies and their collective purpose to maintain all life on Earth peacefully healthily equitably and with sufficient wealth to ensure that all are content in their survival From the Preface The governments of Europe are committed in principle to the implementation of sustainable development policies What will this mean in practice Most importantly how compatible is such implementation with other commitments to economic growth and competitive markets Can it be achieved and what are the implications for all other policy areas This book looks at the implications for government business taxation planning measures of change and local communities within the European Union Country case studies include Germany Norway Greece Portugal and the UK The Editors conclude by giving an overview of progress so far and offer pointers for the future Policy makers researchers and students across the range of social sciences will find this a valuable and groundbreaking book **Addressing resource efficiency through the Ecodesign Directive** Carl Dalhammar,Erika Machacek,Anja Bundgaard,Kristina Overgaard Zacho,Arne

Remmen,2014-04-08 The European Union has initiated a number of initiatives to improve resource efficiency in Europe The Ecodesign Directive is one of the policy instruments that could aid the transition towards a more resource efficient economy So far the Directive has mainly been applied to set requirements related to energy efficiency but there is potential for setting legal standards that increase product durability and promote the future re use and recycling of components and materials This paper examines the potential benefits and disadvantages in applying the Directive for this purpose and analyzes the potential to apply certain types of legal standards There is a need for continuous development of indicators and methods in order to allow for a broader range of legal standards in the future The study provides some short and long term recommendations on the way forward *Recueil Des Cours, Collected Courses 2001* Académie de Droit International de la
